At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. Power of the Universe Lies Within You - PRADIPTA KUMAR DAS. 2015-11-12

This book delves deep into the genesis and power of human thought. Human civilization has consistently grown over few millennia but the exponential growth during last few centuries of industrialization and particularly during the last half a century due to digital revolution can be attributed to one single phenomenon called Human Thought Processes. The idea of an acronym for Generation, Operation and Destruction (G-O-D) by human thought has a spiritual background based on Karmic Principles, argues the author in the book. The delicate balance in the brain chemicals that are responsible for harmonious thought processes can sometimes be severely derailed due to modern day anxiety and stress causing immense agonies leading to serious mental health problems. The author had a firsthand experience of such a mental health crisis in July 2000 while during his PhD study in Adelaide, Australia almost leading to a Near Death Experience which he not only survived but could convert the crisis into an opportunity to harvest immense knowledge and wisdom for self-growth. The author has adopted partly an autobiographical approach to put across ideas that he thinks can find some resonance with people struggling to overcome similar mental health problems in life. While researching into concepts of life after death, he raises few questions about the current understanding of human consciousness. The ultimate realization of the author that Humans are

infinite spiritual beings in finite bodies has been systematically and logically brought out to enable a conviction that mental health problems are better handled with medico-spiritual practices. The title of the book suggests that to achieve happiness and bliss in life, human beings anywhere in this world need not search elsewhere because it is all there within. The author has outlined all the practical steps which helped him not only overcome his serious crisis but achieve his desired goals and thus sublime happiness. He strongly believes in the universal application of the principles enumerated.

The Answers Lie Within Us - Alistair Sinclair 2017-07-05

This book suggests that religion, in its usual sense, can be replaced by something better, that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can. The book breaks new ground in suggesting a radical alternative to religion. It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality. It develops and elaborates a notion of the 'noosphere' within a theoretical system, this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated, eccentric and rather mystical idea.

Everybody is distinct from one another in terms of their personalities, appearances, tastes, and lives. People are strange. To meet the ideal criteria—that we are both typical and distinctive—we must juggle our identities. That we blend in while standing out. It's a paradox because we need to be superior to others in order to live in the harsh society, but we also need to be similar to everyone else in order to fit in. We often have trouble figuring out who we are in society, whether we're teenagers or adults. Humans are social creatures. We require people and one another. But as a result, a lot of us struggle to stand out from the crowd—or, as people like to say, to discover what makes us unique. "Who Lies Within" is a book of 30+ writers who have penned down their thoughts on identity crisis and few other topics.
