Drugs Affecting Lipid Metabolism - Rodolfo Paoletti 2012-12-06

The recent symposium and the appearance of this new book on Drugs Affecting Lipid Metabolism take place at a very unusual time for the development of this area. After the publication and wide acceptance of the results of the cholestyramine study by the Lipid Clinics in the USA, showing for the first time a direct association between drug induced reduction of plasma levels of total and LDL cholesterol and coronary heart disease in a high risk population, an unparalleled interest in drugs and other procedures able to control plasma cholesterol levels has been activated. Two other significant events occurred during 1986 and 1987: the availability of compact instruments for the immediate determination of total cholesterol in plasma or total blood and the developments of new agents such as the inhibitors of HMG-CoA (hydroxymethyl glutaryl CoA) reductase and ACAT inhibitors, with potentially great effect on plasma lipid levels after oral administration. These new advances, together with the combined efforts of cell biologists and lipoprotein chemists, have set the pace for an exciting period of research and clinical applications of diets and drugs affecting lipids. This volume, which includes the work of many of the leading world laboratories, represents an authoritative and up-to-date appraisal of the status of the art and a stimulus to future research at laboratory and clinical level in an area of opportunity for clinical and preventive medicine.

Das Recht der Bodenabfertigungsdienste auf freien Zugang zu den Flughäfen - Stephanie Dutzke-Wittneben 2006

Bodenabfertigungsdienste an Flughäfen in Europa - Cornelia Odenthal 2019-02-02

Bodenabfertigungsdienste sind ein wesentlicher Erfolgsfaktor in der Wertschöpfungskette von Luftverkehrsgesellschaften. Die Liberalisierung des europäischen Luftverkehrs schloss die Märkte für (luftseitige)

Bodenabfertigungsdienste zunächst nicht ein. Zur stufenweisen Marktöffnung der Abfertigungsdienste hat die Europäische Union 1996 daher die Richtlinie 96/67/EG eingeführt. Die Meinungen über den Erfolg der Richtlinie gehen allerdings auseinander.

Fluggesellschaften bemängeln die halbherzige Umsetzung der Vorgaben, Abfertigungsdienstleister beklagen die negativen Auswirkungen der Deregulierung. Eine Dekade nach ihrer Einführung steht die Richtlinie nun auf dem Prüfstand – mit einer Revision will die Europäische Union den nächsten Schritt zur Liberalisierung der Abfertigungsmärkte einleiten. Cornelia Templin analysiert die Bodenabfertigungsmärkte und stellt die Effekte der Deregulierung an sechs europäischen Hubs vor. Der Regulierungsbedarf wird mit Hilfe wettbewerbstheoretischer Konzepte hergeleitet und durch empirische Untersuchungen mit den realen Gegebenheiten verglichen. Im Anschluss werden Handlungsempfehlungen für weitergehende Deregulierungsschritte abgeleitet. Das Buch wendet sich an Meinungsbildner für die künftige wettbewerbsspolitische Ausgestaltung der Abfertigungsmärkte sowie an Praktiker und Wissenschaftler im Luftverkehrssektor. Interessant ist das Buch ferner für Wirtschaftswissenschaftler mit den Schwerpunkten Wettbewerbspolitik und Verkehrswissenschaften.

Animal and Vegetable Proteins in Lipid Metabolism and Atherosclerosis Michael J. Gibney 1983

Abstract: Nine papers developed from a 1981 international workshop summarize current knowledge of the role of proteins (and amino acids) in lipid metabolism and atherosclerosis for nutritionists, clinicians, and other health professionals. The topics range from studies on lipid metabolism and experimental atherosclerosis in animals (rats, rabbits, swine), to effects of proteins on human serum lipids and lipoproteins. Other papers discuss the effects of soy protein and casein, influences of dietary protein on serum cholesterol, and the immunological aspects of atherosclerosis. The results of these studies indicate that dietary protein can make a significant contribution to atherosclerosis, that soy protein produces lower serum cholesterol levels than casein (the dynamics of which are described), and that diets containing animal protein are generally more cholesterolemic and atherogenic (in rabbits, specifically) than diets containing vegetable protein. The protein effect can be modified by

other dietary components (e.g., fiber, fat). Other findings (e.g., the role of dietary protein in the immunological aspects of atherosclerosis) also are reported. (wz).

Spätantike und Völkerwanderung - Jochen Martin 2010-10-01

"Die dreiteilige Grundkonzeption der Reihe (Darstellung - Grundprobleme und Tendenzen der Forschung - Quellen und Literatur) muss hier nicht diskutiert werden. Das Konzept ist so bestechend und praktikabel, dass sich die Oldenbourg-Reihe seit Langem mühelos gegen andere Studienbuchreihen behauptet, die es mittlerweile bekanntlich in großer Zahl gibt. Neben der konzeptionellen Grundstruktur hat zu dieser Führungsposition der Reihe auch die Tatsache beigetragen, dass es gelungen ist, als Bandautoren durchweg ausgewiesene Fachleute zu gewinnen, denen es eben möglich ist, im Rahmen der engen Umfangsvorgaben eine konzise Gesamtdarstellung und eine auf die wesentlichen Probleme konzentrierte Sichtung der Forschungsdiskussion zu bieten." Rechtliche Grenzen vertraglicher Haftungsausschlüsse und -begrenzungen in B2B-Exportverträgen - Alexander Grieger 2021-05-01

Kaum ein Streit hat die juristische Wirtschaftspraxis so bewegt wie der Disput um die angeblichen Mängel der AGB-Kontrolle im B2B-Bereich. Das vorliegende Werk greift dies in einer praktischen Tiefe auf, die bislang kaum erreicht wurde. Aus dem Blickwinkel des betrieblichen Risikomanagements konzentriert sich die Arbeit auf: - die Darstellung von Rechtsprechung aller Instanzen, um im Raum stehende, angeblich unzureichende Gestaltungsmöglichkeiten insbesondere in Bezug auf Folgeschäden differenziert zu hinterfragen; - die relevanten Gestaltungsspielräume und Empfehlungen, die in der Debatte bislang kaum angesprochen wurden; - die Rechtsprechung, die differenziert nach Massengeschäft und Projektgeschäft, weitaus mehr interessensgerechte Gestaltungsmöglichkeiten bietet als vielfach kolportiert; - einen Vergleich

mit den Grenzen privatautonomer Risikoverlagerungen im Schweizer Recht sowie in den USA. Abschließend wird aus diesen Erkenntnissen mit dem neuartigen Konzept einer Folgeschädenpflichtversicherung ein Vorschlag zur Lösung abgeleitet, der aus Unternehmenssicht praxistauglich und international wettbewerbsfähig wäre und auch rechtssichere Weiterentwicklungen im LegalTech-Bereich fördern würde.

Framing the Early Middle Ages - Chris Wickham 2006-11-30

The Roman empire tends to be seen as a whole whereas the early middle ages tends to be seen as a collection of regional histories, roughly corresponding to the land-areas of modern nation states. As a result, early medieval history is much more fragmented, and there have been few convincing syntheses of socio-economic change in the post-Roman world since the 1930s. In recent decades, the rise of early medieval archaeology has also transformed our source-base, but this has not been adequately integrated into analyses of documentary history in almost any country. In Framing the Early Middle Ages Chris Wickham combines documentary and archaeological evidence to create a comparative history of the period 400-800. His analysis embraces each of the regions of the late Roman and immediately post-Roman world, from Denmark to Egypt. The book concentrates on classic socio-economic themes, state finance, the wealth and identity of the aristocracy, estate management, peasant society, rural settlement, cities, and exchange. These give only a partial picture of the period, but they frame and explain other developments. Earlier syntheses have taken the development of a single region as 'typical', with divergent developments presented as exceptions. This book takes all different developments as typical, and aims to construct a synthesis based on a

better understanding of difference and the reasons for it.

Untersuchung der unterschiedlichen Einflussfaktoren auf den Flugplan und deren Wechselwirkung auf die Produktqualität im Bereich Flugzeugabfertigung (Ground Handling Aircraft) am Flughafen München Frederik Abt 2009-11-02

Inhaltsangabe: Einleitung: Kurzvorstellung des Unternehmens. Allgemeine Informationen: Der internationale Verkehrsflughafen München Franz Josef Strauß wird durch die Flughafen München GmbH (FMG) und seine Tochtergesellschaften betrieben. Eigentümer der FMG sind der Freistaat Bayern mit 51 %, die Bundesrepublik Deutschland mit 26 % sowie die Landeshauptstadt München mit 23 %. Der Flughafen wurde am 17. Mai 1992 in Betrieb genommen, nachdem der alte Stadtflughafen im Münchner Ortsteil Riem an seine Kapazitätsgrenze gestoßen war. Er wurde aus erweiterungstechnischen Gründen und aus Rücksicht zu den dicht besiedelten Gebieten in und um München in das 29 km nordöstlich gelegene Erdinger Moos gebaut. Der Flughafen rangiert, gemessen am Passagieraufkommen, auf Rang 7 der Verkehrsflughäfen in Europa und ist neben Frankfurt am Main die zweite internationale Luftverkehrsdrehscheibe in Deutschland. Im abgelaufenen Jahr 2008 verzeichnete der Flughafen ein Passagieraufkommen von 34.552.189 Menschen bei 432.296 Flugbewegungen und einen Luftfrachtumschlag von 256.757 t. Er besitzt mit seinen zwei parallelen Start- und Landebahnen (Abstand 2300 m) einen Koordinierungseckwert von 90 Flugbewegungen / Stunde und hat somit die größte Kapazität in Deutschland, zumindest was das Bahnsystem angeht. Verkehrszahlen: Der Flughafen ist mit einem durchschnittlichen Wachstum von 7 % (bei Fracht 11 %) einer der am schnellsten wachsenden Luftverkehrsdrehscheiben in Deutschland. Konzernstruktur: Die Flughafen München GmbH hat seit dem 01.01.2005 eine neue Konzernstruktur. Sie wurde im Rahmen des Strategie- und Ergebnisverbesserungsprojektes M-Power eingeführt. Die neue Organisationsstruktur beruht auf einer Aufteilung aller wesentlichen Unternehmensfunktionen wie nachfolgend

dargestellt: in übergreifende Konzernbereiche, in strategisch operative Bereiche und unterstützende Servicebereiche. Während die eigenverantwortlichen Bereiche des Kerngeschäftes am externen Markt operieren und direkt am Kunden auftreten, agieren die Servicebereiche primär intern und stellen den Kerngeschäftsbereichen ihr Know-how und ihre Dienstleistungen zur Verfügung. Die übergreifenden Konzernbereiche wiederum sind für die übergeordnete Steuerung des Konzerns verantwortlich. Die neue FMG-Struktur ist gekennzeichnet durch klare Verantwortlichkeiten sowie ein hohes Maß an Anpassungs- und Veränderungsfähigkeit. Das Hauptaugenmerk der vorliegenden Bachelor Arbeit wird nachfolgend auf dem [...] *Luftverkehr*- Roland Conrady 2019-02-19 Dieses Werk erklärt die Grundstrukturen der Luftverkehrsbranche, stellt Konzepte und Methoden des Airline Managements vor und gibt Einsichten in Marktphänomene und Branchentrends. In der vorliegenden Auflage werden Veränderungen bei Geschäftsmodellen der Airlines, neue Herausforderungen für Flughäfen, veränderte Anforderungen an Umweltschutz, Safety/Security und IT beleuchtet.

In the Words of Wellington's Fighting Cocks - Moisés Gaudêncio 2021-12-22

The literature of the Peninsular War is rich with vivid source material – letters, diaries, memoirs, and dispatches – but most of it was written by British soldiers or by the French and their allies. As a result the history and experience of the Portuguese forces – which by 1812 composed close to half of Wellington's Army – have been seriously under-represented. That is why this pioneering book, which publishes for the first time in English the after-action reports written by the commanders of Portuguese battalions, regiments and brigades, is so important. For these detailed, graphic firsthand accounts give us a fascinating insight into the vital contribution the Portuguese made to the allied army and shed new light on the struggle against the French in the Iberian Peninsula. The authors provide an introduction tracing the history of the Portuguese Army prior to the Salamanca campaign of 1812, while tracking its organizational changes and assignment of

commanders from 1808 to 1814. They include detailed notes on the after-action reports which set them in the context of each stage of the conflict.

Turkish ground handling services firms assesment with neutrosophic multiobjective method - Serhat Aydın

Ground Handling Services (GHSs) contain detailed services for airplanes and air passengers when they remain on the airport. In this paper, GHSs received by disabled air passengers and the service provider firms were focused. Neutrosophic MULTIMOORA, a newly developed method, has been used for evaluation. Three Turkish GHSs firms are evaluated by eight criteria. The weights of evaluation criteria are determined by Analytic Hierarchy Process. Then algorithm of Neutrosophic MULTIMOORA method is applied to the problem and sensitivity analysis is presented. In the end, the conclusion is given. Contribution of this paper to the literature is using of the Neutrosophic MULTIMOORA Method firstly for evaluation of GHSs firms.

European Seaports Law - E. van Hooydonk 2003

In 2001, the European Commission published its so-called Ports Package, a first attempt at developing a European policy for seaports. The Ports Package includes a Directive on Market Access to Port Services, which will influence the port industry thoroughly and lead to fundamental changes in daily port operations. In this volume, academics as well as practising lawyers from France, Ireland, Italy and Belgium describe the legal framework for the several branches of the port sector, recalling the far-reaching practical implications of existing general EU law and discussing the latest versions of the Port Services Directive proposal. Completed by authoritative views from the head of the Commission's ports unit, a specialist MEP, and representatives from both the public and the private port sector, this book offers a fairly complete overview of existing port law as well as the main points of concern in the policy debate. Its purpose is to serve both as a policy background document and as a working tool for public and private port players, as well as for academics and lawyers.

The Mediterranean Diets in Health and Disease - Gene A. Spiller 2012-12-06

It is difficult to find the moment when the idea for a book is first born. For this book, the basic concept was probably born during conversations I had in Parma, Italy, with Dr. Riccardi of the University of Naples and Dr. Jenkins of the University of Toronto (Canada). Later, in a conference room at the University of Verona (Italy) School of Medicine, I had a day-long meeting with Drs. Bosello and Cominacini of the University of Verona, and Drs. Jenkins and Riccardi and their co-workers. After an intense working day, the general plan of this book was completed. The title Mediterranean diets rather than diet was appropriately chosen as there is more than one Mediterranean diet, a point discussed in chapter 1. This chapter focuses on the definition of a Mediterranean diet and no matter what the reader's interest may be, it is imperative that this first chapter be carefully read. We should always remember that there are—from a preventive medicine point of view—good and poor Mediterranean diets. The best example is probably the difference between the high olive oil, high carbohydrate, low meat diet of southern Italy and the high saturated fat, higher meat diets of the northern Italians. Prevalence of disease parallels these differences. Chapter 2 covers some ancient history in an easy-to-read manner that is instructional as well as fascinating even for the nonmedical scientist or the nonhistorian.

Public Health Policy and Ethics - Michael Boylan 2005-02-15

Public Health Policy and Ethics brings together philosophers and practitioners to address the foundations and principles upon which public health policy may be advanced. What is the basis that justifies public health in the first place? Why should individuals be disadvantaged for the sake of the group? How do policy concerns and clinical practice work together and work against each other? Can the boundaries of public health be extended to include social ills that are amenable to group-dynamic solutions? These are some of the crucial questions that form the core of this volume of original essays sure to cause practitioners to engage in a critical re-evaluation of the role of ethics in public health policy. This volume is unique because of its philosophical approach. It develops a theoretical basis for public health and then examines cutting-edge issues of practice that include social and political issues of public health. In this way the book extends the usual purview of public health. Public Health Policy and Ethics is of interest to those working in public health policy, ethics and social philosophy. It may be used as a textbook for courses on public health policy and ethics, medical ethics, social philosophy and applied or public philosophy.

Dynamic Translinear and Log-Domain Circuits - Jan Mulder 2012-12-06

Log-domain and translinear filters provide a competitive alternative to the challenges of ever increasing low-voltage, low-power and high frequency demands in the area of continuous-time filters. Since translinear filters are fundamentally large-signal linear, they are capable of realizing a large dynamic range in combination with excellent tunability characteristics. Large-signal linearity is achieved by exploiting the accurate exponential behavior of the bipolar transistor or the subthreshold MOS transistor. A generalization of the dynamic translinear principle exploiting the square law behavior of the MOS transistor is theoretically possible, but not practically relevant.

Translinear and log-domain filters are based on the dynamic translinear principle, a generalization of the conventional (static) translinear principle. Besides their application for linear filters, dynamic translinear circuits can also be used for the realization of non-linear dynamic functions, such as oscillators, RMS-DC converters and phase-locked loops. Dynamic Translinear and Log-Domain Circuits: Analysis and Synthesis covers both the analysis and synthesis of translinear circuits. The theory is presented using one unifying framework for both static and dynamic translinear networks, which is based on a current-mode approach. General analysis methods are presented, including the large-signal and non-stationary analysis of noise. A well-structured synthesis method is described greatly enhancing the designability of log-domain and translinear circuits. Comparisons are made with respect to alternative analysis and synthesis methods presented in the literature. The theory is illustrated and verified by various examples and realizations. Dynamic Translinear and Log-Domain Circuits: Analysis and Synthesis is an excellent reference for researchers and circuit designers, and may be used as a text for advanced courses on the topic.

America's Forgotten Colony - Michael E. Neagle 2016-12-24

America's Forgotten Colony examines private US citizens' experiences on Cuba's Isle of Pines to show how American influence adapted and endured in republican-era Cuba (1902-58). This transnational study challenges the notion that US territorial ambitions waned after the nineteenth century. Many Americans, anxious about a 'closed' frontier in an industrialized, urbanized United States, migrated to the Isle and pushed for agrarian-oriented landed expansion well into the twentieth century. Their efforts were stymied by Cuban resistance and reluctant US policymakers. After decades of tension, however, a new generation of Americans collaborated with locals in commercial and institutional endeavors. Although they did not wield the same influence, Americans nevertheless maintained a significant footprint. The story of this cooperation upsets prevailing conceptions of US domination and perpetual conflict, revealing that US-Cuban relations at the grassroots were not nearly as adversarial as on the diplomatic level at the dawn of the Cuban Revolution.
