Inside IMSA's Legendary GTP Race Car §. A. Martin, Michael J. Fuller Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched--in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of mechanical "parity"? This was what the International Motor Sports Association's (IMSA) Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993, and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP's flat-out competition among different--and passionate--ideas about what might be the fastest way around a track: the V-12 with its better ground-effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely-restricted ground-effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering free-for-all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings and first-person accounts from the men who built them, Inside IMSA's Legendary GTP Race Cars offers a detailed look at the technology that drove some of the world's most exciting race cars, the likes of which may never be seen again.

Kingdom of Twilight - Steven Uhly 2018-08-07

"POWERFUL AND ORIGINAL." --THE TIMES "REWARDING AND WHOLLY ENGAGING." --HISTORICAL NOVEL SOCIETY "ONE OF THE MOST IMPORTANT AND POWERFUL NOVELS OF RECENT GERMAN

LITERATURE." --DEUTSCHLANDRADIO KULTUR Hypnotically lyrical and intensely moving, Steven Uhly's epic novel set in the wake of World War II is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. Kingdom of Twilight follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it.

A Good Place on the Banks of the Euphrates - Warren Stoddard II 2021-11-23

In the Summer of 2018, Warren Stoddard II traveled to Syria, a country embroiled in a nearly decade-long civil war that had become the twenty-first century's bloodiest conflict. There, he joined the international units of the YPG, a Kurdish militia leading the fight against ISIS. His story, told here through interlaced works of short fiction, memoir, and journal entries, gives an intimate portrait of the lives of internationalists fighting in northeastern Syria during the final days of the YPG's war against the Islamic State: what they left behind, what they hoped to achieve, and what they were willing to sacrifice for the freedom of a people and a land that were not their own.

No Birds in Yesterday is a western told in the spirit of Don Quixote. The novella follows Jackson Hunter on the run from the law. Jackson, enamored with the legends of the Old West, fancies himself to be a modern incarnation of the outlaw gunslinger. He breaks away down Highway 90 in the saddle of a Harley, searching for the freedom of the early days. But in this hallowed world of outlaws and gunslingers, Jackson soon finds that the myths we have created in our history and the lives we have believed ourselves to lead must often contend with reality.

Just Needs a Recharge - Rob Siegel 2018-04-24

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows

cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser

and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.
