Iran's Language Planning Confronting

English Abbreviations - Fatemeh Akbari 2020

This book addresses one of the most crucial and common questions confronting planners of languages other than English, that is, how the impacts of global languages on local languages should be dealt with: internationalization or local language promotion? This empirical study examines the implementation of Iran's governmental language and terminology policy to accelerate rarely used abbreviation methods in Persian in order to preserve the language from the extensiveness of borrowed English abbreviated forms. This book provides an in-depth analysis of relevant linguistic theories as well as the structure and social context of the Persian language itself, rather than relying on personal opinions or beliefs either in favour of or against abbreviation. The text appeals to politicians, language planners, terminologists, lecturers, authors and translators of scientific works, especially those who are speakers of languages other than English and seek to promote their local languages. This book is particularly relevant to linguistics students (both undergraduate and graduate students) and language teachers and researchers in the broader areas of language education and curriculum design.

Follow Me - Francesca Riley 2019-03-06

He belongs to the ocean, she belongs to the land. Now they're together, but you can't just walk away from a curse. Someone is going to

have to pay - starting with her. The second instalment of this addictive, mythical love story will leave you breathless. Come on in, the water's fine... Quattro - Jeremy Walton 2020-09-15

The word 'Quattro', chosen by Audi for its pioneering high-performance four-wheel-drive cars, immediately captures glamour and excitement in the minds of all motorsport enthusiasts. This book, written by a leading journalist and Quattro devotee, explores 24 years of factory-prepared and factory-supported Quattros in motorsport, from 1980 to 2004. It is a tale that extends from rough rally stages to race tracks, from pine-fringed ice trails in the depths of European winters to the shimmering heat haze and melting asphalt of Texas street racing. Along the way, it explains how Quattros collected four world rally championships, five American driver/manufacturer crowns and a single-year haul of seven international touring car titles, plus numerous other honours. With the five-cylinder turbocharged Quattro in its

original form, rallying in the early years yielded numerous wins, most of all in 1982, when seven victories in 11 world championship rallies brought the first title. With the short-wheelbase Sport added to Audi's armoury, 1984 became an all-action, all-conquering rallying season with two more world titles won, for drivers (Stig Blomqvist) and manufacturers. Three stunning Pike's Peak wins were achieved in America in successive years, for Michele Mouton (1985), Bobby Unser (1986) and Walter Röhrl (1987). Starting with double championships for the 200 quattro in TransAm (1988) and the 90 Quattro in IMSA (1989), racing success unfolded in America. Exuberant Hans Stuck was the star driver, but consistent team-mate Hurley Haywood captured that 1988 title. Touring car campaigns during the 1990s brought huge success, starting with fearsome V8 Quattro 'racing limos' in Germany. Global achievements followed with A4 Quattros in many national Super Touring series throughout Europe and in Australia, including Frank Biela's 1996 title-winning campaign in Britain. Audi continued to win on track in the new millennium as race versions of the S4 and RS6 captured five SCCA GT Championship titles in America.

I Loved a Rogue Katharine Ashe 2015-02-24

In the third in Katharine Ashe's Prince Catchers series, the eldest of three very different sisters must fulfill a prophecy to discover their birthright. But if Eleanor is destined to marry a prince, why can't she resist the scoundrel who seduced her? She can pour tea, manage a

household, and sew a modest gown. In short, Eleanor Caulfield is the perfect vicar's daughter. Yet there was a time when she'd risked everything for a black-eyed gypsy who left her brokenhearted. Now he stands before her—dark, virile, and ready to escort her on a journey to find the truth about her heritage. Leaving eleven years ago should have given Taliesin freedom. Instead he's returned to Eleanor, determined to have her all to himself, tempting her with kisses and promising her a passion she's so long denied herself. But if he was infatuated before, he's utterly unprepared for what will happen when Eleanor decides to abandon convention—and truly live . . .

Intelligent Projects Using Python - Santanu Pattanayak 2019-01-31

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the

human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

Build an intelligent machine translation system using seq-2-seq neural translation machines
Create AI applications using GAN and deploy smart mobile apps using TensorFlow
Translate videos into text using CNN and RNN
Implement smart AI Chatbots, and integrate and extend them in several domains
Create smart reinforcement, learning-based applications using Q-Learning
Break and generate CAPTCHA using Deep Learning and Adversarial Learning

Who this book is for
This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

The Rediscovered Psychoanalytic Work of Herbert Silberer - Herbert Silberer 2020
"Charles Corliss presents, for the first time, the complete English translation of Herbert Silberer's work on dreams, *Der Traum: Einführung in die Traumpsychologie*. Based on lectures delivered at the majestic Urania Star Observatory in Vienna in 1918, *Der Traum* was a wide-ranging, accessible introduction to the meaning of dreams, with examples from Silberer's practice providing a rich source of illustration. One hundred years after the work was first published in Silberer's native German, Corliss rescues his voice from obscurity and adds key supplementary information to place the work in context"--

The Drilling Manual - Australian Drilling

Industry Training Committee Limited
2015-04-01

An Invaluable Reference for Members of the Drilling Industry, from Owner-Operators to Large Contractors, and Anyone Interested In Drilling Developed by one of the world's leading authorities on drilling technology, the fifth edition of The Drilling Manual draws on industry expertise to provide the latest drilling methods, safety, risk management, and management practices, and protocols. Utilizing state-of-the-art technology and techniques, this edition thoroughly updates the fourth edition and introduces entirely new topics. It includes new coverage on occupational health and safety, adds new sections on coal seam gas, sonic and coil tube drilling, sonic drilling, Dutch cone probing, in hole water or mud hammer drilling, pile top drilling, types of grouting, and improved sections on drilling equipment and maintenance. New sections on drilling applications include underground blast hole drilling, coal seam gas drilling (including well control), trenchless technology and geothermal drilling. It contains heavily illustrated chapters that clearly convey the material. This manual incorporates forward-thinking technology and details good industry practice for the following sectors of the drilling industry: Blast Hole Environmental Foundation/Construction Geotechnical Geothermal Mineral Exploration Mineral Production and Development Oil and Gas: On-shore Seismic Trenchless Technology Water Well The Drilling Manual, Fifth Edition provides you with the most thorough information about the "what," "how," and "why" of drilling. An ideal resource for drilling personnel, hydrologists, environmental engineers, and scientists interested in subsurface conditions, it covers drilling machinery, methods, applications, management, safety, geology, and other related issues.

Theory of Interplanetary Flights - Grigor A. Gurzadyan 2020-12-18

This monograph contains an overview of classical dynamics, providing a solid basis on which to build an understanding of the theory of interplanetary flights. The treatment of the topic is based on both historical and topical perspectives. The theoretical development is illustrated with a number of practical examples,

bringing to bear the author's experience gained from working on the Soviet space programme. Many examples are taken from current space missions - new data is included on the Shoemaker-Levy 9 comet, the flight of ULYSSES over the Solar poles and the Voyager's tour of the solar system.

Toward Speaking Excellence - Dean Papajohn 2005

The new edition of Toward Speaking Excellence addresses the recent changes to the Test of Spoken English (TSE(R)). The text introduces readers to the format of the new TSE(R), typical questions, and scoring criteria. The second edition of Toward Speaking Excellence includes actual student responses that are used or modified to highlight specific characteristics of effective communication. Two complete sample TSE(R)-like tests are included for further practice. Also provided are practice with some of the skills that, while no longer tested on the TSE(R), are key to sounding more native-like and fluent. Toward Speaking Excellence may be used as an individual study tool or as a course text. While the material is directed toward the TSE(R) and SPEAK(R) tests, the communication strategies presented will prepare students for other types of oral exams (including the TAST(R), interviews, and performance tests. Toward Speaking Excellence is a course book but may also be used for individual test-preparation/self-study. Dean Papajohn is a Specialist in Education at the Center for Teaching Excellence, University of Illinois, Urbana-Champaign..

Hard - Donna Alam 2018-04-09

A man walks into a coffee shop and gets offered a job in p0rn.Sounds like the start of a joke,

right? Or every man's fantasy. Until I remember I'm trying to be a good man. A single father. One who doesn't do casual relationships, let alone get paid for sex. But for those curves and that mouth? Any man might change his mind. ~*~ It was an honest mistake . . . I'm new to the "adult entertainment" business. So when I'm sent to interview for our next production, I assume the hottie with the coffee is him. Lord knows he's hot enough to take a starring role. Especially in my fantasies. And with that accent, the aural he gives must be ahh-mazing. I thought a hard man might be fun for the night. But a good man? He might be everything.

Bobcat Fifty Years Marty Padgett 2007

Marking the 50th anniversary of an icon of American industry, this book celebrates a half-century of Bobcat with brilliant images of these quintessentially American machines at work, including historical photographs and diagrams, alongside the full story of the only compact machines that have ever mattered. Often imitated but never equaled, the Bobcat skid-steer loader was born when some hardy souls in the Northern Plains needed a new way to get work done. The pictures in these pages show how the Bobcat loader has been moving American industry ever since, joined over the years by Bobcat excavators and trenchers, utility trucks and more. Bobcat Fifty Years chronicles the changes and innovations that have kept the company at the forefront of the nation's compact machinery makers--from the invention of the

Bob-Tach quick-change attachment system to the introduction of the Big Bob, the Mini-Bob, and the M-700, the first hydrostatic loader of its size. Here, again and again, is evidence of why Fortune Magazine named the Bobcat one of "America's best"--one of the 100 American-made products that represent the best of their kind, anywhere in the world.

Parking Principles; Subject Area: 53 Traffic Control and Operations - National Research Council (U.S.). Highway Research Board 1971
In 1967 FHWA recommended that the HRB committee on parking develop a new publication to update and revise BPR's 1956 publication, "Parking guide for cities." In the present study, the committee attempts to view parking across the entire spectrum from the home to the central business district. Eight major topics are addressed: parking characteristics, zoning, parking programs, parking studies, location and design, operation, parking at transit stations, and curb parking. The three appendices comprise a glossary of terms, legal aspects of parking and public use, and change-of-mode facilities.
