

Alison Botha I Have Life Download

Eventually, you will unquestionably discover a additional experience and ability by spending more cash. nevertheless when? get you give a positive response that you require to get those every needs subsequent to having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will guide you to comprehend even more approaching the globe, experience, some places, subsequently history, amusement, and a lot more?

It is your very own period to show reviewing habit. in the middle of guides you could enjoy now is **alison botha i have life download** below.

I Have Life - Thamm Marianne 2018-06-15

The triumphant story of a woman who refused to become a victim after being raped, stabbed and left for dead. Now an acclaimed film.

Wildlife Disease Ecology - Kenneth Wilson 2019-11-14

Introduces readers to key case studies that illustrate how theory and data can be integrated to understand wildlife disease ecology.

Everything I Ever Needed to Know about Economics I Learned from Online Dating - Paul Oyer 2014-01-07
Conquering the dating market—from an economist’s point of view After more than twenty years, economist Paul Oyer found himself back on the dating scene—but what a difference a few years made. Dating was now dominated by sites like Match.com, eHarmony, and OkCupid. But Oyer had a secret weapon: economics. It turns out that dating sites are no different than the markets Oyer had spent a lifetime studying.

Monster.com, eBay, and other sites where individuals come together to find a match gave Oyer startling insight into the modern dating scene. The arcane language of economics—search, signaling, adverse selection, cheap talk, statistical discrimination, thick markets, and network externalities—provides a useful guide to finding a mate. Using the ideas that are central to how markets and economics and dating work, Oyer shows how you can apply these ideas to take advantage of the economics in everyday life, all around you, all the time. For all online daters—and for anyone else swimming in the vast sea of the information economy—this book uses Oyer’s own experiences, and those of millions of others, to help you navigate the key economic concepts that drive the modern age.

Oaky and the Virus - Athol Williams 2021-01-11

Oaky and the Virus is an educational and fun story about acorns Oaky and Oaket. They learn how to avoid a virus when it comes to their town.

Season of Hope - Alan Hirsch 2005

Offers an insight into the circumstances under which the policies were developed, implemented and reviewed, as well as a study of the outcomes. This book addresses questions such as: How could an organisation with no previous experience of governing accomplish a peaceful transition to democracy? How did they do it and where are they going?

Humor, Seriously Jennifer Aaker 2021-02-02

WALL STREET JOURNAL, LOS ANGELES TIMES, AND USA TODAY BESTSELLER • Anyone—even you!—can learn how to harness the power of humor in business (and life), based on the popular class at Stanford’s Graduate School of Business. Don’t miss the authors’ TED Talk, “Why great leaders take humor seriously,” online now. “The ultimate guide to using the magical power of funny as a tool for leadership and a force for good.”—Daniel H. Pink, #1 New York Times bestselling author of *When and Drive We are living through a period of unprecedented uncertainty and upheaval in both our personal and professional lives. So it should come as a surprise to exactly no one that trust, human connection, and mental well-being are all on the decline. This may seem like no laughing matter. Yet, the research shows that humor and laughter are among the most valuable tools we have at our disposal for strengthening bonds and relationships, diffusing stress and tension, boosting resilience, and performing when the stakes are high. That’s why Jennifer Aaker and Naomi Bagdonas teach the popular course *Humor: Serious Business* at the Stanford Graduate School of Business, where they help some of the world’s most hard-driving, blazer-wearing*

business minds infuse more humor and levity into their work and lives. In *Humor, Seriously*, they draw on findings by behavioral scientists, world-class comedians, and inspiring business leaders to reveal how humor works and—more important—how you can use more of it, better. Aaker and Bagdonas unpack the theory and application of humor: what makes something funny, how to mine your life for material, and simple ways to identify and leverage your unique humor style. They show how to use humor to rebuild vital connections; appear more confident, competent, and authentic at work; and foster cultures where levity and creativity can thrive. President Dwight David Eisenhower once said, “A sense of humor is part of the art of leadership, of getting along with people, of getting things done.” If Dwight David Eisenhower, the second least naturally funny president (after Franklin Pierce), thought humor was necessary to win wars, build highways, and warn against the military-industrial complex, then you might consider learning it too.

Absolute Value Itamar Simonson 2014-02-04

Going against conventional marketing wisdom, *Absolute Value* reveals what really influences customers today and offers a new framework—the Influence Mix, a totally new way of thinking about consumer decision making and marketing, and about developing more effective business strategies. How people buy things has changed profoundly—yet the fundamental thinking about consumer decision-making and marketing has not. Most marketers still believe that they can shape consumers’ perception and drive their behavior. In this provocative book, Stanford professor Itamar Simonson and bestselling author Emanuel Rosen show why current mantras are losing their relevance. When consumers base their decisions on reviews from other users, easily accessed expert opinions, price comparison apps, and other emerging technologies, everything changes. *Absolute Value* answers the pressing questions of how to influence customers in this new age. Simonson and Rosen point out the old-school marketing concepts that need to change and explain how a company should design its communication strategy, market research program, and segmentation strategy in the new environment. Filled with deep analysis, case studies, and cutting-edge research, this forward-looking book provides a totally new way of thinking about marketing.

I Have Life Alison 1998

In this inspiring tale, Alison, the victim of a brutal rape and attempted murder, shares the courage and philosophy that allowed her to turn her tragic experiences into something life-affirming and strong. With bravery and a keen sense of self-awareness, Alison recounts how she was car-jacked at knifepoint, raped, stabbed so many times that the doctors could not count her wounds, and left for dead miles away from her home. As she denied death that night she later denied her assailants the satisfaction of destroying her life by giving voice to her experiences and refusing to be victimized. In terrifying detail Alison describes her thoughts and feelings throughout the attack and shows how attitude, belief, and choice helped her to survive. Contributions from Alison’s family, friends, and the man who saved her from the side of the road add depth to Alison’s harrowing story.

The Bankers' New Clothes Anat Admati 2014-03-23

The past few years have shown that risks in banking can impose significant costs on the economy. Many claim, however, that a safer banking system would require sacrificing lending and economic growth. *The Bankers' New Clothes* examines this claim and the narratives used by bankers, politicians, and regulators to rationalize the lack of reform, exposing them as invalid. Anat Admati and Martin Hellwig argue that we can have a safer and healthier banking system without sacrificing any of its benefits, and at essentially no cost.

to society. They seek to engage the broader public in the debate by cutting through the jargon of banking, clearing the fog of confusion, and presenting the issues in simple and accessible terms.

The No Asshole Rule Robert I. Sutton 2007-02-22

The definitive guide to working with -- and surviving -- bullies, creeps, jerks, tyrants, tormentors, despots, backstabbers, egomaniacs, and all the other assholes who do their best to destroy you at work. "What an asshole!" How many times have you said that about someone at work? You're not alone! In this groundbreaking book, Stanford University professor Robert I. Sutton builds on his acclaimed Harvard Business Review article to show you the best ways to deal with assholes...and why they can be so destructive to your company. Practical, compassionate, and in places downright funny, this guide offers: Strategies on how to pinpoint and eliminate negative influences for good Illuminating case histories from major organizations A self-diagnostic test and a program to identify and keep your own "inner jerk" from coming out The No Asshole Rule is a New York Times, Wall Street Journal, USA Today and Business Week bestseller.

Seven Elements That Have Changed The World - John Browne 2013-04-25

'Fascinating and enjoyable ... enthused with insight' - Brian Cox Uranium, carbon, iron, titanium, gold, silver and silicon - former BP CEO John Browne explains how seven elements are shaping the 21st century, for good and for bad. Humans have put the Earth's resources to extraordinary use, but not always for the benefit of humankind. SEVEN ELEMENTS vividly describes how iron, carbon, gold, silver, uranium, titanium and silicon have shaped the world around us - for good and for bad. This book takes you on an adventure of human passion, ingenuity and discovery, but it is a journey that is far from over: we continue to find surprising new uses for each of these seven key elements. Discover how titanium pervades modern consumer society, how natural gas is transforming the global energy sector and how an innovative new form of carbon could be starting a technological revolution. SEVEN ELEMENTS is a unique mix of science, history and politics, interwoven with the author's extensive personal and professional experience.

Burdened by Race- Mohamed Adhikari 2009

Understanding the process and culture of self-identification

Making and Being - Susan Jahoda 2020-01-23

"Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMDAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educator's today"--Page 4 of cover.

Hometown Killer - Carol J. Rothgeb 2011-01-28

Child Killer Springfield, Ohio was an All-American town. A town rocked in 1992 by the discovery of two adolescent girls, brutally raped and murdered. Investigators soon learned that four local misfits had been accomplices. Yet DNA tests proved that the true culprit was still on the loose. Deadly Deceiver Inexplicably, the four men continued to mislead police throughout the years of the investigation, periodically supplying false clues and leads. While a cold-blooded killer remained at large, 31-year-old Belinda Anderson was raped and murdered, and Helen Preston, 38, was raped, beaten, and left for dead. Not until 1996, when a prostitute managed to survive a terrifying ordeal at the hands of her would-be slayer, were police able to catch the man who'd been stalking Springfield's women and children. Family Man He was William K. Sapp, husband, father of two young boys and a baby girl of his own. Behind his mask of seeming normalcy lay a murderous rage toward women. Here is the startling true story of a town besieged-and of the relentless manhunt that tracked Sapp through the years, finally bringing him to justice. Includes 16 Pages Of Shocking Photos

Pesticidal Plant Philip C. Stevenson 2020-05-27

The global biodiversity and climate emergencies demand transformative changes to human activities. For example, food production relies on synthetic, industrial and non-sustainable products for managing pests, weeds and diseases of crops. Sustainable farming requires approaches to managing these agricultural

constraints that are more environmentally benign and work with rather than against nature. Increasing pressure on synthetic products has reinvigorated efforts to identify alternative pest management options, including plant-based solutions that are environmentally benign and can be tailored to different farmers' needs, from commercial to small holder and subsistence farming. Botanical insecticides and pesticidal plants can offer a novel, effective and more sustainable alternative to synthetic products for controlling pests, diseases and weeds. This Special Issue reviews and reports the latest developments in plant-based pesticides from identification of bioactive plant chemicals, mechanisms of activity and validation of their use in horticulture and disease vector control. Other work reports applications in rice weeds, combination biopesticides and how chemistry varies spatially and influences the effectiveness of botanicals in different locations. Three reviews assess wider questions around the potential of plant-based pest management to address the global challenges of new, invasive and established crop pests and as-yet underexploited pesticidal plants.

A Composer in Africa - Stephanus Muller 2006-01-01

Grové was arguably the first composer to incorporate Black African elements into the fabric of his music, venturing far beyond mere *couleur locale* to forge a creative synthesis of the indigenous and the "Western". His vast oeuvre encompasses every genre, from opera and ballet to chamber music, orchestral works and song. But he is also a fine essayist, and his short fiction has received praise from André P. Brink. This is the first study of its kind to be devoted to a South African composer.

Gruesome - De Wet Potgieter 2015-10-01

In this book, investigative journalist De Wet Potgieter follows the trail of a number of criminals in South Africa's history. These violent crimes, perpetrated from the late 1980s into the new millennium, vary from fanatical far-rightists who killed their innocent countrymen, to assassins who executed high-profile, state-sanctioned murders. He takes the reader behind the scenes of some of the most controversial events in our country and, with his fearless style of writing, pulls you right into the belly of the beast. In *Gruesome*, he shares information that has never before been made public. What really happened on the night of 17 June 1992 in Boipatong? What motivated the horrific attack on Alison Botha? What caused the ostensibly conformist policeman André Stander to become an unscrupulous bank robber? Who was the first person to see the connection between Gert van Rooyen's victims and a probable human-trafficking network? Potgieter relates how, as a journalist, he went about reporting on each of these interesting, gruesome cases. This book takes you back to the bloody newspaper headlines of yesterday.

Negotiating Rationally - Max H. Bazerman 1994-01-01

In *Negotiating Rationally*, Max Bazerman and Margaret Neale explain how to avoid the pitfalls of irrationality and gain the upper hand in negotiations. For example, managers tend to be overconfident, to recklessly escalate previous commitments, and fail to consider the tactics of the other party. Drawing on their research, the authors show how we are prisoners of our own assumptions. They identify strategies to avoid these pitfalls in negotiating by concentrating on opponents' behavior and developing the ability to recognize individual limitations and biases. They explain how to think rationally about the choice of reaching an agreement versus reaching an impasse. A must read for business professionals.

Anthropology of Landscape - Christopher Tilley 2017-02-01

An *Anthropology of Landscape* tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

Autistic Community and the Neurodiversity Movement - Steven K. Kapp 2019-11-07

This open access book marks the first historical overview of the autism rights branch of the neurodiversity movement, describing the activities and rationales of key leaders in their own words since it organized into a unique community in 1992. Sandwiched by editorial chapters that include critical analysis, the book contains 19 chapters by 21 authors about the forming of the autistic community and neurodiversity movement, progress in their influence on the broader autism community and field, and their possible threshold of the advocacy establishment. The actions covered are legendary in the autistic community, including manifestos such as "Don't Mourn for Us", mailing lists, websites or webpages, conferences, issue campaigns, academic project and journal, a book, and advisory roles. These actions have shifted the landscape toward viewing autism in social terms of human rights and identity to accept, rather than as a medical collection of deficits and symptoms to cure.

Preventing Drowning - World Health Organization 2017

"Far too many people around the world know the pain of losing a loved one to drowning. Each year almost 360,000 people die from drowning--over 90% of them in low- and middle income countries. More than half of these deaths are among those younger than 25, with children aged under 5 facing the greatest risk. Drowning is the third leading cause of death worldwide for those aged from 5 to 14. Despite these tragic facts, drowning prevention gets relatively little attention and few resources. There is far more we can do to prevent drowning. Global commitments made as part of the Sustainable Development Goals, for example, cannot be met as long as this preventable cause of death is left largely unchecked. All of us--policymakers, parents, non-profit organizations, businesses and concerned citizens--can help prevent drowning. Explaining how is the goal of this guide. Building on the World Health Organization's 2014 Global report on drowning, the following pages provide practical, step-by-step guidance on how to implement 10 effective measures to prevent drowning. They range from community-based solutions, such as day care for children and barriers controlling access to water, to effective national policies and legislation around water safety, including setting and enforcing boating, shipping and ferry regulations. Data show that all of these solutions can help save lives. The more we work together to implement the measures outlined in this guide, the more lives can be saved. We urge all concerned to adopt as many of the interventions and strategies as their resources will allow, and to protect those most vulnerable without delay."--Page iv.

The Power of Moments - Chip Heath 2017-10-03

The New York Times bestselling authors of *Switch* and *Made to Stick* explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why "we feel most comfortable when things are certain, but we feel most alive when they're not." And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world's youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The *Power of Moments* shows us how to be the author of richer experiences.

The Darkest Night - Ron Franscell 2014-12-09

Casper, Wyoming: 1973. Eleven-year-old Amy Burridge rides with her eighteen-year-old sister, Becky, to the grocery store. When they finish their shopping, Becky's car gets a flat tire. Two men politely offer them a ride home. But they were anything but Good Samaritans. The girls would suffer unspeakable crimes at the hands of these men before being thrown from a bridge into the North Platte River. One miraculously survived. The other did not. Years later, author and journalist Ron Franscell—who lived in Casper at the

time of the crime, and was a friend to Amy and Becky—can't forget Wyoming's most shocking story of abduction, rape, and murder. Neither could Becky, the surviving sister. The two men who violated her and Amy were sentenced to life in prison, but the demons of her past kept haunting Becky...until she met her fate years later at the same bridge where she'd lost her sister.

The Wisdom Codes - Gregg Braden 2021-05-04

The cutting edge of neurolinguistics meets the spiritual wisdom of the ages in a handbook of key words that literally rewire our brains. New discoveries in biology and the neurosciences are revealing how the structure of language—the words we think and speak—can actually change the way the neurons in our brains and hearts connect. But our ancestors understood this connection intuitively, thousands of years ago. They created specific word-patterns to provide comfort, healing, strength, and inner power in difficult times, and they encoded these powerful words in prayers, chants, mantras, hymns, and sacred writings to preserve them for future generations. Now beloved teacher and thought leader Gregg Braden cracks the code and puts these powerful words in your hands. Perfect as a pocket guide, a reference for spiritual study, or a gift to someone you love, this elegant, compact book contains *Wisdom Codes* that cut to the core of life's greatest tests, most challenging demands, and hardest lessons. You'll find chapters devoted to healing from loss and grief, facing your unspoken fears, finding certainty in the face of uncertain choices, and finding forgiveness, as well as ancient parables that offer a "fast track" to unraveling life's deepest mysteries. Each *Wisdom Code*—distilled from a quote, a scripture passage, or a parable—is accompanied by a brief discussion of what the code means, why it's important, and how to apply it in your life.

The Cinema of Attractions Reloaded - Wanda Strauven 2006

Twenty years ago, noted film scholars Tom Gunning and André Gaudreault introduced the phrase "cinema of attractions" to describe the essential qualities of films made in the medium's earliest days, those produced between 1895 and 1906. Now, *The Cinema of Attractions Reloaded* critically examines the term and its subsequent wide-ranging use in film studies. The collection opens with a history of the term, tracing the collaboration between Gaudreault and Gunning, the genesis of the term in their attempts to explain the spectacular effects of motion that lay at the heart of early cinema, and the pair's debts to Sergei Eisenstein and others. This reconstruction is followed by a look at applications of the term to more recent film productions, from the works of the Wachowski brothers to virtual reality and video games. With essays by an impressive collection of international film scholars—and featuring contributions by Gunning and Gaudreault as well—*The Cinema of Attractions Reloaded* will be necessary reading for all scholars of early film and its continuing influence.

Economic Origins of Dictatorship and Democracy - Professor Daron Acemoglu 2006

This book develops a framework for analyzing the creation and consolidation of democracy. Different social groups prefer different political institutions because of the way they allocate political power and resources. Thus democracy is preferred by the majority of citizens, but opposed by elites. Dictatorship nevertheless is not stable when citizens can threaten social disorder and revolution. In response, when the costs of repression are sufficiently high and promises of concessions are not credible, elites may be forced to create democracy. By democratizing, elites credibly transfer political power to the citizens, ensuring social stability. Democracy consolidates when elites do not have strong incentive to overthrow it. These processes depend on (1) the strength of civil society, (2) the structure of political institutions, (3) the nature of political and economic crises, (4) the level of economic inequality, (5) the structure of the economy, and (6) the form and extent of globalization.

Breaking Intergenerational Cycles of Repetition - Pumla Gobodo-Madikizela 2016-01-18

The authors in this volume explore the interconnected issues of intergenerational trauma and traumatic memory in societies with a history of collective violence across the globe. Each chapter's discussion offers a critical reflection on historical trauma and its repercussions, and how memory can be used as a basis for dialogue and transformation. The perspectives include, among others: the healing journey of three generations of a family of Holocaust survivors and their dialogue with third generation German students over time; traumatic memories of the British concentration camps in South Africa; reparations and reconciliation in the context of the historical trauma of Aboriginal Australians; and the use of the arts as a strategy of dialogue and transformation.

Hard Facts, Dangerous Half-Truths, and Total Nonsense - Jeffrey Pfeffer 2006-02-14

The best organizations have the best talent. . . Financial incentives drive company performance. . . Firms must change or die. Popular axioms like these drive business decisions every day. Yet too much common management “wisdom” isn’t wise at all—but, instead, flawed knowledge based on “best practices” that are actually poor, incomplete, or outright obsolete. Worse, legions of managers use this dubious knowledge to make decisions that are hazardous to organizational health. Jeffrey Pfeffer and Robert I. Sutton show how companies can bolster performance and trump the competition through evidence-based management, an approach to decision-making and action that is driven by hard facts rather than half-truths or hype. This book guides managers in using this approach to dismantle six widely held—but ultimately flawed—management beliefs in core areas including leadership, strategy, change, talent, financial incentives, and work-life balance. The authors show managers how to find and apply the best practices for their companies, rather than blindly copy what seems to have worked elsewhere. This practical and candid book challenges leaders to commit to evidence-based management as a way of organizational life—and shows how to finally turn this common sense into common practice.

A World Atlas of Translation - Yves Gambier 2019-02-15

What do people think of translation in the different historical, cultural and linguistic traditions of the world? How many uses has translation been put to? How distant from one another are the concepts of translation found in the different traditions? These are some of the questions A World Atlas of Translation addresses. Its twenty-one reports give us pictures taken from the inside, both from traditions that are well represented in the literature and from the many that (for now) are not. But the Atlas is not content with documenting – no map is this innocent. In fact, the wealth of information collected and made accessible by its reporters can be useful to gauge the dispersion of translation concepts across traditions. As you read its reports, the Atlas will keep asking “How far apart do these concepts look to you?” Finally and more ambitiously, the reports can help us test the hypothesis that a cross-cultural notion of translation exists. In this respect, the Atlas is mostly a proof of concept. It hopes to encourage further fact-based research in quest of a robust and compelling unifying notion of translation.

The External Control of Organizations - Jeffrey Pfeffer 2003

This work explores how external constraints affect organizations and provides insights for designing and managing organizations to mitigate these constraints. All organizations are dependent on the environment for their survival. It contends that it is the fact of the organization's dependence on the environment that makes the external constraint and control of organizational behaviour both possible and almost inevitable. Organizations can either try to change their environments through political means or form interorganizational relationships to control or absorb uncertainty.

Vertebrate Life - F. Harvey Pough 2013

Widely praised for its comprehensive coverage and exceptionally clear writing style, this text explores how the anatomy, physiology, ecology, and behaviour of animals interact to produce organisms that function effectively in their environments and how lineages of organisms change through evolutionary time.

Making Great Strategy - Glenn R. Carroll 2021-01-26

Making strategy requires undertaking major—often irreversible—decisions aimed at long-term success in an uncertain future. All leaders must formulate a clear course of action, yet many lack confidence in their ability to think systematically about their strategy. They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts. Making Great Strategy resolves these challenges with a straightforward, readily applicable framework. Jesper B. Sørensen and Glenn R. Carroll show that one factor underlies all sustainably successful strategies: a logically coherent argument that connects resources, capabilities, and environmental conditions to desired outcomes. They introduce a system for formulating and managing strategy through a set of three core activities: visualization, formalization and logic, and constructive argumentation. These activities can be implemented in any organization and are illustrated through examples and case studies from well-known companies such as Apple, Walmart, and The Economist. This book shows that while great strategic thinking is hard, it is not a mystery. Widely applicable and relevant for managers and leaders at all levels, especially executive teams charged with setting the course of their organizations, it is essential reading for anyone faced with practical

problems of strategic management.

Hidden Value - Charles A. O'Reilly 2000

Publisher Fact Sheet Uncover how the best companies win, not by acquiring the right people, but by building the right organization.

Theorising the Practice of Community Development - Peter Westoby 2016-02-17

Based on 25 years of community development practice, six of which have been lived in South Africa, Peter Westoby’s ground-breaking monograph moves away from dominant normative accounts of community development to provide an appreciative and critical analysis of concrete examples of community development theory and practice. By examining community development stories as experienced on the ground, Westoby is able to show how the poor are organising themselves using various forms of community development as well as demonstrating how the state and non-state actors are attempting to organise, engage or accompany the poor through community development. The book also breaks new ground in theorising the practice of community development, drawing inductively from the stories analysed. The diversity of South African contexts and the proliferation of different kinds of community practice, make this a hugely difficult task. Despite this, Westoby argues it is one worth undertaking given the seriousness of the challenges facing the poor and progressive social change agents within South Africa. In this undertaking, Westoby draws upon a unique analytical framework to help illuminate current community development policy and programme challenges, along with practice dilemmas and wisdom.

Virtual Reality - Melanie Chan 2014-01-16

The idea of virtual realities has a long and complex historical trajectory, spanning from Plato's concept of the cave and the simulacrum, to artistic styles such as Trompe L'oeil, and more recently developments in 3D film, television and gaming. However, this book will pay particular attention to the time between the 1980s to the 1990s when virtual reality and cyberspace were represented, particularly in fiction, as a wondrous technology that enabled transcendence from the limitations of physical embodiment. The purpose of this critical historical analysis of representations of virtual reality is to examine how they might deny, repress or overlook embodied experience. Specifically, the author will contend that embodiment is a fundamental aspect of immersion in virtual reality, rather than something which is to be transcended. In this way, the book aims to challenge distorted ideas about transcendence and productively contribute to debates about embodiment and technology.

The Next Convergence - Michael Spence 2011-05-10

A Washington Post Notable Nonfiction Book for 2011 With the British Industrial Revolution, part of the world's population started to experience extraordinary economic growth—leading to enormous gaps in wealth and living standards between the industrialized West and the rest of the world. This pattern of divergence reversed after World War II, and now we are midway through a century of high and accelerating growth in the developing world and a new convergence with the advanced countries—a trend that is set to reshape the world. Michael Spence, winner of the Nobel Prize in Economic Sciences, explains what happened to cause this dramatic shift in the prospects of the five billion people who live in developing countries. The growth rates are extraordinary, and continuing them presents unprecedented challenges in governance, international coordination, and ecological sustainability. The implications for those living in the advanced countries are great but little understood. Spence clearly and boldly describes what's at stake for all of us as he looks ahead to how the global economy will develop over the next fifty years. The Next Convergence is certain to spark a heated debate how best to move forward in the post-crisis period and reset the balance between national and international economic interests, and short-term fixes and long-term sustainability.

Year of the Nurse - Cassandra Alexander 2021-09-18

Comprised of original essays and her chronological journals, tweets, and emails as she attempted to save lives and herself, Year of the Nurse: A Covid-19 Pandemic Memoir is Cassandra Alexander's poignant effort to come to grips with suicidal ideation and PTSD after being a covid nurse in an ICU in 2020.

Good and Cheap - Leanne Brown 2015-07-14

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master’s candidate at NYU, Leanne Brown asked a simple yet

critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Connect - David Bradford, Ph.D. 2021-02-09

A transformative guide to building more fulfilling relationships with colleagues, friends, partners, and family, based on the landmark Interpersonal Dynamics (“Touchy-Feely”) course at Stanford’s Graduate School of Business ONE OF BLOOMBERG’S BEST BOOKS OF THE YEAR • “Carole Robin and David Bradford are masters at helping people bring IQ and EQ together to satisfy both and be successful.”—Ray Dalio, founder of Bridgewater and author of Principles: Life and Work The ability to create strong relationships with others is crucial to living a full life and becoming more effective at work. Yet many of us find ourselves struggling to build solid personal and professional connections or unable to handle challenges that inevitably arise when we grow closer to others. When we find ourselves in an exceptional

relationship—the kind of relationship in which we feel fully understood and supported for who we are—it can seem like magic. But the truth is that the process of building and sustaining these relationships can be described, learned, and applied. David Bradford and Carole Robin taught interpersonal skills to MBA candidates for a combined seventy-five years in their legendary Stanford Graduate School of Business course Interpersonal Dynamics (affectionately known to generations of students as “Touchy-Feely”) and have coached and consulted hundreds of executives for decades. In Connect, they show readers how to take their relationships from shallow to exceptional by cultivating authenticity, vulnerability, and honesty, while being willing to ask for and offer help, share a commitment to growth, and deal productively with conflict. Filled with relatable scenarios and research-backed insights, Connect is an important resource for anyone hoping to improve existing relationships and build new ones at any stage of life.

Intestinal Failure - Alan N. Langnas 2009-01-21

Intestinal failure is a challenging, emerging field that has been the subject of much research and debate in recent years and has only recently become widely accepted as a distinct clinical syndrome. This comprehensive book provides an in-depth review of scientific theory and clinical practice relating to intestinal failure with specific emphasis on assessment and management as part of a multidisciplinary team. Compiled by an internationally recognised editorial team, the book provides a practical how-to guide to the management of adult and pediatric patients with intestinal failure, focusing on quality-of-life issues that are at the heart of patient care. World experts from centers of excellence share their clinical experience and expertise, offering the first ever authoritative resource on intestinal failure. All aspects of patient management are covered, from diagnosis and medical and surgical management (including transplantation) to nutritional consideration and psychosocial aspects of care. Numerous illustrations, flow diagrams and summary boxes complement the text and emphasize important concepts, providing an accessible approach to this complex field. This landmark book is essential reading for any gastroenterologists, surgeons, transplant teams or clinical nutritionists involved in the care of patients with intestinal failure.
