*The Sky People* S.M. Stirling 2010-04-27

Marc Vitrac was born in Louisiana in the early 1960's, about the time the first interplanetary probes delivered the news that Mars and Venus were teeming with life—even human life. At that point, the "Space Race" became the central preoccupation of the great powers of the world. Now, in 1988, Marc has been assigned to

Jamestown, the US-Commonwealth base on Venus, near the great Venusian city of Kartahown. Set in a countryside swarming with sabertooths and dinosaurs, Jamestown is home to a small band of American and allied scientist-adventurers. But there are flies in this ointment - and not only the Venusian dragonflies, with their yard-wide wings. The biologists studying Venus's life are puzzled by the way it not only resembles that on Earth, but is virtually identical

Jamestown sends its long-range blimp to rescue the downed EastBloc cosmonauts, little suspecting that the answer to the jungle planet's mysteries may lie there, among tribal conflicts and traces of a power that made Earth's vaunted science seem as primitive as the tribesfolk's blowguns. As if that weren't enough, there's an enemy agent on board the airship... Extravagant and effervescent, *The Sky People* is alternate-history SF adventure at its best. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Penultimate Curiosity - Roger Wagner  
2016-02-25

When young children first begin to ask 'why?' they embark on a journey with no final destination. The need to make sense of the world as a whole is an ultimate curiosity that lies at the root of all human religions. It has, in many cultures, shaped and motivated a more down to earth scientific interest in the physical world, which could therefore be described as penultimate curiosity. These two manifestations of curiosity have a history of connection that goes back deep into the human past. Tracing that history all the way from cave painting to quantum physics, this book (a collaboration between a painter and a physical scientist that uses illustrations throughout the narrative) sets out to explain the nature of the long entanglement between religion and science: the ultimate and the penultimate curiosity.

She's slid into her sister as she cheated on a math test, into a teacher sneaking a drink before class. She learned the worst about a supposed "friend" when she slid into her during a school dance. But nothing could have prepared Vee for what happens one October night when she slides into the mind of someone holding a bloody knife, standing over Sophie's slashed body. Vee desperately wishes she could share her secret, but who would believe her? It sounds so crazy that she can't bring herself to tell her best friend, Rollins, let alone the police. Even if she could confide in Rollins, he has been acting distant lately, especially now that she's been spending more time with Zane.
