Assessing Listening for Chinese English Learners - Pan Zhixin

2016-12-08

This book reports in detail the newly developed Communicative Listening Comprehension Test (CLCT) for the National College English Test (CET) of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer (1996) in particular, the project develops CLCT for CET-4 and CET-6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently, based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests, CLCT-4 and CLCT-6 test specifications are developed. Finally, sample papers are produced and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly

developed notes-completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice, this research provides valuable insights into listening test development for other large-scale tests.

Target VITEEE 2021 - Past 14 Years (2019 - 2006) Solved Papers + 10 Mock Tests 10th Edition - Disha Experts 2020-02-04

Punjab Reconsidered - Anshu Malhotra 2012-02-21

What is Punjabiya? What are the different notions of Punjab? This volume analyses these ideas and explores the different aspects that constitute Punjab as a region conceptually in history, culture, and practice. Each essay examines a different Punjabi culture—language-based and literary; religious and those that define a 'community'; rural, urban, and middle class; and historical, contemporary, and cosmopolitan. Together, these essays unravel the complex foundations of Punjabiya. The volume also shows how the recent history of Punjab—partition, aspirations of statehood, and a large and assertive diaspora—has had a discernible impact on the region's scholarship. Departing from conventional studies on Punjab, this book presents fresh perspectives and new insights into its regional culture.

NCERT Solutions Physics 12th - Nidhi Goel 2014-01-01

A unique book containing Questions-Answers of NCERT Textbook based questions. This book containing solutions to NCERT Textbook questions has been designed for the students studying in Class XII following the NCERT Textbook for Physics. Communication System

Legal Aptitude and Legal Reasoning for the CLAT and LLB Examinations -

Agrobiodiversity - Karl S. Zimmerer 2019-04-30

Experts discuss the challenges faced in agrobiodiversity and conservation, integrating disciplines that range from plant and biological sciences to economics and political science. Wide-ranging environmental phenomena—including climate change, extreme weather events, and soil and water availability—combine with such socioeconomic factors as food policies, dietary preferences, and market forces to affect agriculture and food production systems on local, national, and global scales. The increasing simplification of food systems, the continuing decline of plant species, and the ongoing spread of pests and disease threaten biodiversity in agriculture as well as the sustainability of food resources. Complicating the situation further, the multiple systems involved—cultural, economic, environmental, institutional, and technological—are driven by human decision making, which is inevitably informed by diverse knowledge systems. The interactions and linkages that emerge necessitate an integrated assessment if we are to make progress toward sustainable agriculture and food systems. This volume in the Strüngmann Forum Reports series offers insights into the challenges faced in agrobiodiversity and sustainability and proposes an integrative framework to guide future research, scholarship, policy, and practice. The contributors offer perspectives from a range of disciplines, including plant and biological sciences, food systems and nutrition, ecology, economics, plant and animal breeding, anthropology, political science, geography, law, and sociology. Topics covered include evolutionary ecology, food and human health, the governance of agrobiodiversity, and the interactions between agrobiodiversity and climate and demographic change.
