Critical Infrastructure Protection - E. Goetz 2007-11-07

The information infrastructure--comprising computers, embedded devices, networks and software systems--is vital to operations in every sector. Global business and industry, governments, and society itself, cannot function effectively if major components of the critical information infrastructure are degraded, disabled or destroyed. This book contains a selection of 27 edited papers from the First Annual IFIP WG 11.10 International Conference on Critical Infrastructure Protection.

**Flow Measurement Handbook** - R. C. Baker 2016-08-25

Flow Measurement Handbook is a reference for engineers on flow measurement techniques and instruments. It strikes a balance between laboratory ideas and the realities of field experience and provides practical advice on design, operation and performance of flowmeters. It begins with a review of essentials: accuracy, flow, selection and

calibration methods. Each chapter is then devoted to a flowmeter class and includes information on design, application installation, calibration and operation. Among the flowmeters discussed are differential pressure devices such as orifice and Venturi, volumetric flowmeters such as positive displacement, turbine, vortex, electromagnetic, magnetic resonance, ultrasonic, acoustic, multiphase flowmeters and mass meters, such as thermal and Coriolis. There are also chapters on probes, verification and remote data access.

Invisible War - Joy Gordon 2010

The economic sanctions imposed on Iraq from 1990 to 2003 were the most comprehensive and devastating of any established in the name of international governance. In a sharp indictment of U.S. policy, Joy Gordon examines the key role the nation played in shaping the sanctions, whose harsh strictures resulted in part from U.S. definitions of "dual use" and "weapons of mass destruction," and claims that everything from water pipes to child vaccines could produce weapons. Provocative and sure to stir debate, this book lays bare the damage that can be done by unchecked power in our institutions of international governance.
