**Social Multi-Criteria Evaluation for a Sustainable Economy** -

Giuseppe Munda 2007-12-22

One of the main novelties of this book is its establishment of a clear relationship between social and public choice on one hand and multiple criteria decision analysis on the other. This relationship leads to the new concept of Social Multi-Criteria Evaluation (SMCE). SMCE is proposed as a policy framework to integrate different scientific languages, for example, when concerns about civil society and future generations have to be considered along with policy imperatives and market conditions.

**The Five-minute Linguist** - E. M. Rickerson 2012

The Five-Minute Linguist has been a popular introduction to the subject of language because it is succinct, clear, accurate - and fun to read. It is used by beginning students of linguistics, language education and anthropology, and has broad appeal for general readers, people who read for enjoyment as well as knowledge. The book started life as a series of five-minute radio broadcasts and for this reason its conversational style feels more like a series of fireside chats than a regular college textbook. Those radio broadcasts were highly acclaimed and won the 2007 Linguistics, Language, and the Public Award from the Linguistic Society of America. The chapters are short, suitable for browsing or reading on the run. But although it is intentionally light in tone, the book is full of up-to-date information, written by more than 60 experts from around the

world. This expanded second edition of the book is produced under the sponsorship of the Linguistic Society of America and the US National Museum of Language. Praise for this volume: 'An excellent, very accessible, and extremely easy- and fun-to-read introduction to some of the basic questions (and misconceptions) regarding language, language learning, and linguistics. The book clearly meets the editors' intended goals; with each essay, the reader is engaged in a five-minute, light and informal conversation about the passionate topic of language.' Linguist List 23.4805, November 2012 'This book is for anyone who has a question about languages or the nature of language-which means just about all of us. But it's not just a musty academic text for specialists. While written by leading experts on the subject of language, The Five-Minute Linguist is a user-friendly exploration of the basics, a linguistic start-up kit for general readers. It assumes nothing on your part except interest in the subject. Its bite-sized chapters (no more than 3-4 pages each) give authoritative answers to the most frequently asked questions people have about language, and tell the story in a lively and colloquial style. It is a delightful read.' From the Foreword by Bret Lovejoy, Executive Director, American Council on the Teaching of Foreign Language

**Bad Samaritans** - Ha-Joon Chang 2010-08-09

"Lucid, deeply informed, and enlivened with striking illustrations." - Noam Chomsky One economist has called Ha-Joon Chang "the most exciting thinker our profession has turned out in the past fifteen years." With *Bad Samaritans*, this provocative scholar bursts into the debate on globalization and economic justice. Using irreverent wit, an engagingly personal style, and a battery of examples, Chang blasts holes in the "World Is Flat" orthodoxy of Thomas Friedman and other liberal economists who argue that only unfettered capitalism and wide-open international trade can lift struggling nations out of poverty. On the contrary, Chang shows, today's economic superpowers-from the U.S. to Britain to his native Korea-all attained prosperity by shameless protectionism and government intervention in industry. We have conveniently forgotten this fact, telling ourselves a fairy tale about the magic of free trade and-via our proxies such as the World Bank, International Monetary Fund, and World Trade Organization-ramming policies that suit ourselves down the throat of the developing world. Unlike typical economists who construct models of how the marketplace should work, Chang examines the past: what has actually happened. His pungently contrarian history demolishes one pillar after another of free-market mythology. We treat patents and copyrights as sacrosanct-but developed our own industries by studiously copying others' technologies. We insist that centrally planned economies stifle growth-but many developing countries had higher GDP growth before they were pressured into deregulating their economies. Both justice and common sense, Chang argues, demand that we reevaluate the policies we force on nations that are struggling to follow in our footsteps.

**Biological Invasions in Changing Ecosystems** - João Canning-Clode 2015-01-01

When organisms are deliberately or accidentally introduced into a new ecosystem a biological invasion may take place. These so-called 'invasive species' may establish, spread and ecologically alter the invaded community. Biological invasions by animals, plants, pathogens or vectors are one of the greatest environmental and economic threats and, along with habitat destruction, a leading cause of global biodiversity loss. In this book, more than 50 worldwide invasion scientists cover our current understanding of biological invasions, its impacts, patterns and mechanisms in both aquatic and terrestrial systems.

*Achtung-Panzer!* - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armored supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armored vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Carotenoids* - N.I. Krinsky 2012-12-06

In the mid-1960's, scientists working on carotenoids throughout the World agreed to have periodic meetings for the purpose of discussing and disseminating scientific research results concerning all aspects of carotenoids. The meetings were also organized to act as teaching forums for students, and the major scientific results from each meeting were to result in a publication. Each meeting was planned to be International in scope, being held in different locations in the World, and organized by local, recognized carotenoid scientists. The first of the Carotenoid meetings was held in Trondheim, Norway in 1966. Meetings then followed in Las Cruces, New Mexico (1969); Cluj, Roumania (1972); Berne, Switzerland (1975); Madison, Wisconsin (1978); Liverpool, England (1981); and Munich, Federal Republic of Germany (1984). In all of these meetings, the original purposes which stimulated the first meeting were accomplished: scientific discussion, student education and resulting scientific publication. The meetings and the information resulting from them have led to significant advances in carotenoid biochemistry, biology, and chemistry. This publication represents the contributions from a distinguished list of participants. We look forward to the future meetings in this series.
