Eruption in the Canyon Andrew Bennett
2021-09-07

A revelatory, fly-on-the-wall collection of photographs and stories documenting Eddie Van Halen at work in his famed but seldom seen 5150 studio, from the 2004 reunion with Sammy Hagar through the 2007 reunion with David Lee Roth. "When kids ask me how it feels to be a rock star, I say, 'I'm not a rock star. I'm not in it for the fame, I'm in it because I like to play.'" Eddie Van Halen A fortuitous call from a stranger in the middle of the night led to a once-in-a-lifetime assignment. The stranger was Eddie Van Halen. The assignment, as Eddie related it, was to "capture the truth. Show people how hard I work, because that's the truth." Having no idea where this would lead or in what form it might be shared, Andrew Bennett spent portions

of the next two years relentlessly documenting everything that occurred inside Eddie's sanctuary: from rehearsals, recording sessions, and revealing conversations, to vicious arguments, a brotherly brawl, and a wild heist attempt in the middle of the night. Bennett memorialized every square foot of that sacred space, every piece of equipment, and every guitar—including Eddie's beloved Frankenstrat. Featuring more than two hundred photographs, and accompanied by intimate reflections on what the author witnessed, *Eruption in the Canyon* presents an incomparable portrait of one of the most revered artists in history.

Avant-Garde Art and Non-Dominant Thought in Postwar Japan - K. Yoshida
2020-11-15

This book offers a reassessment of how "matter" - in the context of art history, criticism, and architecture - pursued a radical definition of "multiplicity", against the dominant and hierarchical tendencies underwriting post-fascist Japan. Through theoretical analysis of works by artists and critics such as Okamoto Taro, Hanada Kiyoteru, Kawara On, Isozaki Arata, Kawaguchi Tatsuo, and Nakahira Takuma, this highly illustrated text identifies formal oppositions frequently evoked in the Japanese avant-garde, between cognition and image, self and other, human and thing, and one and many, in mediums ranging from painting and photography, to sculpture and architecture. In

addition to an "aesthetics of separation" which refuses the integrationist implications of the human, the author proposes the "anthropofugal" - meaning fleeing the human - as an original concept through which to understand matter in the epistemic universe of the postwar Japanese avant-garde. Chapters in this publication offer critical insights into how artists and critics grounded their work in active disengagement, to advance an ethics of nondominance. Avant-Garde Art and Nondominant Thought in Postwar Japan will appeal to students and scholars of Japanese studies, art history, and visual cultures more widely.

Southern Edwardseans - Obbie Tyler Todd
2022-01-17

The founders and forerunners of the Southern Baptist Convention were fundamentally shaped by the thought of Puritan theologian Jonathan Edwards and his theological successors. While Baptists in the antebellum South boasted a different theological pedigree than Presbyterians or Congregationalists, and while they inhabited a Southern landscape unfamiliar to the bustling cities and tall forests of New England, they believed their similarities with Edwards far outweighed their differences. Like Edwards, these Baptists were revivalistic, Calvinistic, loosely confessional, and committed to practical

divinity. In these four things, Southern Edwardseanism lived, moved, and had its being. In the nineteenth-century, when so many Presbyterians scoffed at Edwards's "innovation" and Methodists scorned his Calvinism, Baptists found in Edwards a man after their own heart. By 1845, at the first Southern Baptist Convention, Southern Edwardseans had laid the groundwork for a convention marked by the theology of Jonathan Edwards. *Connectivity and Standard* Daniel Gonneau 1990

Pixel Detectors - Leonardo Rossi 2006-01-18
Pixel detectors are a particularly important class of particle and radiation detection devices. They have an extremely broad spectrum of applications, ranging from high-energy physics to the photo cameras of everyday life. This book is a general purpose introduction into the fundamental principles of pixel detector technology and semiconductor-based hybrid

pixel devices. Although these devices were developed for high-energy ionizing particles and radiation beyond visible light, they are finding new applications in many other areas. This book will therefore benefit all scientists and engineers working in any laboratory involved in developing or using particle detection.

XXXXX - Martin Howse 2006

xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code

listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make

plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy.

Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new

Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer

electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.
