[The Jesus Christ Code](#) - Caesar J. B. Squitti 2009-04

While doing research in 1987 Caesar Squitti noticed that many social programs dealing with the traditional family unit had been corrupted. Programs were based on deceptive half-truths; problem was that the definition of half-truth was incorrect. Observations, research and logic suggested that the world definitions of three important concepts, "truth", "half-truth" and "lie" were incorrect. There appeared to be a correlation between the new proposed definition of Truth and the scientific properties of Light. This relationship was labelled, The Jesus Christ Code: The LIGHT: The Rainbow of Truths. It is being proposed that this may indeed be the "original sin" from the Garden of Eden that has remained with us. The Light: The Rainbow of Truths, explores how we can be deceived by truth, and how this is a challenge to critical thinking in our society. Observations in a wide spectrum of related subjects include politics, social programs, health care and religion. This truth about Truth, that truth may lie, will hopefully set us free from this negative dimension to Truth and allow us to think in colors. The Truth can be stranger than fiction. The Jesus Christ Code builds "a bridge" between science and religion. This discovery may be "the key" to unlock

the "gates" to the Garden of Eden. This book examines the quote posed by Pontius Pilate, "What is Truth?"

American Fiction and the Metaphysics of the Grotesque - Dieter Meindl 1996

By synthesizing Kayser's and Bakhtin's views of the grotesque and Heidegger's philosophy of Being, American Fiction and the Metaphysics of the Grotesque seeks to demonstrate that American fiction from Poe to

Pynchon has tried to convey the existential dimension: the pre-individual totality or flow of life, which defines itself against the mind and its linguistic capacity. Dieter Meindl shows how the grotesque, through its self-contradictory nature, has been instrumental in expressing this reality-conception, an antirationalist stance in basic agreement with existential thought. The historical validity of this new metaphysics, which grants precedence to Being--the context of cognition--over the cognizant subject, must be upheld in the face of deconstructive animadversions upon any metaphysics of presence. The notion of decentering the subject, Meindl argues, did not originate with deconstruction. The existential grotesque confirms the protomodernist character of classic American fiction. Meindl traces its course through a number of well-known texts by Melville, James, Gilman, Anderson, Faulkner, and O'Connor, among others. To convey life conceived as motion, these writers had to capture--that is, immobilize--it in their art: an essentially distortive and, therefore, grotesque device. Melville's "Bartleby," dealing with a mort vivant, is the seminal text in this mode of indirectness. As opposed to the existential grotesque, which grants access to a preverbal realm, the linguistic grotesque of postmodern fiction works on the assumption that all reality is referable to language in a textual universe. American Fiction and the Metaphysics of the Grotesque will significantly alter our understanding of certain traditions in American literature.

[The Life and Times of the Thunderbolt Kid](#) - Bill Bryson 2007-09-25
From one of the world's most beloved writers and New York Times bestselling author of *A Walk in the Woods* and *The Body*, a vivid, nostalgic, and utterly hilarious memoir of growing up in the 1950s. Bill Bryson was born in the middle of the American century—1951—in the middle of the United States—Des Moines, Iowa—in the middle of the largest generation in American history—the baby boomers. As one of the best and funniest writers alive, he is perfectly positioned to mine his memories of a totally all-American childhood for 24-carat memoir gold. Like millions of his generational peers, Bill Bryson grew up with a rich fantasy life as a superhero. In his case, he ran around his house and neighborhood with an old football jersey with a thunderbolt on it and a towel about his neck that served as his cape, leaping tall buildings in a single bound and vanquishing awful evildoers (and morons)—in his head—as "The Thunderbolt Kid." Using this persona as a springboard, Bill Bryson re-creates the life of his family and his native city in the 1950s in all its transcendent normality—a life at once completely familiar to us all and as far away and unreachable as another galaxy. It was, he reminds us, a happy time, when automobiles and televisions and appliances (not to mention nuclear weapons) grew larger and more numerous with each passing year, and DDT, cigarettes, and the fallout from atmospheric testing were considered harmless or even good for you. He brings us into the life of his loving but eccentric family, including affectionate portraits of his father, a gifted sportswriter for the local paper and dedicated practitioner of isometric exercises, and of his mother, whose job as the home furnishing editor for the same paper left her little time for practicing the domestic arts at home. The many readers of Bill Bryson's earlier classic, *A Walk in the Woods*, will greet the reappearance in these pages of the immortal Stephen Katz, seen hijacking literally boxcar loads of beer. He is joined in the Bryson gallery of immortal characters by the demonically clever Willoughby brothers, who apply their scientific skills and can-do attitude to gleefully

destructive ends. Warm and laugh-out-loud funny, and full of his inimitable, pitch-perfect observations, *The Life and Times of the Thunderbolt Kid* is as wondrous a book as Bill Bryson has ever written. It will enchant anyone who has ever been young.
