Sourcebook for Research in Music, Third Edition

- Allen Scott 2015-06-01

Since it was first published in 1993, the

Sourcebook for Research in Music has become

an invaluable resource in musical scholarship. The balance between depth of content and brevity of format makes it ideal for use as a textbook for students, a reference work for faculty and professional musicians, and as an aid for librarians. The introductory chapter includes a comprehensive list of bibliographical terms with definitions; bibliographic terms in German, French, and Italian; and the plan of the Library of Congress and the Dewey Decimal music classification systems. Integrating helpful commentary to instruct the reader on the scope and usefulness of specific items, this updated and expanded edition accounts for the rapid growth in new editions of standard works, in fields such as ethnomusicology, performance practice, women in music, popular music, education, business, and music technology. These enhancements to its already extensive bibliographies ensures that the Sourcebook will continue to be an indispensable reference for years to come.

*Online Film Production in China Using Blockchain and Smart Contract* Patrice Poujol  
2019-03-04

This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in-depth, on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, *Online Film Production in China Using Blockchain and Smart Contracts* explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes

solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content whether these works are related to film, Virtual Reality (VR), video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry as well as computer science.

*Global Logistics* €. Donald J. Waters 2007

The field of logistics is developing at a remarkable pace and its role is now integral to the long term plans of almost all businesses. Communications and IT are offering ever more

opportunities; world trade is growing; new markets are developing; yet at the same time there is increasing concern for the environment. The world of logistics is constantly evolving in response to these changes. In the same way, the fifth edition of this established book has evolved to represent the current trends, best practice and latest thinking on global logistics. It serves as a forum allowing the contributors, a range of acknowledged sector specialists, to discuss key logistics issues and give their authoritative views.

**Supply Chain Management** - Donald Waters  
2019-02-12

A broad general introduction to all essential aspects of logistics and supply chain management, set within the wider business context. The book uses well-developed pedagogy and numerous case studies, guiding the reader through the subject by retaining a strong focus on the application of theory and practical situations.

*Environmental Chemistry, Eighth Edition*  
Stanley E. Manahan 2004-08-26

Environmental Chemistry, Eighth Edition builds on the same organizational structure validated in previous editions to systematically develop the principles, tools, and techniques of environmental chemistry to provide students and professionals with a clear understanding of the science and its applications. Revised and updated since the publication of the best-selling Seventh Edition, this text continues to emphasize the major concepts essential to the practice of environmental science, technology, and chemistry while introducing the newest innovations to the field. The author provides

clear explanations to important concepts such as the anthrosphere, industrial ecosystems, geochemistry, aquatic chemistry, and atmospheric chemistry, including the study of ozone-depleting chlorofluorocarbons. The subject of industrial chemistry and energy resources is supported by pertinent topics in recycling and hazardous waste. Several chapters review environmental biochemistry and toxicology, and the final chapters describe analytical methods for measuring chemical and biological waste. New features in this edition include: enhanced coverage of chemical fate and transport; industrial ecology, particularly how it is integrated with green chemistry; conservation principles and recent accomplishments in sustainable chemical science and technology; a new chapter addressing terrorism and threats to the environment; and the use of real world examples.

*Global Logistics* Donald Waters 2014-09-03  
The field of logistics continues to develop at a remarkable pace. Until recently, logistics was barely considered in long-term plans, but its strategic role is now recognised and lies at the heart of long-term plans in almost every business. Reasons for this change include: communications and information technology offer new opportunities; world trade grows; competition forces operations to adopt new practices and become evermore efficient; and the concern for the environment increases. Add to this the increased emphasis on consumer satisfaction, flexible operations and time compression, and it's clear that getting logistics right is important. This 7th edition of *Global Logistics*, edited by Stephen Rinsler and Donald Waters, has been thoroughly revised and updated to reflect the latest trends, best practices, and cutting-edge thinking on global

logistics. It provides guidance on important topics, including agile supply chains, IT, sustainability and performance management, collaboration, outsourcing and humanitarian logistics. This edition of *Global Logistics* provides new chapters on supply chain trends and strategies, fulfilling customer needs, and supply chain vulnerability. There are also dedicated new chapters on China and Central and Eastern Europe to assess developments across the globe. This edition serves as a forum for acknowledged sector specialists to discuss key logistics issues and share their authoritative views. The new edition introduces new contributors, including leading thinkers from international universities and businesses. *Global Logistics* is an invaluable source of guidance and practical advice for students, managers and practitioners, who will find it an essential text that also includes online resources. Online resources available include a student manual with key learning outcomes for each chapter.

*Locative Media* Rowan Wilken 2014-08-07  
Not only is locative media one of the fastest growing areas in digital technology, but questions of location and location-awareness are increasingly central to our contemporary engagements with online and mobile media, and indeed media and culture generally. This volume is a comprehensive account of the various location-based technologies, services, applications, and cultures, as media, with an aim to identify, inventory, explore, and critique their cultural, economic, political, social, and policy dimensions internationally. In particular, the collection is organized around the perception that the growth of locative media gives rise to a number of crucial questions concerning the areas of culture, economy, and policy.

*The Academic Library in the United States*  
Mark L. McCallon 2022-09-26

This book advances the belief that the library--more than any other cultural institution--collects, curates and distributes the results of human

thought. Essays broaden the debate about academic libraries beyond only professional circles, promoting the library as a vital resource for the whole of higher education. Topics range from library histories to explorations of changing media. Essayists connect modern libraries to the remarkable dream of Alexandria's ancient library--facilitating groundbreaking research in every imaginable field of human interest, past, present and future. Academic librarians who are most familiar with historical traditions are best qualified to promote the library as an important aspect of teaching and learning, as well as to develop resources that will enlighten future generations of readers. The intellectual tools for compelling, constructive conversation come from the narrative of the library in its many iterations, from the largest research university to the smallest liberal arts or community college.

In the decade after the 1973 Supreme Court decision on abortion, advocates on both sides sought common ground. But as pro-abortion and anti-abortion positions hardened over time into pro-choice and pro-life, the myth was born that Roe v. Wade was a ruling on a woman's right to choose. Mary Ziegler's account offers a corrective.

Encyclopedia of Health Services Research - Ross M. Mullner 2009-05-15

Today, as never before, healthcare has the ability to enhance the quality and duration of

life. At the same time, healthcare has become so costly that it can easily bankrupt governments and impoverish individuals and families. Health services research is a highly multidisciplinary field, including such areas as health administration, health economics, medical sociology, medicine, , political science, public health, and public policy. The Encyclopedia of Health Services Research is the first single reference source to capture the diversity and complexity of the field. With more than 400 entries, these two volumes investigate the relationship between the factors of cost, quality, and access to healthcare and their impact upon medical outcomes such as death, disability, disease, discomfort, and dissatisfaction with care. Key Features Examines the growing healthcare crisis facing the United States Encompasses the structure, process, and outcomes of healthcare Aims to improve the equity, efficiency, effectiveness, and safety of healthcare by influencing and developing public

policies Describes healthcare systems and issues from around the globe Key Themes Access to Care Accreditation, Associations, Foundations, and Research Organizations Biographies of Current and Past Leaders Cost of Care, Economics, Finance, and Payment Mechanisms Disease, Disability, Health, and Health Behavior Government and International Healthcare Organizations Health Insurance Health Professionals and Healthcare Organizations Health Services Research Laws, Regulations, and Ethics Measurement; Data Sources and Coding; and Research Methods Outcomes of Care Policy Issues, Healthcare Reform, and International Comparisons Public Health Quality and Safety of Care Special and Vulnerable Groups The Encyclopedia is designed to be an introduction to the various topics of health services research for an audience including undergraduate students, graduate students, and general readers seeking non-technical descriptions of the field and its practices. It is

also useful for healthcare practitioners wishing to stay abreast of the changes and updates in the field.

[Software, Infrastructure, Labor](#) - Ned Rossiter  
2016-06-23

Infrastructure makes worlds. Software coordinates labor. Logistics governs movement. These pillars of contemporary capitalism correspond with the materiality of digital communication systems on a planetary scale. Ned Rossiter theorizes the force of logistical media to discern how subjectivity and labor, economy and society are tied to the logistical imaginary of seamless interoperability. Contingency haunts logistical power. Technologies of capture are prone to infrastructural breakdown, sabotage, and failure. Strategies of evasion, anonymity, and disruption unsettle regimes of calculation and containment. We live in a computational age where media, again, disappear into the background as infrastructure. Software,

Infrastructure, Labor intercuts transdisciplinary theoretical reflection with empirical encounters ranging from the Cold War legacy of cybernetics, shipping ports in China and Greece, the territoriality of data centers, video game design, and scrap metal economies in the e-waste industry. Rossiter argues that infrastructural ruins serve as resources for the collective design of blueprints and prototypes demanded of radical politics today.

**Digital Libraries** - Jose Borbinha 2003-06-26  
ECDL2000, the Fourth European Conference on Research and Advanced Technology for Digital Libraries, is being held this year in Lisbon, Portugal, following previous events in Pisa (1997), Heraklion (1998), and Paris (1999). One major goal of the ECDL conference series has been to draw information professionals, stakeholders, and user communities from both the research world and from industry into a discussion of the alternative technologies, policies, and scenarios for global digital libraries. The success of previous conferences makes them a hard act to follow. The field of digital libraries draws on a truly diverse set of scientific and technical disciplines. In the past three years, moreover, global cooperation on research and development has emerged as an urgent priority, particularly in the new European Framework Programme and in the Digital Library Initiative in the United States. Because of this diversity, the field is perhaps still

struggling for an identity. But this struggle for identity is itself a source of energy and creativity. Participants in this field feel themselves to be part of a special community, with special people. Each of us may claim expertise on a narrow issue, with specific projects, but the choices we make and the methods we use in local solutions can have unforeseen impacts within a growing universe of interconnected resources.

**The agile supply chain** - Remko Ivan Hoek  
For the guest editor Remko I. van Hoek, in the field of logistics the debate between the 'lean' thinkers and those who advocate 'agility' is still very much alive. This special issue follows the International Conference on Agility in Helsinki, Finland, and is a collection of some of the best of

the fifty papers presented there. The papers touch on agility in regards to forecasting, manufacturing, simulation, ERP and Chinese sourcing. The result is that the concept of agility can be considered as a practical path forward, rather than just a topic of academic debate.

**Global Logistics And Distribution Planning** - Donald Waters 2018-05-02

The fully revised new edition of this well known

and respected book is characterized by the more international perspective it has taken on through contributions from internationally known authors and a final section on international logistics which examines in turn strategies for West and East Europe, the Far East and North America. Logistics has a key strategic role to play in the long-term plans of major companies, and is recognized as a vital part of every organization. To a large extent this crucial new role is due to an expanded view of logistics, which now includes all the activities related to the supply chain from initial suppliers through to final customers. This book provides a wealth of useful ideas and practical information on all the current and future trends in logistics and distribution. Written by a host of contributors drawn from industry, constancy and education, this book provides new insights into the most significant aspects of logistics, including: developments in logistics supply chain strategies lean logistics efficient customer response

logistics in different countries partnering and strategic alliances re-engineering the logistics function From logistics professionals, consultants, professors and students to managers from different backgrounds who want an appreciation of current trends in the subject, this book is essential reading. About the author: Donald Waters, a past member of the Institute of Logistics and currently a member of the Canadian Association of Logistics Management, has lectured weekly on logistics, operational research and management science, and has brought his academic career to fruition as Professor of Operations Management at the University of Calgary, Canada. He is also the author of Operations Management in the Kogan Page Fast Track MBA Series. Features
