**Ending Discrimination Against People with Mental and Substance Use Disorders** - National Academies of Sciences, Engineering, and Medicine 2016-09-03

Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

**The Icarus Agenda** - Robert Ludlum 2014-04-29

Colorado Congressman Evan Kendrick is trying to live out his term quietly when a political mole reveals his deepest secret: Kendrick was the anonymous hero who freed the hostages held by Arab terrorists in the American embassy in Masqat, and then silently disappeared. Now, brought into the light, Kendrick is a

target, pursued by the terrorists he once outwitted. Together with the beautiful woman who saved his life, Kendrick enters a deadly arena where the only currency is blood, where frightened whispers speak of violence yet to come, and where the fate of the free world may ultimately rest in the powerful hands of a mysterious figure known only as the Mahdi. Praise for Robert Ludlum and The Icarus Agenda "[Robert] Ludlum is light-years beyond his literary competition in piling plot twist upon plot twist, until the mesmerized reader is held captive. . . . Ludlum pulls out all the stops."—Chicago Tribune "[An] intricate story of conspiracies within conspiracies . . . Once you start reading you just can't stop."—Library Journal "Readers will be hooked."—The New York Times

This classic volume elucidates a simple yet effective means to transform our inner world through spiritual struggle with our soul.

**Islam** - Adeel Zeerak 2012-09-01

One of the largest and fastest-growing religions, Islam is currently practiced by approximately one-fifth of the world's population. Unlike most religions that only consist of acts of worship, rituals, and a set of beliefs, it also offers a just socio-politico-economic system, which is especially important today as we continue to make significant material and scientific progress. However, although it presents real solutions to problems faced by the whole of mankind, factors such as worldwide media propaganda and the current condition of the Muslim community have seriously distorted the public image of Islam. Adeel Zeerak hopes that his book *Islam: A Superior System of Life* will help change all that. He says that after careful study, even those with non-Muslim unprejudiced minds will appreciate the beauty of his religion's teachings. To prove the superiority of Islamic system over other systems, he provides concrete data obtained from authentic sources and refrains from using boastful or exaggerative language. Chapters in *Islam: A Superior System of Life* include: • This is Islam • Characteristics of the Islamic System • Spiritual System • Social System • Economic System • Political System • The Prophet, peace be upon him, the Message, and the Ummah "Despite commendable progress in the field of science and technology, this world is full of evil, exploitation, and injustice," says Zeerak, who believes any effort to find a solution to our problems continually fails because we choose to ignore the light of Divine Guidance. We all know what happened to prophet Noah's people when they rejected this guidance, but we, thankfully, still exist in this world to follow our Lord and accept Islam. Written for the Muslim and non-Muslim, *Islam: A Superior System of Life* is for readers interested in Islam, the prophet Muhammad (PBUH), the Islamic view of women, the concept of Khilafat, Islamic finance, Islamic spirituality, and Islamic history. The author promises that our obedience

to Allah, subhanahu wa-ta'ala, will result in endless favors and blessings both in this world and the hereafter.

Irreversible Damage - Abigail Shrier 2020-06-30

NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES "Irreversible Damage . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts." —Janice Turner, The Times of London Until just a few years ago, gender dysphoria—severe discomfort in one's biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as "transgender." These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans "influencers." Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and "gender-affirming" educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to "detransitioners"—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls' social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier's essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

Li vi ng Beaut i ful-l Pema Chödrön 2019-05-21

Instant bestseller: Buddhist teacher Pema Chödrön shares life-changing practices for living with wisdom, confidence, and integrity amidst confusing situations and uncertain times We live in difficult times. Life so often seems like a turbulent river threatening to drown us and destroy our world. Why, then, shouldn't we cling to the certainty of the comfortable—to our deep-seated habits and familiar ways? Because, Pema Chödrön teaches, that kind of fear-based clinging keeps us from the infinitely more powerful experience of being fully alive. The Buddhist teachings she presents here—known as the "Three Commitments"—provide a treasure trove of wisdom for learning to step right into the unknown, to completely and fearlessly embrace the groundlessness of being human, for people of all faiths. When we do, we begin to see not only

how much better it feels to live an openhearted life, but we find that we begin to naturally and more effectively reach out to help and heal all those around us.

**Provoke** - Geoff Tuff 2021-09-16

Explore a new and effective method for seizing opportunity in the face of uncertainty In Provoke: How Leaders Shape the Future by Overcoming Fatal Human Flaws, renowned strategy consultants and best-selling authors Geoff Tuff and Steven Goldbach deliver an insightful exploration of how people tend to act tentatively in the face of uncertainty and provide the tools we need to do things differently. Tuff and Goldbach offer up a compelling argument for the proposition that taking a "wait and see" approach is the exact opposite of what helps visionary leaders change the world. Drawing on principles from business and behavioral economics, the book shows readers from all walks of life how to provoke action as a mechanism to advance. In this book you'll discover: An overview of the assortment of cognitive biases which tend to restrain and distort leadership decision making in the face of uncertainty How to recognize the 'phase change' that occurs when an uncertainty resolves from being a question of "if" to being a matter of "when" Five different models of provocation which can be used alone or in combination to anticipate, drive through and exit that phase change in a way that creates the future you desire How true "provocateurs" shake the foundations of their industries, firms, sectors, and governments by overcoming their need for certainty before action Perfect for leaders or aspiring leaders in all walks of life where uncertainty abounds—which is to say, almost everywhere —Provoke will become your go-to guide to overcoming those natural human instincts that keep us frozen in place and prevent us from seizing our opportunities.

**Purification of the Heart: Signs, Symptoms and Cures of the Spiritual Diseases of the Heart** - Hamza Yusuf 2012-05-15

This exploration of Islamic spirituality delves into the psychological diseases and cures of the heart. Diseases examined include miserliness, envy, hatred, treachery, rancour, malice, ostentation, arrogance, covetousness, lust, and other afflictions that assail people and often control them. The causes and practical cures of these diseases are discussed, offering a penetrating glimpse into how Islam deals with spiritual and psychological problems and demonstrating how all people can benefit from these teachings.

**A Bad Case of Stripes** - David Shannon 2016-08-30

"What we have here is a bad case of stripes. One of the worst I've ever seen!" Camilla Cream loves lima beans, but she never eats them. Why? Because the other kids in her school don't like them. And Camilla Cream is very, very worried about what other people think of her. In fact, she's so worried that she's about to break out in...a bad case of stripes!

*Si gni ng wi th a Heavy Hand and Heart, Love Mommy* Sondra Torres 2013-03-13

Words from Ms. Torres: "I take my FAS and turn it in to a teaching tool to help others learn what I go through every day of my life." "If one person listens to what I have to say, then I have done my job. This is what I was born to do. I have won many awards for my work. The awards I've won have been great, but my biggest award is knowing that my message is being delivered and knowing that I might be helping so many people and unborn babies. . If I can prevent one more child from this awful syndrome I will be happy. My ultimate goal is to get the word out there that FAS is 100% preventable. I want everyone to know about the effects of alcohol on the fetus. My advice, my plea, is that you PLEASE, PLEASE do not drink while you are pregnant, even if you plan on giving your baby up for adoption. Let your baby fulfil his or her dreams and live a normal life. For all the fathers to be, you play an important role in this too. You must be encouraging and supportive. Staying away from alcohol yourself would be helpful." What others are saying: Thank you for sending your book to me. I read it all, and I wanted to cry. What a wonderful sacrifice you and your family took on. It is wonderful what you have done and how Chanel has grown and turned out to be a wonderful young lady. You are certainly a very special person blessed by God from the beginning. I love you very much. Aunt Gloria "Ms. Torres is a true light in a world that needs more education on Fetal Alcohol Syndrome and its effects on unborn children. She has opened doors that will never be shut. She has just begun to educate the nation on Fetal Alcohol Syndrome." Deborah Thornton, SEDNET Project Mangement "Ms. Torres is the epitome of self-advocacy and embodies strength, resilience, and determination. She is courageous and tireless in her quest to educate others regarding FAS; and is compassionate and determined in her mission to empower and advocate for other young adults with

disabilities.” Barbara Shannon, School Psychologist  
Last night, I received a copy of *Signing with a heavy hand and heart, Love Mommy: A journey through fetal alcohol syndrome* by Mrs Sondra A Torres and Miss Chanel E Torres from Ms. Torres. I opened it and couldn't put it down until I was finished. This story of a young woman living with the effects of fetal alcohol syndrome (a birth defect that is 100% preventable-all pregnant women need to do is not drink when pregnant) is moving, sometimes funny and always inspirational. I quickly grew to care about Chanel and her adoptive family. Ms. Torres creates a vivid picture of what it is like to live with and care for children with special needs. In relatively few words, Torres brings her family to life-its struggles and its joys. The feelings of love and joy are powerfully conveyed while not minimizing the challenges presented in raising a child with FAS. As a teacher and parent I laughed and cried and wished I could meet this brave girl and her loving mother. Torres is compassionate towards all, including birth parents, but my heart breaks for the children who struggle with this disability. It is a daily battle for which there are some effective interventions but no cures. I will say that Ms. Torres left me more hopeful for these children than my experience as a teacher had-her powerful home environment is definitely a plus for Chanel."CHANEL TORRES IS AVAILABLE FOR SPEAKING ENGAGEMENTS TO BOOK THIS SPEAKER FOR A PRESENTATION, PLEASE GO TO [advocatefortheunborn.wordpress.com](http://advocatefortheunborn.wordpress.com)

**Communities in Action** - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the

many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Understanding Racial and Ethnic Differences in Health in Late Life - National Research Council 2004-09-08

As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

**A Crooked Line** - Geoff Eley 2005-10-24

**Agenda to Change Our Condition** - Hamza Yusuf 2008

*Rosie's Daughters* Matilda Butler 2007

In *Rosie's Daughters*, Matilda Butler and Kendra Bonnett have written an inspiring collective memoir of the generation of women who excelled at "firsts." These women, born during World War II, were shaped by and then helped to shape the American historic, economic, political and socio-cultural landscape. They were the pioneers who charted the paths for the Boomer generation. From the vantage point of their sixties, they share their experiences and insights with their own and younger generations. The figurative mother of this generation, Rosie the Riveter, is a mythic figure in our culture, with good reason—she built ships, flew bombers and filled thousands of other essential wartime jobs, upending traditional views of "women's work." When the war was over, however, American industry thanked Rosie and sent her home. Rosie, who had known the economic dislocations of The Depression and the employment and service opportunities of the war period, raised her daughters with a mixed message - stay home as wife and mother - be prepared "in case." *Rosie's Daughters* grew up and flung wide the doors of employment opportunity that Rosie had unlocked. These women can claim more career "firsts" and greater socio-cultural change than any previous generation. Their stories, recounted in *Rosie's Daughters*, show how the post-war education boom, the sexual revolution and the Pill, civil rights and gender equality, the Vietnam War, NOW and consciousness raising, Roe v. Wade, no-fault divorce and other momentous events influenced their lives and shaped their remarkable journeys. The book is a unique combination of personal stories, research, history, photography and the authors' reflections, engagingly written and beautifully presented. This is social history without the turgid prose, a compilation of interviews without the annoying interruption of flow—even a motivational book without the saccharine—in the appealing voice of perceptive authors. *Rosie's Daughters* will make you laugh and occasionally cry as you read the personal struggles and achievements of this remarkable generation of women who continue to influence our world. Learn from the lessons of their lives as you shape your future.

**To Err Is Human** - Institute of Medicine 2000-03-01

Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. *To Err Is Human* breaks the silence that has surrounded medical errors and their consequences—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. *To Err Is Human* asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

**The Comfort Book** - Matt Haig 2021-07-06

An instant New York Times Bestseller! The new uplifting book from Matt Haig, the #1 New York Times bestselling author of *The Midnight Library*, for anyone in search of hope, looking for a path to a more meaningful life, or in need of a little encouragement. Named by *The Washington Post* as one of the best feel-good books of 2021. "It is a strange paradox, that many of the clearest, most comforting life lessons are learnt while we are at our lowest. But then we never think about food more than when we are hungry and we never think about life rafts more than when we are thrown overboard." *THE COMFORT BOOK* is Haig's life raft: it's a collection of notes, lists, and stories written over a span of several years that originally served as gentle reminders to Haig's future self that things are not always as dark as they may seem.

Incorporating a diverse array of sources from across the world, history, science, and his own experiences, Haig offers warmth and reassurance, reminding us to slow down and appreciate the beauty and unpredictability of existence.

**The Second Media Age** - Mark Poster 2018-03-08

This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age".

**Lesson Plan** - William G. Bowen 2016-03-29

Why and how American colleges and universities need to change in order to meet the nation's pressing

needs American higher education faces some serious problems—but they are not the ones most people think. In this brief and accessible book, two leading experts show that many so-called crises—from the idea that typical students are drowning in debt to the belief that tuition increases are being driven by administrative bloat—are exaggerated or simply false. At the same time, many real problems—from the high dropout rate to inefficient faculty staffing—have received far too little attention. In response, William G. Bowen and Michael S. McPherson provide a frank assessment of the biggest challenges confronting higher education and propose a bold agenda for reengineering essential elements of the system to meet them. The result promises to help shape the debate about higher education for years to come. *Lesson Plan* shows that, for all of its accomplishments, higher education today is falling short when it comes to vital national needs. Too many undergraduates are dropping out or taking too long to graduate; minorities and the poor fare worse than their peers, reinforcing inequality; and college is unaffordable for too many. But these problems could be greatly reduced by making significant changes, including targeting federal and state funding more efficiently; allocating less money for "merit aid" and more to match financial need; creating a respected "teaching corps" that would include nontenure faculty; improving basic courses in fields such as math by combining adaptive learning and face-to-face teaching; strengthening leadership; and encouraging more risk taking. It won't be easy for faculty, administrators, trustees, and legislators to make such sweeping changes, but only by doing so will they make it possible for our colleges and universities to meet the nation's demands tomorrow and into the future.

*The Better Angels of Our Nature* Steven Pinker 2012-09-25

Presents a controversial history of violence which argues that today's world is the most peaceful time in human existence, drawing on psychological insights into intrinsic values that are causing people to condemn violence as an acceptable measure.

*Healing Grounds* - Liz Carlisle 2022-03-10

Today, a new generation of farmers are working to heal both the land and agriculture's legacy of racism. In *Healing Grounds*, Liz Carlisle tells the stories of Indigenous, Black, Latinx, and Asian American farmers who are reviving their ancestors' methods of growing food—techniques long suppressed by the industrial food system. This, Carlisle shows, is the true regenerative agriculture: a holistic approach that values diversity in both plants and people. It has the power to combat climate change, but only if we reckon with agriculture's history of oppression. Through rich storytelling, Carlisle lays bare that painful history, while lifting up the voices of farmers who are working to restore our soil, our climate, and our humanity.

*Confessions of an Economic Hit Man* John Perkins 2004-11-09

Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business.

**Crossing the Quality Chasm** - Institute of Medicine 2001-08-19

Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. *Crossing the Quality Chasm* makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers,

and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, *Crossing the Quality Chasm* also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

**Purification of the Heart** - Hamza Yusuf 2004

Afflictions that assail and control people--such as miserliness, envy, treachery, malice, and arrogance--are examined in a study that discusses the causes and cures of these diseases and reveals how Islamic spirituality deals with spiritual and psychological problems. Original.

**The Future of the Public's Health in the 21st Century** - Institute of Medicine 2003-02-01

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. *The Future of the Public's Health in the 21st Century* reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.
