*Ludi crous*- Edward Niedermeyer 2019-08-20  
Tesla is the most exciting car company in a generation . . . but can it live up to the hype? Tesla Motors and CEO Elon Musk have become household names, shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long-established automakers, and, to many industry observers, Tesla is defining the future of the industry. But behind the hype, Tesla has some serious deficiencies that raise questions about its sky-high valuation, and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful, zero-defects approach of other car manufacturers, even as it struggles to mass-produce cars reliably, and with minimal defects. While most car manufacturers struggle with the razor-thin margins of mid-priced sedans, Tesla's strategy requires that the Model 3 finally bring it to profitability, even as the high-priced Roadster and Model S both lost money. And Tesla's approach of continually focusing on the future, even as commitments and deadlines are repeatedly missed, may ultimately test the patience of all but its most devoted fans. In *Ludicrous*, journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day-to-day realities of the company—and the cars it produces. Blending original reporting and never-before-published insider accounts with savvy industry analysis, Niedermeyer tells the story of Tesla as it's never been told before—with clear eyes, objectivity and insight.

*The Dying Detective* Leif G. W. Persson 2017  
"A galvanizing new thriller from the internationally acclaimed and best-selling author--a stand-alone novel that finds legendary Swedish homicide detective Lars Martin Johansson racing against time to solve one final murder. In the National Criminal Investigation Department he was known as "the man who sees around corners." Now Johansson is retired, living in the country, his police days behind him. Or so he thinks. When he finds himself in the hospital having suffered a stroke, tests revealing heart problems as well, the only thing that saves him from despair is his doctor's interest in an unsolved murder case from years before. The victim was a nine-year-old girl, raped and strangled to death, and now Johansson determines to solve the crime despite his condition. He launches an informal investigation from his hospital bed--with the help of Matilda, a wannabe Lisbeth Salander, and Max, an orphan personally invested in child-abuse cases--and begins to draw a web of connections between sex tourism, a deceased opera singer, and a self-made millionaire. And as he draws closer to solving the crime, he finds that he is confronting not just a case, but his own mortality."

**My Bug** - Michael J. Rosen 1999-01-10  
Volkswagon owners get dewey-eyed with nostalgia just thinking about their old Beetles.

This was a vehicle of a thousand stories, and My Bug presents some of the best of them in all their tie-dyed glory. More than forty brand-new stories, poems, anecdotes, and general love letters plus 100 treasured photographs, illustrations, and cartoons from smitten owners recall the highs and lows of the golden days of Beetlemania: water splashing through holes in the rusted floor; trying to make out in the backseat (indeed, trying to make it out of the backseat; the mystery test button on the dash, the secret panel behind the footrest, the battery so conveniently(!) located under the backseat), the scalding blast of sudden heat as the car chugged up an incline. No self-respecting Boomer can forget the Beetle, even if he or she is driving a Beemer today. Now is the time to get out the bellbottoms and put those memory cells in gear. The Bug is back.

Break Free of Dogma - Brian Hines 2019-08-09

Since 2004 the Church of the Churchless blog has been inspiring, entertaining, and educating people who view themselves as spiritual but not religious, an ever-expanding group of truth-seekers. The 93 churchless "sermons" in this book have been selected from the early years of the blog, 2004-06. By turns provocative, heartfelt, challenging, humorous, and philosophical, these blog posts reflect the author's struggle to come to grips with the dogmatism he embraced during 35 years of religiosity. While feeling good about becoming more open-minded, his attempts to salvage the positive aspects of spirituality make for fascinating reading, as do dialogues with visitors to the Church of the Churchless blog.

The Yugo - Jason Vuic 2011-03-01

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and

astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

### **Transient Techniques in Electrochemistry** - Digby Macdonald 2012-12-06

The study of electrochemical reactions by relaxation or transient techniques has expanded rapidly over the last two decades. The impetus for the development of these techniques has been the desire to obtain quantitative data on the rates of "fast" electrochemical processes, including those coupled to homogeneous chemical reactions in solution. This has necessarily meant the development of techniques that are capable of delineating the effects of mass transport and charge transfer at very short times. The purpose of this book is to describe how the various transient techniques may be used to obtain the desired information. Emphasis is placed upon the detailed mathematical development of the subject, since this aspect is the most frequently ignored in other texts in this field. In any relaxation or transient technique for the study of rate processes, it is necessary to disturb the reaction from equilibrium or the steady state by applying a perturbing impulse to the system. The system is then allowed to relax to a new equilibrium or steady-state position, and the transient (i. e. , the response as a function of time) is analyzed to extract the desired kinetic information. In electrochemical studies the heterogeneous rate constants are, in general, dependent upon the potential difference across the interface, so that

the perturbing impulse frequently takes the form of a known variation in potential as a function of time.

The Volkswagen Beetle - Jonathan Wood 2008-03-04

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce

**Unternehmen in der Vertrauenskrise** -  
Dennis Maxeiner 2021-09-01

Ob in der Politik, der Wirtschaft oder den Medien - Vertrauenskrisen umgeben uns alltäglich und sind für die betroffenen Krisenakteure nicht nur reputations-schädigend, sondern auch existenzbedrohend. Im Blickpunkt von Unternehmen in der Vertrauenskrise steht der Diskurs um den so genannten "VW-Dieselskandal". Absolut schlüssig und zugleich bislang kaum umgesetzt wird der Dieselskandal konsequent als Vertrauenskrise betrachtet und sich auf den Versuch des Volkswagenkonzerns konzentriert, Vertrauen in zentralen Absatzmärkten durch strategische öffentliche Kommunikation zurückzugewinnen. Durch Hinzuziehen des Vertrauensbegriffs und der ausdifferenzierten Diskursanalyse wird ein Forschungsdesiderat ausgefüllt, welches die Sprachhandlungsmuster und Strategien von Krisen- und Vertrauenskommunikation nicht nur aufdeckt, sondern gleichzeitig auch ihre kulturellen Spezifika und Bedingungen hervorhebt. Allgemeine Ausgangsthese ist, "dass Krisen nicht nach ein- und derselben Strategie in jedem Land bzw. Kultur gleich bewältigt werden können. Vielmehr könnte die Vermittlung an die Zielgruppe im Rahmen ihrer spezifischen Kultur im jeweiligen Landesmarkt ein entscheidender Faktor sein." Unternehmen in der Vertrauenskrise eröffnet eine spannende interdisziplinäre Perspektive zur Krisenkommunikationsforschung von Organisationen nicht nur aus etablierter soziologisch-wirtschaftswissenschaftlicher Perspektive, sondern führt diesen Forschungsbereich auf einschlägige Weise neu in die Kultur- und Medienwissenschaft ein.
