Nurse as Educator: Principles of Teaching and Learning for Nursing Practice - Susan B. Bastable 2021-12-06

Nurses play a crucial role as educators no matter their professional position in the workforce. They often lead in patient teaching,

health education, and health promotion. Award-winning educator, Susan Bastable, comprehensively covers the major principles of teaching and learning for all audiences in a new edition of her best-selling text, *Nurse as Educator: Principles of Teaching and Learning for Nursing Practice*. She prepares nurse educators, clinical nurse specialists, and nurse practitioners and students for their expanding role as nurses and educators. With a focus on multiple audiences, *Nurse as Educator* applies to both undergraduate and graduate nursing courses. It covers topics in nursing education and health promotion not often found in other texts, such as health literacy, teaching people with disabilities, the impact of gender and socioeconomic on learning, technology for teaching and learning, and the ethical, legal, and economic foundations of the educational process.

Shareholder Protection Reconsidered - Georgios Zouridakis 2019-11-26

This book examines the role and potential of derivative actions in shareholder protection in public limited companies. Derivative actions have been a focal point of legislators' agendas on shareholder protection, in the past few decades, throughout Europe and beyond. Nevertheless, there remain jurisdictions, such as Greece, which are still devoid of this remedy. Against this backdrop, this book examines whether and how the derivative action may improve shareholder protection, constituting thus a mechanism that justifies legislative

attention. It does so in three parts. First, it analyses the desirable role derivative actions assume in protecting shareholder property, monitoring corporate management and mitigating agency costs, alongside their economic implications, introducing the reader to the contemporary international debate on the topic. Having set the desiderata, the second part proceeds with the comparative analysis of Greek, German and UK law - jurisdictions that have recently reformed their provisions on shareholder protection - examining not only the law on derivative actions and their Greek counterpart remedy but also mechanisms of shareholder protection that do, or could, assume functions similar to those of the derivative action. By critically assessing the merits and failures of the respective UK, German and Greek shareholder protection laws, the book then proceeds to offer (in Part III) a model framework of shareholders' derivative litigation for jurisdictions considering reform. Written in an accessible format, it will be an invaluable resource for anyone interested in this important aspect of company law and corporate governance.

Economic Inequality, Neoliberalism, and the American Community College - Patrick Sullivan 2017-05-11

This book aims to deepen public understanding of the community college and to challenge our longstanding reliance on a deficit model for defining this important, powerful, and transformative institution. Featuring a unique combination of data and research, Sullivan seeks to help redefine, update, and reshape public perception about community colleges. This book gives serious attention to student voices, and includes narratives written by community college students about their experiences attending college at an open admissions institution. Sullivan examines the history of the modern community college and the economic model that is driving much of the current discussion in higher education today. Sullivan argues that the community college has done much to promote social justice and economic equality in America since the founding of the modern community college in 1947 by the Truman Commission.

Quest for Inclusive Growth in Bangladesh - Muhammed Muqtada 2020-11-22

This book offers a selection of intensely researched essays focused on the critical planning objectives and policy priorities that would enhance the promotion of inclusive growth in a developing country. It has taken Bangladesh as the case study. It argues for rethinking of traditional policies and provides arguments and ways to reorient these toward inclusive growth and better social inclusion. These involve a dedicated focus on employment and inclusion in the design of monetary and fiscal policies, trade and industrial policies, policies toward rural non-farm employment, social protection and safety net strategy and the nature of institutional and governance reforms which are imperative for ensuring inclusive growth. The studies included in the book were prepared before or at the onset of the ongoing COVID-19 pandemic and the unfolding economic crisis; yet they provide cursory observations on its likely impact, and underscore how the stated principles and policies of an inclusive growth strategy have become even more significant in the present situation. Bangladesh has been growing respectably during the past decade and a half and has arguably shown strong progress in several social indicators. However, inequality and vulnerability are rising alarmingly, and the economy is beset with high levels of corruption, as well as with various other governance deficits

that can adversely affect future growth and social inclusion. The book provides a critical assessment of how far growth in Bangladesh has been inclusive, both over time, and in comparison to selected South and Southeast Asian countries. It constructs a specific 'inclusive growth index' with reference to what the study considers as the significant goals and pillars of inclusive growth. Bangladesh is not the only developing country that is faced with the arduous task of tackling unbalanced economic growth and of implementing the 2030 Agenda. Rising vulnerability, inequality, disappointing job growth and poor governance are also major challenges to inclusive growth for many countries in the Global South. Therefore, the appeal of this book extends well beyond the borders of Bangladesh and the South Asian region. Corresponding to SDG 8, the book is aimed at academia, researchers, policymakers, civil society leaders as well as other national and international development practitioners with an avid interest in issues concerning growth with equity, and in sync with the 2030 Agenda for Sustainable Development. In addition, the book is a valuable resource for interested students of disciplines related to economics and development policy.

Oswaal CBSE Accountancy, English Core, Business Studies & Economics Class 11 Sample Question Papers + Question Bank (Set of 8 Books) (For 2023 Exam) - Oswaal Editorial Board 2022-11-02

CBSE Sample Paper Class 11 Accountancy, English Core, Business Studies & Economics for Exams 2022-2023 is one of the best CBSE Reference Books for Class 11 exams 2022-23. It includes 10 Sample Papers which gets further divided into comprises 5 solved and 5 self-assessment papers for out-and-out preparation for better results. This best CBSE Reference Books for Class 11 exams 2022-23 is designed strictly as per the latest CBSE sample paper guidelines and marking schemes released CBSE officials. CBSE Sample Paper Class 11 Accountancy, English Core, Business Studies & Economics Exams 2022-2023 contain the latest solved CBSE sample papers for 2023 exams with marking schemes to help students get familiar with the exam pattern for comprehensive learning. To make learning simpler for CBSE

class 11 students, 5 CBSE Sample Question Papers with high percentage to appear in exam are included in this best CBSE Reference Books for Class 11 exams 2022-23. It include enhanced learning tools such as CBSE Exam 2023 Sample Paper Analysis chart, along with On-Tips Notes and Revision Notes for robust preparation. This best CBSE Reference Books for Class 11 exams 2022-23 contains valuable Mind Maps & Mnemonics which comes with 500+ concepts for blended learning. CBSE Sample Paper Class 11 Accountancy, English Core, Business Studies & Economics Exams 2022-2023 includes 200+MCQs and Objective Type Questions for thorough practice to best results in CBSE class 11 exams 2023. While going through this best CBSE Reference Books for Class 11 exams 2022-23, you need to align questions according to their difficulty level. It's believed to be the best way to understand your strengths and weaknesses while solving CBSE Sample Paper Class 11. With the best CBSE Sample Paper Class 11 Accountancy, English Core, Business Studies & Economics Exams 2022-2023, getting familiar with the areas that need your focus and the areas which are your strength becomes easier.

The Meritocracy Trap - Daniel Markovits
2020-09-08

A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal - that social and economic rewards should follow achievement rather than breeding - reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions.

Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw

their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When The Meritocracy Trap reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

Contested Cities and Urban Activism Ming Yip 2018-10-13

This edited volume advances our understanding of urban activism beyond the social movement theorization dominated by thesis of political opportunity structure and resource mobilization, as well as by research based on experience from the global north. Covering a diversity of urban actions from a broad range of countries in both hemispheres as well as the global north and global south, this unique collection notably focuses on non-institutionalised or localised urban actions that have the potential to bring about radical structural transformation of the urban system and also addresses actions in authoritarian regimes that are too sensitive to call themselves "movement". It addresses localized issues cut off from international movements such as collective consumption issues, like clean water, basic shelter, actions against displacement or proper venues for street vendors, and argues that the integration of the actions in cities in the global south with the specificity of their local social and political environment is as pivotal as their connection with global movement networks or international NGOs. A key read for researchers and policy makers cutting across the fields of urban sociology, political science, public policy, geography, regional studies and housing studies, this text provides an interdisciplinary and international perspective on 21st century urban

activism in the global north and south.

Human Development Report 2016 - United Nations Development Programme (UNDP) 2017-03-21

This report focuses on how human development can be ensured for everyone, now and in future. It starts with an account of the hopes and challenges of today's world, envisioning where humanity wants to go. This vision draws from and builds on the 2030 Agenda and the Sustainable Development Goals. It explores who has been left behind in human development progress and why. It argues that to ensure that human development reaches everyone, some aspects of the human development framework and assessment perspectives have to be brought to the fore. The Report also identifies the national policies and key strategies to ensure that will enable every human being achieve at least basic human development and to sustain and protect the gains.

Cheating - Deborah L. Rhode 2017-10-18

Cheating is deeply embedded in everyday life. The costs of the most common forms of cheating total close to a trillion dollars annually. Part of the problem is that many individuals fail to see such behavior as a serious problem. "Everyone does it" is a common rationalization, and one that comes uncomfortably close to the truth. That perception is also self-perpetuating. The more that individuals believe that cheating is widespread, the easier it becomes to justify. Yet what is most notable about analysis of the problem is how little there is of it. Whether or not Americans are cheating more, they appear to be worrying about it less. In *Cheating*, eminent legal scholar Deborah L. Rhode offers the only recent comprehensive account of cheating in everyday life and the strategies necessary to address it. Because cheating is highly situational, Rhode drills down on its most common forms in sports, organizations, taxes, academia, copyright infringement, marriage, and insurance and mortgages. *Cheating* also reviews strategies necessary to address the pervasiveness and persistence of cheating in these contexts. We clearly need more cultural reinforcement of ethical conduct. Efforts need to begin early, with values education by parents, teachers, and other role models who can display and reinforce moral behaviors. Organizations

need to create ethical cultures, in which informal norms, formal policies, and reward structures all promote integrity. People also need more moral triggers that remind them of their own values. Equally important are more effective enforcement structures, including additional resources and stiffer sanctions. Finally, all of us need to take more responsibility for combatting cheating. We need not only to subject our own conduct to more demanding standards, but also to assume a greater obligation to prevent and report misconduct. Sustaining a culture that actively discourages cheating is a collective responsibility, and one in which we all have a substantial stake.

The European Banking Union and Constitution
Stefan Grundmann 2019-01-24

In 2012, at the height of the sovereign debt crisis, European decision makers pushed for developing an 'ever closer union' with the formation of a European Banking Union (BU). Although it provoked widespread debate, to date there has been no coherent discussion of the political and constitutional dimensions of the European Banking Union. This important new publication fills this gap. Drawing on the expertise of recognised experts in the field, it explores banking union from legal, economic and political perspectives. It takes a four-part approach. Firstly, it sets the scene by examining the constitutional foundations of banking union. Then in parts 2 and 3, it looks at the implications of banking union for European integration and for democracy. Finally it asks whether banking union might be more usefully regarded as a trade-off between integration and democracy. This is an important, timely and authoritative collection.

Achieving Workers' Rights in the Global Economy - Richard Appelbaum 2016-05-19

The world was shocked in April 2013 when more than 1,100 garment workers lost their lives in the collapse of the Rana Plaza factory complex in Dhaka. It was the worst industrial tragedy in the two-hundred-year history of mass apparel manufacture. This so-called accident was, in fact, just waiting to happen, and not merely because of the corruption and exploitation of workers so common in the garment industry. In *Achieving Workers' Rights in the Global Economy*, Richard P. Appelbaum and Nelson

Lichtenstein argue that such tragic events, as well as the low wages, poor working conditions, and voicelessness endemic to the vast majority of workers who labor in the export industries of the global South arise from the very nature of world trade and production. Given their enormous power to squeeze prices and wages, northern brands and retailers today occupy the commanding heights of global capitalism. Retail-dominated supply chains—such as those with Walmart, Apple, and Nike at their heads—generate at least half of all world trade and include hundreds of millions of workers at thousands of contract manufacturers from Shenzhen and Shanghai to Sao Paulo and San Pedro Sula. This book offers an incisive analysis of this pernicious system along with essays that outline a set of practical guides to its radical reform. Contributors: Mark Anner, Penn State University; Richard P. Appelbaum, University of California, Santa Barbara; Jennifer Bair, University of Colorado Boulder; Renato Bignami, labor inspector, Brazil; Jeremy Blasi, UNITE HERE Local 11, Los Angeles, and Penn State; Anita Chan, Australian National University; Jenny Chan, University of Oxford; Jill Esbenshade, San Diego State University; Gary Gereffi, Duke University; Jeff Hermanson, International Union League for Brand Responsibility; Jason Kibbey, Sustainable Apparel Coalition; Nelson Lichtenstein, University of California, Santa Barbara; Xubei Luo, World Bank; Anne Caroline Posthuma, International Labour Organization; Scott Nova, Worker Rights Consortium; Ngai Pun, Hong Kong Polytechnic University; Katie Quan, University of California, Berkeley; Brishen Rogers, Temple University; Robert J. S. Ross, Clark University; Mark Selden, Cornell University and New York University; Chris Wegemer, Santa Barbara, California

Oswaal CBSE Accountancy, English Core, Business Studies & Economics Class 12 Sample Question Papers + Question Bank (Set of 8 Books) for 2023 Board Exam (based on CBSE Sample Paper released on 16th September) - Oswaal Editorial Board

CBSE Sample Paper Class 12 Accountancy, English Core, Business Studies & Mathematics 2022-2023 when practised with focus and precision will produce desired results. When the students practice with this best CBSE Reference Book for Class 12 Accountancy, English Core, Business Studies & Mathematics board exam for a considerable amount of time then they are sure to score highest marks.

Collective Redress and EU Competition Law - Eda Şahin 2018-12-13

Exploring obstacles to effective compensation of victims of competition infringements, this book categorises the types of victims harmed and the

types of losses arisen from these infringements to identify to what extent there is a need for enhanced private competition law enforcement in the European Union (EU) and the best way to address this need. It shows that there is a genuine need for facilitating consumer damages actions and that consumer claims are the only claims that can be pursued in a collective redress action. In order to compensate consumers and overcome barriers to effective enforcement of their right to damages, it structures a collective redress action for consumers by considering the following elements: i. the formation of the group, ii. the type of representative party iii. funding mechanisms and iv. calculation and distribution of damages.

Comparisons in Economic Thought - Stavros A. Drakopoulos 2016-05-26

The idea of comparing rewards with others has a long and persistent presence in the social sciences, and can be found in many psychological, social and managerial theories. In economics, this idea can be traced back through the works of a substantial number of eminent thinkers, from Genovesi and Hume, to Smith, Ricardo, Marx, and Mill, through to Veblen, Pigou, and Keynes. In the last two decades the notion of social comparisons has started to appear more frequently in economic literature, especially in the subfield of happiness research. There are also signs that the notion has

resurfaced in some strands of literature such as positional concerns, social identity models and social capital theory. Comparisons in Economic Thought offers a uniquely comprehensive account of how social comparisons have featured in the history of economic thought. This book provides an assessment as to why social comparisons have been dismissed by mainstream economists and considers their current and future usefulness. This volume is suitable for those who are interested and study history of economic thought, economic methodology and History of Consumer Theory, as well as Rational Choice Theory.

Alternative Assets and Cryptocurrencies -

Christian Hafner 2019-07-26

Alternative assets such as fine art, wine, or diamonds have become popular investment vehicles in the aftermath of the global financial crisis. Correlation with classical financial markets is typically low, such that diversification benefits arise for portfolio allocation and risk management. Cryptocurrencies share many alternative asset features, but are hampered by high volatility, sluggish commercial acceptance, and regulatory uncertainties. This collection of papers addresses alternative assets and cryptocurrencies from economic, financial, statistical, and technical points of view. It gives an overview of their current state and explores their properties and prospects using innovative approaches and methodologies.

Deepening Neoliberalism, Austerity, and Crisis - Julien Mercille 2015-07-07

From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution.

The SAGE Encyclopedia of Economics and Society - Frederick F. Wherry 2015-09-01

Economics is the nexus and engine that runs society, affecting societal well-being, raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly. Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world. From a

household budget to international trade, economics ranges from the micro- to the macro-level. It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia, which will explicitly approach economics through varied disciplinary lenses. Although there are encyclopedias of covering economics (especially classic economic theory and history), the SAGE Encyclopedia of Economics and Society emphasizes the contemporary world, contemporary issues, and society. Features: 4 volumes with approximately 800 signed articles ranging from 1,000 to 5,000 words each are presented in a choice of print or electronic editions Organized A-to-Z with a thematic Reader's Guide in the front matter groups related entries Articles conclude with References & Future Readings to guide students to the next step on their research journeys Cross-references between and among articles combine with a thorough Index and the Reader's Guide to enhance search-and-browse in the electronic version Pedagogical elements include a Chronology of Economics and Society, Resource Guide, and Glossary This academic, multi-author reference work will serve as a general, non-technical resource for students and researchers within social science programs who seek to better understand economics through a contemporary lens.

State Capitalism - Joshua Kurlantzick 2016-03-08

The end of the Cold War ushered in an age of American triumphalism best characterized by the "Washington Consensus:" the idea that free markets, democratic institutions, limitations on government involvement in the economy, and the rule of law were the foundations of prosperity and stability. The last fifteen years, starting with the Asian financial crisis, have seen the gradual erosion of that consensus. Many commentators have pointed to the emergence of a powerful new rival model: state capitalism. In state capitalist regimes, the government typically owns firms in strategic industries. Not beholden to private-sector shareholders, such firms are allowed to operate with razor-thin margins if the state deems them strategically important. China, soon to be the world's largest economy, is the best known state capitalist regime, but it is hardly the only one. In State

Capitalism, Joshua Kurlantzick ranges across the world--China, Thailand, Brazil, Russia, South Africa, Turkey, and more--and argues that the increase in state capitalism across the globe has, on balance, contributed to a decline in democracy. He isolates some of the reasons for state capitalism's resurgence: the fact that globalization favors economies of scale in the most critical industries, and the widespread rejection of the Washington Consensus in the face of the problems that have plagued the world economy in recent years. That said, a number of democratic nations have embraced state capitalism, and in those regimes, state-backed firms like Brazil's Embraer have enjoyed considerable success. Kurlantzick highlights the mixed record and the evolving nature of the model, yet he is more concerned about the negative effects of state capitalism. When states control firms, whether in democratic or authoritarian regimes, the government increases its advantage over the rest of society. The combination of new technologies, the perceived failures of liberal economics and democracy in many developing nations, the rise of modern kinds of authoritarians, and the success of some of the best-known state capitalists have created an era ripe for state intervention. State Capitalism offers the sharpest analysis yet of what state capitalism's emergence means for democratic politics around the world.

The Images of the Consumer in EU Law - Dorota Leczykiewicz 2016-01-28

This book consists of contributions exploring from different perspectives the 'images' of the consumer in EU law. The images of the consumer form the foundation for various EU policies, more or less directly oriented towards the goal of consumer protection. The purpose of the volume is to establish what visions of the consumer there are in different contexts of EU law, whether they are consistent, and whether EU law's engagement with consumer-related considerations is sincere or merely instrumental to the achievement of other goals. The chapters discuss how consumers should be protected in EU contract, competition, free movement and trade mark law. They reflect on the limits of the consumer empowerment rationale as the basis for EU consumer policy. The chapters look also at the variety of concerns consumers might

have, including the cost of goods and services, access to credit, ethical questions of consumption, the challenges of excessive choice and the possibility to influence the content of regulatory measures, and explore the significance of these issues for the EU's legislative and judicial process.

Rankings and the Reshaping of Higher Education - Ellen Hazelkorn 2015-03-23

University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers and scholars.

The Uses of Social Investment - Anton Hemerijck 2017-05-26

The Uses of Social Investment provides the first study of the welfare state, under the new post-crisis austerity context and associated crisis management politics, to take stock of the limits and potential of social investment. It surveys the emergence, diffusion, limits, merits, and politics of social investment as the welfare policy paradigm for the 21st century, seen through the lens of the life-course contingencies of the competitive knowledge economy and modern family-hood. Featuring contributions from leading scholars in the field, the volume revisits the intellectual roots and normative foundations of social investment, surveys the criticisms that have leveled against the social investment perspective in theory and policy practice, and presents empirical evidence of social investment progress together with novel research methodologies for assessing socioeconomic 'rates of return' on social investment. Given the progressive, admittedly uneven, diffusion of the social investment policy priorities across the globe, the volume seeks to address the pressing political question as to whether the social investment turn is able to withstand the fiscal austerity backlash that has re-emerged in the aftermath of the global financial crisis.

Japanese Political Economy Revisited - David Chiavacci 2020-11-25

During the last 30 years, the Japanese political economy system has experienced significant changes that are usually not well understood or

analysed because of their complexity and contradictions. This book provides new analyses and insights on the process of evolving Japanese political economy including Japan's current economic policy known as Abenomics. The first three chapters look at evolutions at the corporate level, characterised in recent years by increasing firm heterogeneity. The authors apply theoretically driven analyses to the complex subject of corporate governance, human resource management and corporate reporting by discussing new developments in context of their economic opportunities as well as of their institutional contradictions with continuities in Japanese business practices. The second group of chapters deals with institutional changes and evolving economic reforms on the macro level of political economy. The two chapters focus on the financial system regulation and economic growth policies as two central elements of Japan's political economy and key drivers in the evolution of its economy. Their analysis allows us to better understand the interplay between reforms and change in consumption credit and to reinterpret Abenomics as a manifestation of ongoing contradictions within the Japanese political economy. The chapters were originally published in a special issue in Japan Forum.

Strangers in Their Own Land - Arlie Russell Hochschild 2016-09-06

In *Strangers in Their Own Land*, the renowned sociologist Arlie Hochschild embarks on a thought-provoking journey from her liberal hometown of Berkeley, California, deep into Louisiana bayou country—a stronghold of the conservative right. As she gets to know people who strongly oppose many of the ideas she famously champions, Hochschild nevertheless finds common ground and quickly warms to the people she meets—among them a Tea Party activist whose town has been swallowed by a sinkhole caused by a drilling accident—people whose concerns are actually ones that all Americans share: the desire for community, the embrace of family, and hopes for their children. *Strangers in Their Own Land* goes beyond the commonplace liberal idea that these are people who have been duped into voting against their own interests. Instead, Hochschild finds lives ripped apart by stagnant wages, a loss of home, an elusive American dream—and political

choices and views that make sense in the context of their lives. Hochschild draws on her expert knowledge of the sociology of emotion to help us understand what it feels like to live in "red" America. Along the way she finds answers to one of the crucial questions of contemporary American politics: why do the people who would seem to benefit most from "liberal" government intervention abhor the very idea?

2014-2015 Global Food Policy Report - International Food Policy Research Institute (IFPRI) 2015-03-18

This 2014-2015 Global Food Policy Report is the fourth in an annual series that provides a comprehensive overview of major food policy developments and events. In this report, distinguished researchers, policymakers, and practitioners review what happened in food policy in 2014 at the global, regional, and national levels, and—supported by the latest knowledge and research—explain why. This year's report is the first to also look forward a year, offering analysis of the potential opportunities and challenges that we will face in achieving food and nutrition security in 2015.

State-permeated Capitalism in Large Emerging Economies - Andreas Nölke 2019-08-30

This book systematically analyzes the economic dynamics of large emerging economies from an extended Comparative Capitalisms perspective. Coining the phrase 'state-permeated capitalism', the authors shift the focus of research from economic policy alone, towards the real world of corporate and state behaviour. On the basis of four empirical case studies (Brazil, India, China, South Africa), the main drivers for robust economic growth in these countries from the 2000s until the 2010s are revealed. These are found, in particular, in mutual institutional compatibilities of 'state-permeated capitalism', in their large domestic markets, and beneficial global economic constellations. Differences in their institutional arrangements are explored to explain why China and India have been more economically successful than Brazil and South Africa. The authors highlight substantial challenges for the stability of state-permeated capitalism and assess the potential future growth, sustainability and likely pitfalls for these large emerging economies. Opening further

avenues for empirical and theoretical research, this book raises questions for the future of the global economic order and should appeal to academics, graduate students and advanced undergraduates in politics, economics, economic sociology and development studies. It should also prove a worthwhile and provocative read for development practitioners and policy-makers.

Urban Knowledge and Innovation Spaces -

Tan Yigitcanlar 2018-10-19

The expansion of knowledge economy, globalization, and economic competitiveness has imparted importance of knowledge and innovation in local economies worldwide. As a result, integrating knowledge generation and innovation considerations in urban planning and development processes has become an important agenda for establishing sustainable growth and long-term competitiveness of contemporary cities. Today, making space and place that concentrate on knowledge generation and innovation is a priority for many cities across the globe. Urban knowledge and innovation spaces are integrated centres of knowledge generation, learning, commercialization and lifestyle. In other words, they are high-growth knowledge industry and worker clusters, and distinguish the functional activity in an area, where agglomeration of knowledge and technological activities has positive externalities for the rest of the city as well as firms located there. Urban knowledge and innovation spaces are generally established with two primary objectives in mind: to be a seedbed for knowledge and technology and to play an incubator role nurturing the development and growth of new, small, high-technology firms; and to act as a catalyst for regional economic development that promotes economic growth and contributes to the development of the city as a 'knowledge or innovative city'. This book contains chapters reporting investigation findings on different aspects of urban knowledge and innovation spaces, such as urban planning and design, innovation systems, urban knowledge management, and regional science. It was originally published as a special issue of the *Journal of Urban Technology*.

Humans as a Service - Jeremias Prassl
2018-04-13

The crowdsourcing of work - the 'gig economy' - has been hailed as a 'sharing' revolution, enabling 'micro-entrepreneurs' to enjoy greater autonomy and flexibility in taking on 'gigs', 'rides', or 'tasks', while customers benefit from the ease, convenience, and affordability of 'work on demand'. Is this the future of work? What are the benefits and challenges of crowdsourced work? Is the gig economy fundamentally different to existing models of work and should it be kept outside the scope of employment law, as many platforms claim? *Humans as a Service* offers an engaging and critical account of the gig economy. It charts the industry's dramatic growth, explores the diverse platforms that comprise it, and describes how they operate. In scrutinising the competing narratives about 'gig' work, the book demonstrates the importance of language: how claims of 'disruptive innovation' and 'micro-entrepreneurship' often obscure the realities of highly precarious work and the strict algorithmic surveillance and control to which workers are subject. And yet, far from being radically new, the book shows that the gig economy is but the latest (and perhaps most extreme) example of labour market practices that have existed for centuries. Turning to how the law should respond to the on-demand economy, it argues that regulators can and must bring this work within the scope of employment law, adapting existing norms where necessary, in order to protect both customers and workers. Finally, it explores the wider implications of the gig economy for markets and consumers, assessing opportunities and challenges - if this is the future of work, how can it be made sustainable?

Welfare and the Great Recession - Stefán Ólafsson 2018-12-20

Welfare and the Great Recession surveys and analyses welfare consequences in the period following the financial crisis in Europe. It investigates how the burdens of the recession were shared between countries, between different socio-economic groups across Europe, and within individual countries, and offers new evidence that demonstrates the importance of the welfare state and government policies in sheltering populations from serious economic contraction. The first comprehensive study of the Great Recession in Europe that focuses on

household level welfare consequences, this edited volume relates financial hardship to institutional characteristics such as welfare regimes, currency regimes, socio-political patterns, affluence levels, public debt, and policy reactions to periods of crisis. It takes into account stimulus versus austerity, the degree of social protection emphasis, the commitment to redistribution, and the significance of activism. Widely comparative, *Welfare and the Great Recession* combines comparisons of thirty countries with an in-depth study of nine country cases to offer various lessons from the crisis experience in Europe and reflect on welfare futures in a globalized crisis-prone environment.

Platform Economics Cristiano Codagnone
2018-11-23

Platform Economics tackles head on the rhetoric surrounding the so-called 'sharing economy' which has muddied public debate and has contributed to a lack of policy and regulatory intervention.

Analytical Gains of Geopolitical Economy
2016-01-19

This book paves the way, advancing Geopolitical Economy as a new approach to the study of international relations and international political economy. Following on from the theoretical limitations exposed in Part I, in this volume the analytical limitations are explored.

20 Plus CBSE Sample Papers Economics Class 12 for 2021 Exam with Reduced Syllabus - Xamidea Editorial Board 2021-01-12
Salient Features of 20+ Sample Papers Economics XII (2020-21) · The book is designed strictly as per the Reduced CBSE Syllabus released on 7th July 2020; Circular No.: Acad - 47/2020. · All Sample Papers are based on the latest CBSE Sample Question Paper 2021 released on 9th October 2020, Circular No.: Acad - 77/2020. · Solution of CBSE Sample Question Paper 2021 and 10 Sample Papers are given. · 10 Unsolved Sample Papers and CBSE Examination Papers 2020 are given for ample practice. Students will be able to access the solutions of these papers by scanning the QR Code given at the back of the book. · Case-based Questions are inserted at proper places in every Sample Papers.

Creating Freedom Raoul Martinez 2017-01-31
The ideal of freedom is at the heart of our

political and economic system. It is foundational to our sense of justice, our way of life, our conception of what it is to be human. But are we free in the way that we think we are? In *Creating Freedom*, Raoul Martinez brings together a torrent of mind-expanding ideas, facts, and arguments to dismantle sacred myths central to our society—myths about free will, free markets, free media, and free elections. From the lottery of our birth to the consent-manufacturing influence of concentrated power, this far-reaching manifesto lifts the veil on the mechanisms of control that pervade our lives. It shows that the more we understand how the world shapes us, the more effectively we can shape the world. A highly original exploration of the most urgent questions of our time, *Creating Freedom* reveals that we are far less free than we like to think, but it also shows that freedom is something we can create together. In fact, our very survival may depend on our doing so.

The Challenge of Democracy: American Government in Global Politics - Kenneth Janda 2017-01-27

Neutrosophic Sets and Systems, Vol. VII - Florentin Smarandache, Mumtaz Ali 2015-02-01
Twelve papers on soft interval-valued neutrosophic rough sets, fuzzy neutrosophic relation equations with geometric programming, rough neutrosophic multi-attribute decision-making, classes of neutrosophic crisp nearly open sets and possible application to GIS topology, neutrosophic probability in physics, and similar topics. Contributors: H. E. Khalid, K. Mondal, S. Pramanik, A. A. Salama, S. Broumi, F. Smarandache, F. Yuhua, M. Ali, M. Shabir, V. Patrascu, S. Ye, J. Fu, J. Ye, A. Hussain, and L. Vladareanu.

Neutrosophic Sets and Systems, vol. 7/2015 - H. E. Khalid

"Neutrosophic Sets and Systems" has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc.

Consumer Involvement in Private EU Competition Law Enforcement - Maria Ioannidou 2015-09-03

Despite the growing importance of 'consumer welfare' in EU competition law debates, there remains a significant disconnect between rhetoric and reality, as consumers and their interests still play only an ancillary role in this area of law. *Consumer Involvement in Private EU Competition Law Enforcement* is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the

field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures, and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, make it invaluable for academics, policy-makers, and practitioners in the field.
