[Gulf Arabic](#) - Clive Holes 1990

Gulf Arabic is the term used to refer to a number of related dialects which are spoken along the Gulf shore from northern Kuwait to Oman in the south-eastern corner of the Arabian peninsula. The people who live in this area are linked to each other by trading and seafaring traditions which go back many centuries, as well as by the complex tribal structure of Arabia. With the development of education since the second world war, and increasingly close social, political, and developmental ties between Gulf states, a form of dialectal Arabic has evolved which is not closely associated with any one particular state, and which exhibits features common to them all. It is still unmistakably 'Gulf' in its basic pronunciation and morphology, as well as in its basic lexical stock, but its syntax and to some extent lexicon have been influenced by standard Arabic and other Arabic dialects. Clive Holes provides an in-depth description of this educated, pan-Gulf dialect.

**The Fundamentally Simple Logic of Language** - Luis H. González 2021-02-08

The Fundamentally Simple Logic of Language: Learning a Second Language with the Tools of the Native Speaker presents a data-driven approach to understanding how native speakers do not use subject and direct object to process language. Native speakers know who does what in a sentence by applying intuitively two simple inferences that are argued to be part of universal grammar. The book explains and exemplifies these two inferences throughout. These two inferences explain the native speaker's ease of acquisition and use, and answer difficult questions for linguistics (transitivity, case, semantic roles) in such

a way that undergraduate students and second language learners can understand these concepts and apply them to their own language acquisition. While Spanish is used as the primary example, the theory can be applied to many other languages. This book will appeal to teachers and learners of any second language, as well as linguists interested in second language acquisition, in second language teaching, and in argument structure.
