Psychology and the Law - C. James Scheirer
2009

Presented at the 1982 APA [American

Psychological Association] Convention in Washington, D.C., the papers in this volume are the work of five leading scholars in psychology and the law: Bruce Sales, Donald Bersoff, David Rosenhan, Shari Seidman Diamond, and John Monahan. These scholars probe the increasingly complex interaction of law and psychology and present two major themes: the increased regulation affecting the science and practice of psychology and the many ways in which psychology illuminates the behavioral assumptions inherent in the legal system. // The thrust of these papers is that the interaction between law and psychology will increase. This interaction will be reciprocal, with the law increasingly regulating psychologists in their practice and research and with psychology offering insights into human behavior, which will be of value to the criminal- and civil-justice system. Literature and the Environment Stephanie LeMenager 2021

"Bringing together 100 essential critical articles across 4 volumes, *Literature and the Environment: Critical and Primary Sources* is a comprehensive collection of the most important academic writings on ecocriticism and literature's engagement with environmental crisis. With texts by key scholars, creative writers and activists, the articles in these four volumes follow the development and history of environmental criticism, as well as interdisciplinary conversations with contemporary philosophy and media studies.

Literature and the Environment includes work by such writers as: Stacy Alaimo, Jonathan Bate, Jacques Derrida, Ursula K. Heise, Richard Kerridge, Bruno Latour, Rob Nixon, Ken Saro-Wiwa, William Shakespeare, Leslie Marmon Silko, Henry David Thoreau, E.O. Wilson, Cary Wolfe and William Wordsworth"--

The Human Relationship with Nature Peter H. Kahn 1999

Winner of Outstanding Book Award, 2000, Moral Development and Education, American Educational Research Association. Winner of the 2000 Book Award from the Moral Development & Education Group of the American Educational Research Association Urgent environmental problems call for vigorous research and theory

on how humans develop a relationship with nature. In a series of original research projects, Peter Kahn answers this call. For the past eight years, Kahn has studied children, young adults, and parents in diverse geographical locations, ranging from an economically impoverished black community in Houston to a remote village in the Brazilian Amazon. In these studies Kahn seeks answers to the following questions: How do people value nature, and how do they reason morally about environmental degradation? Do children have a deep connection to the natural world that gets severed by modern society? Or do such connections emerge, if at all, later in life, with increased cognitive and moral maturity? How does culture affect environmental commitments and sensibilities? Are there universal features in the human relationship with nature? Kahn's empirical and theoretical findings draw on current work in psychology, biology, environmental behavior, education, policy, and moral development. This scholarly yet accessible book will be of value to practitioners in the social science and environmental fields, as well as to informed generalists interested in environmental issues and children.

Jonathan Edwards on True Christianity - Owen Strachan 2010-01-21

What is a true Christian? What is the church? Though these are fundamental questions they often go unanswered in our current evangelical context. Far too many pastors and thinkers celebrate the trappings of faith and the mere benefits of Christianity, ignoring the biblical

testimony on true conversion that shouts from countless texts from Scripture. This has fed an age-old problem: nominal Christianity. Though Edwards is sometimes presented as a scourge, a mean-hearted parson who lived to belt out thunderous damnations, a careful study of the historical record and of Edwards' writings shows that he was in fact a Christian man devoted to the cultivation of true and saving faith in a spiritually fickle people he tenaciously loved. The problem of noncommittal Christianity did not end with Edwards. It not only survives but thrives in the current day. In studying it then, we are studying ourselves. We see that nominal Christianity, a considerable challenge today, has historic roots. We need not face this problem alone, growing more discouraged by the day, flailing as we try method after method to address the problem. Instead, we can find solace, instruction, and encouragement from the biblically saturated life and ministry of Jonathan Edwards. Easily accessible and readable, you do not need to be a scholar to enjoy these insights about Jonathan Edwards and his writings.

Child Development in Cultural Context - Jaan Valsiner 1989

The study of child development has emerged in the context of Western society, with the practical needs and social norms of this culture dominating the field. Consequently, the development of children within Western culture has come to be considered the norm for all children, regardless of how different their economic and cultural environments might be. Such a viewpoint often leads to narrow or possibly misleading conclusions about what is "natural". This volume combines approaches from anthropology and cross-cultural psychology to explore means of making developmental psychology much more culture-inclusive -- that is, considering the reciprocal, ongoing relationship between culture and individual development.

Five Dimensions of Quality - Linda Suskie
2014-10-13

Meet calls for increased quality and understand accreditation expectations Author Linda Suskie is internationally recognized for her work in higher education assessment, and she is a former vice president of a major regional accreditor. In *Five Dimensions of Quality: A Common Sense Guide to Accreditation and Accountability in Higher Education* she provides a simple, straightforward model for

understanding and meeting the calls for increased quality in higher education ever-present in today's culture. Whether your institution is seeking accreditation or not, the five dimensions she outlines will help you to identify ways to improve institutional quality and demonstrate that quality to constituents. For those wading through the accreditation process, which has become more difficult in recent years due to increasing regulation and pressure for greater accountability, Suskie offers expert guidance on understanding the underlying principles of the expectations of accrediting bodies. Using the model presented here, which is much easier to understand than the sometimes complex resources provided by individual accrediting bodies, American colleges and universities can understand what they need to do to earn and maintain their regional accreditation as well as improve overall institutional quality for their students. You'll be able to: Identify ways to improve institutional quality Demonstrate the quality of your institution to internal and external constituents Avoid wasting time and energy on misguided institutional processes to comply with accreditation requirements By focusing on why colleges and universities should take particular actions rather than only on what those actions should be, Five Dimensions of Quality gives them the knowledge and strategies to prepare for a successful review. It is an ideal resource for leaders, accreditation committee members, and everyone on campus.

Theories of Small Groups - Marshall Scott Poole 2004-10-28

Theories of Small Groups: Interdisciplinary Perspectives brings together the threads that unify the field of group research. The book is designed to define and describe theoretical perspectives on groups and to highlight select research findings within those perspectives. In this text, editors Marshall Scott Poole and Andrea B. Hollingshead capitalize on the theoretical advances made over the last fifty years by integrating models and theories of small groups into a set of nine general theoretical perspectives. Theories of Small Groups is the first book to assess, synthesize,

integrate, and evaluate the body of theory and research on small groups across disciplinary boundaries.

Dark Divide - Sonja Stone 2018-07-31
Hogwarts meets The Bourne Identity at Desert Mountain Academy, the covert CIA training school where Nadia Riley's harrowing adventures continue. With the trials of her first semester behind her, sixteen-year-old Nadia Riley returns to Desert Mountain Academy—an elite boarding school secretly housing a CIA training facility—to complete her junior year. After uncovering a double agent and neutralizing a threat to national security, keeping up with her coursework and navigating an uncertain romance seems like more than enough drama. But Nadia's first survival course takes a terrifying turn when she realizes she's being hunted by a familiar foe. The traitor she exposed is after her—because he needs her help, to protect someone he loves. But can she really trust a guy who was once tasked to kill her? In this heart-pounding sequel to Desert Dark, the stakes get ever higher as Nadia uncovers a far-reaching conspiracy with roots closer to home than she ever could have imagined. Told through the alternate perspectives of a diverse cast of characters, Dark Divide is a fast-paced thriller perfect for fans of Marie Lu's Legend series or James Dashner's Maze Runner trilogy.
