An Argument on Rhetorical Style - Marie Lund 2017-04-16
This book interprets rhetorical style within a theoretical frame, and it aims to give a more unifying account than has been given in most publications on style. The aim is to establish the concept of rhetorical style that will not only achieve a greater conceptual consensus, but also help make it both powerful and useful in line with other concepts in the practical and critical disciplines of rhetoric. The examination of

rhetorical style is aimed at conceptual development based on theoretical reflection and rhetorical analysis. The goal is to achieve a clearer understanding of some of the ways in which rhetorical style supplies the conceptual frameworks for reflecting, perceiving, arguing, and gaining influence in practical life.

The Great Influenza - John M. Barry 2005-10-04

#1 New York Times bestseller

"Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history."—Bill Gates

"Monumental... an authoritative and disturbing morality tale."—Chicago Tribune

The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, The Great Influenza provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, "The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try

to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart." At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.

Composition-Rhetoric Robert Connors 1997-06-05

Connors provides a history of composition and its pedagogical approaches to form, genre, and correctness. He shows where many of the

today's practices and assumptions about writing come from, and he translates what our techniques and theories of teaching have said over time about our attitudes toward students, language and life. Connors locates the beginning of a new rhetorical tradition in the mid-nineteenth century, and from there, he discusses the theoretical and pedagogical innovations of the last two centuries as the result of historical forces, social needs, and cultural shifts. This important book proves that American composition-rhetoric is a genuine, rhetorical tradition with its own evolving theories and praxis. As such it is an essential reference for all teachers of English and students of American education.

Speechwriting in Theory and Practice Jens E. Kjeldsen

2019-03-14

This book provides students, researchers, and practitioners of speechwriting with a unique insight in the theory, history, and practice of speechwriting. The combination of theory and

practice with case studies from the United States and Europe makes this volume the first of its kind. This book is recommended reading for professional speechwriters wishing to expand their knowledge of the rhetorical and theoretical underpinnings of speechwriting, and enables students and aspiring speechwriters to gain an understanding of speechwriting as a profession.

The interpretation of this contentious issue started before Paul's letters and found its way into them by his citing how others perceived of his theology, and in Paul rendering rumors and criticism, and also interacting with them. To this reception-oriented perspective belong also punitive actions taken against Paul by synagogues. As a reception of Paul, Acts is included, leaving a more complex picture than argued by advocates of Paul within Judaism. Thus Karl Olav Sandnes uncovers the first interpretation or reception of Paul's view on Torah. It is limited in its scope, but provides a critical and necessary view on common trends in Pauline scholarship. Paul's decentering of the Torah was considered endangering

for morality, for Jews and Gentiles alike. Perceptions of Paul's theology must be accounted for in Pauline studies.

Art and Rhetoric in Roman Culture- Jaś Elsner
2014-10-02

Rhetoric was fundamental to education and to cultural aspiration in the Greek and Roman worlds. It was one of the key aspects of antiquity that slipped under the line between the ancient world and Christianity erected by the early Church in late antiquity. Ancient rhetorical theory is obsessed with examples and discussions drawn from visual material. This book mines this rich seam of theoretical

analysis from within Roman culture to present an internalist model for some aspects of how the Romans understood, made and appreciated their art. The understanding of public monuments like the Arch of Titus or Trajan's Column or of imperial statuary, domestic wall painting, funerary altars and sarcophagi, as well as of intimate items like children's dolls, is greatly enriched by being placed in relevant rhetorical contexts created by the Roman world.

Artificial Intelligence for Customer Relationship Management - Boris Galitsky
2020-12-23

The second volume of this research monograph describes a number of applications of Artificial Intelligence in the field of Customer Relationship Management with the focus of solving customer problems. We design a system that tries to understand the customer complaint, his mood, and what can be done to resolve an issue with the product or service. To solve a customer problem

efficiently, we maintain a dialogue with the customer so that the problem can be clarified and multiple ways to fix it can be sought. We introduce dialogue management based on discourse analysis: a systematic linguistic way to handle the thought process of the author of the content to be delivered. We analyze user sentiments and personal traits to tailor dialogue management to individual customers. We also design a number of dialogue scenarios for CRM with replies following certain patterns and propose virtual and social dialogues for various modalities of communication with a customer. After we learn to detect fake content, deception and hypocrisy, we examine the domain of customer complaints. We simulate mental states, attitudes and emotions of a complainant and try to predict his behavior. Having suggested graph-based formal representations of complaint scenarios, we machine-learn them to identify the best action

the customer support organization can choose to retain the complainant as a customer.

Rhetorical Style and Bourgeois Virtue - Mark Garrett Longaker 2015-09-29
During the British Enlightenment, the correlation between effective communication and moral excellence was undisputed—so much so that rhetoric was taught as a means of instilling desirable values in students. In *Rhetorical Style and Bourgeois Virtue*, Mark Garrett Longaker explores the connections

between rhetoric and ethics in the context of the history of capitalism. Longaker's study lingers on four British intellectuals from the late seventeenth to the mid-nineteenth century: philosopher John Locke, political economist Adam Smith, rhetorical theorist Hugh Blair, and sociologist Herbert Spencer. Across one hundred and fifty years, these influential men sought to mold British students into good bourgeois citizens by teaching them the discursive habits of clarity, sincerity, moderation, and economy, all with one incontrovertible truth in mind: the free market requires virtuous participants in order to thrive. Through these four case studies—written as biographically focused yet socially attentive intellectual histories—Longaker portrays the British rhetorical tradition as beholden to the dual masters of ethics and economics, and he sheds new light on the deliberate intellectual engineering implicit in Enlightenment

pedagogy.

Dramatizing Writing Virginia

Skinner-Linnenberg

2020-07-25

Although speech departments have "owned" delivery for the last 100 years, those who teach writing, especially English departments, can gain a great deal by reinstating delivery into their conceptions of and theories about writing. Thus, in the author's vision of "dramatizing writing" in the composition classroom, delivery can have an impact on all the composing steps, from invention to final draft. The goals of this text are to redefine delivery for writing, to reunite it with other parts of the classical rhetorical canon, and to practically apply it in contemporary writing instruction. This text is divided into three main sections. The first provides a survey of the history of delivery in rhetorical theory. A continuum is set up from a totally physical conception of delivery to a noetic one which incorporates more intellectual processes. The argument is that the

tension heightened by discord over its definition eventually led to the splitting of delivery from the rhetorical canon. A separate discussion of the women's challenge to delivery is also included. The next section contains a survey of facets of delivery that exist in current theory combined with the author's own theory of delivery. It provides insight into the state of delivery in contemporary writing instruction. The author argues that since the split of delivery from the rhetorical canon has caused a modern bias against delivery in writing theory, many strategies that could aid in the teaching of writing have either been overlooked or undertheorized. Therefore, she borrows from current theoretical areas within and outside of writing in order to construct her own theory of delivery. The last section provides practical applications of delivery in writing instruction. Again borrowing from many sources inside and outside of composition, she describes the techniques

teachers may use to incorporate delivery in a writing classroom. Through the use of delivery, more strategies may be developed to aid in the teaching of writing. Special features include: * the incorporation of some practices that had been in use in the composition classroom for many years but did not have any consciously theoretical grounding; * the discussion of women rhetoricians' theories on delivery; * the combination of many contemporary theoretical areas including theatrical, feminist, rhetorical, and pedagogical to form the author's redefined theory of delivery; and * the presentation of practical applications of this new theory of delivery for teachers to utilize in their own classrooms.

Teaching Arguments - Jennifer Fletcher 2015

No matter where students' lives lead after graduation, one of the most essential tools we can teach them is how to comprehend, analyze, and respond to arguments. Students need to know how writers' and speakers' choices are shaped by elements of the rhetorical situation, including

audience, occasion, and purpose. In *Teaching Arguments: Rhetorical Comprehension, Critique, and Response*, Jennifer Fletcher provides teachers with engaging classroom activities, writing prompts, graphic organizers, and student samples to help students at all levels read, write, listen, speak, and think rhetorically. Fletcher believes that, with appropriate scaffolding and encouragement, all students can learn a rhetorical approach to argument and gain access to rigorous academic content. *Teaching Arguments* opens the door and helps them pay closer attention to the acts of meaning around them, to notice persuasive strategies that might not be apparent at first glance. When we analyze and develop arguments, we have to consider more than just the printed words on the page. We have to evaluate multiple perspectives; the tension between belief and doubt; the interplay of reason, character, and emotion; the dynamics of occasion, audience, and

purpose; and how our own identities shape what we read and write. Rhetoric teaches us how to do these things. *Teaching Arguments* will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated, persuasive arguments--a major cornerstone for being not just college- and career-ready but ready for the challenges of the world.

A New History of Classical Rhetoric - George A. Kennedy 2009-07-01

George Kennedy's three volumes on classical rhetoric have long been regarded as authoritative treatments of the subject. This new volume, an extensive revision and abridgment of *The Art of Persuasion in Greece*, *The Art of Rhetoric in the Roman World*, and *Greek Rhetoric under Christian Emperors*, provides a comprehensive history of classical rhetoric, one that is sure to become a standard for its time. Kennedy begins by identifying the rhetorical features of early

Greek literature that anticipated the formulation of "metarhetoric," or a theory of rhetoric, in the fifth and fourth centuries b.c.e. and then traces the development of that theory through the Greco-Roman period. He gives an account of the teaching of literary and oral composition in schools, and of Greek and Latin oratory as the primary rhetorical genre. He also discusses the overlapping disciplines of ancient philosophy and religion and their interaction with rhetoric. The result is a broad and engaging history of classical rhetoric that will prove especially useful for students and for others who want an overview of classical rhetoric in condensed form.

rhetorical goals. P & GT; The five traditional canons of rhetoric— invention, arrangement, style, memory, and delivery— are introduced in a particularly accessible chapter, showing students that rhetoric has roots in antiquity but essential applications in our own time (Ch 2).

Rhetorical Questions Edwin Black 1992-04-15

From classical antiquity through the Renaissance, rhetoric was the prime vehicle of education in the West and the discipline that prepared students for civic life. With a comprehensiveness drawn from this tradition, Edwin Black here probes the incongruities between form and substance that open public discourse to significant interpretation. Locating rhetorical studies at the confluence of literature and politics, Black focuses on the ideological component of seemingly literary texts and the use of literary devices to advance political advocacy. The essays collected here range in subject matter from

nineteenth-century oratory to New York Times editorials to the rhetoric of Richard Nixon. Unifying the collection are the concerns of secrecy and disclosure, identity, opposition, the scope of argument in public persuasion, and the historical mutability of rhetorical forms.

Rhetoric in European Culture
and Beyond - Kraus, Jiří
2015-03-01

This book, Rhetoric in
European and World Culture,
defines the position of rhetoric
in the cultural and educational
systems from ancient times
through the present. It
examines the decline of its
importance in a period of
rationalism and enlightenment,
presents the causes of why
rhetoric (reduced to a system
of rhetorical tricks) came to
have negative connotations,

and explains why rhetoric in
the 20th century was able to
regain its position. It
demonstrates that the prestige
of rhetoric sharply falls when it
is reduced to a refined method
for deceiving the public, and
increases when it is seen as a
scientific discipline that is used
throughout all of the fields of
the humanities - philosophy,
logic, semiotics, literary
science, linguistics, the science
of media and others. In this
sense, rhetoric strives for
universal recognition and the
cultivation of rhetorical
expression, spoken and
written, including not only its
production but also reception
and interpretation. In such a
renaissance of interest,
rhetoric appears not merely as
a guide to language skills, but
as a complex theoretical field
examining human behaviour in
social communication.
Chapters 1-9 describe the
development of rhetoric from
its Greek, Hellenic and Roman
beginnings to rhetoric in the
context of medieval Christian
culture, later during the
periods of humanism,

Enlightenment, baroque. The final chapter is concerned with rhetoric in the 18th, 19th, and 20th centuries. It takes into account geography, including the history of rhetoric in France, Spain, Italy, Germany, England, Scotland, Poland, Russia, the Czech Lands, Moravia, Slovakia and from the 19th century in the United States. The final chapter presents an answer to the question of whether corresponding systems of rhetorical knowledge have been formed beyond the borders of Mediterranean antiquity. The selected examples of theoretical works on "the art of speech" from India, the Middle East, China, Korea and Japan show that each language community forms its own concept, theory and practice of persuasive and suggestive speaking behaviours. Often such findings, instead of being used as manuals for the stylization and presentation of speeches, rather concentrate on analyzing written documents, in which we can find not only

specific categorical devices of the given culture (as is the case with comments on the Vedic texts of ancient India) but also tropes and figures characteristic of Greek and Roman rhetoric, e.g., the Hebrew and Aramaic texts of the Old Testament.

Plato Rediscovered - T. K. Seung 1996

What is the nature of norms and values for the constitution of human society and culture? In this groundbreaking work, T. K. Seung shows that this was the ultimate question for Plato throughout his life, and that he gave not one but two answers, thus twice inventing political philosophy as the science of all sciences. Providing a thematically unified interpretation of his dialogues on the grand scale, Seung retraces Plato's journey of invention. *Plato Rediscovered* extends the project Seung began in *Intuition and Construction* (1993) and *Kant's Platonic Revolution* (1994). A work that will radically alter our understanding of the philosopher.

One America? - Nathan Angelo 2019-05-01

Reveals how presidents deploy a rhetoric that attempts to attract many racial and ethnic groups, but ultimately directs itself to an archetypal white, Middle-American swing voter.

Despite major advancements in civil rights in the United States since the 1960s, racial inequality continues to persist in American society. While it may appear that presidents do not address the topic of race, it lurks in the background of presidential political speech across a range of issues, including welfare, crime, and American identity. Using a thorough approach that places textual analysis in a historical

context, *One America?* asks what presidents say about race, how often they say it, and to whom they say it. Nathan Angelo demonstrates how presidents attempt to use rhetoric to compose a message that will resonate with the many groups that comprise the modern party system, but ultimately those alliances cause presidents to direct most of their speeches about race to an archetypical white, Middle-American swing voter, thereby restricting the issues and solutions that they discuss. While the American demographic profile is changing, rhetoric that links American identity with racially coded concepts and appeals to white voters' racial resentments has become ubiquitous. Angelo warns us about the possible repercussions of such tactics, noting that while they may allow presidents to craft winning coalitions their use continues to legitimate a system that ignores racial inequality.

Rhetoric and the Familiar in

Francis Bacon and John Donne - Daniel Derrin

2013-03-08

Rhetoric and the Familiar examines the rhetorical practice of Francis Bacon and John Donne in both their writing and public speaking. It explores how their rhetorical planning negotiates the need both to use and combat familiar ideas, images, and emotions, when engaging different audiences. The book's main selling points are that it explores well-known texts from the neglected angle of faculty psychology. Its ability to illuminate familiar ground in an important but neglected way will be its main selling point in the academic market.

Viability of the Rhetorical Tradition, The - Richard Graff

2012-02-01

Interrogates the story of rhetoric promoted in standard historical accounts and reconsiders the relationship between rhetorical theory, practice, and pedagogy. *The Viability of the Rhetorical Tradition* reconsiders the relationship between rhetorical

theory, practice, and pedagogy. Continuing the line of questioning begun in the 1980s, contributors examine the duality of a rhetorical canon in determining if past practice can make us more (or less) able to address contemporary concerns. Also examined is the role of tradition as a limiting or inspiring force, rhetoric as a discipline, rhetoric's contribution to interest in civic education and citizenship, and the possibilities digital media offer to scholars of rhetoric.

ideas shook civilization and helped make us who we are. Thoreau's account of his solitary and self-sufficient home in the New England woods remains an inspiration to the environmental movement - a call to his fellow men to abandon their striving, materialistic existences of 'quiet desperation' for a simple life within their means, finding spiritual truth through awareness of the sheer beauty of their surroundings.
