Anchored by the normative framework, this book aims to clarify the basis for individual criminal liability for persons who finance entities that perpetrate core crimes. The objective of this monograph is

to clarify the rules to enable international courts and tribunals to identify the extent to which individual criminal liability attaches to the financing of core crimes, as well as the legal basis for such liability. By clarifying the criminal liability of individual who finance entities that perpetrate core crimes, this book also seeks to clarify the mental elements of the mode of liability of aiding and abetting. This is achieved through a thorough analysis of the applicable rules in the international arena, as well as through the comparative analysis.

Homosexuality in the Jurisprudence of the

Supreme Court of India -

Yeshwant Naik 2017-04-07

The book analyses the Indian Supreme Court's jurisprudence on homosexuality, its current approach and how its position has evolved in the past ten years. It critically analyses the Court's landmark judgments and its perception of equality, family, marriage and human rights from an international perspective. With the help of European Court of Human Rights' judgments and international conventions, it compares the legal and social discrimination meted out to the Indian LGBTI community with that in the international arena. From a social anthropological perspective, it demonstrates how gay masculinity, although marginalized, serves as a challenge to patriarchy and hegemonic masculinity. This unique book addresses the lack of in-depth literature on gay masculinity, elaborately narrating and analysing contemporary gay masculinity and emerging gay lifestyles in India and highlighting the latest research on the subject

of homosexuality in general and in particular with respect to India. It also discusses several new issues concerning the gay men in India supported by the living law approach put forth by Eugen Ehrlich.

Criminal Law for the 21st Century - Chan Wing Cheong 2013-07-19

In this book, the authors propose a set of improved and modernised provisions expressing the general principles of criminal responsibility. This set of principles will comprise a 'General Part' which, it is proposed, will form part of Singapore's Penal Code. The key objective of devising and enacting the General Part is to significantly revitalise the Penal Code and restore many of its original technical attributes. Each chapter of this book comprises: (a) a carefully considered and drafted provision on a general principle

of criminal responsibility; (b) a summary of the existing law in Singapore pertaining to that principle; (c) a selection of recent formulations of that principle from other jurisdictions to benchmark Singapore's law (both current and proposed) with international best practices; and (d) a comparison of these formulations with the provision proposed in this book for inclusion as a General Part in Singapore's Penal Code.

This Handbook presents innovative research that compares different criminal procedure systems by focusing on the mechanisms by which legal systems seek to avoid error, protect rights, ground their legitimacy, expand lay participation in the criminal process and develop alternatives to criminal trials, such as plea bargaining, as well as alternatives to the criminal process as a whole, such as intelligence operations. The criminal procedures examined in this book include those of the United States, Germany, France, Spain, Russia, India, Latin America, Taiwan and Japan, among others.

Shipbreaking in Developing Countries - Md Saiful Karim
2017-12-06

This book explores the process of shipbreaking in developing countries, with a particular focus on Bangladesh. In the past, shipbreaking (the disposal of obsolete ships) was a very common industrial activity in many developed countries. However, due to stringent domestic environmental and labour laws it is almost impossible for the increasing number of vessels to be disposed of domestically, and now developing nations including Bangladesh, China, India, Turkey and Pakistan regularly participate in this activity. The shipbreaking yards in these countries are not only detrimental to the marine and coastal environment but also represent significant health hazards to local people and workers. Given the global importance of the issue, an effective legal and institutional

framework for a sustainable operation of the shipbreaking industry is desperately needed. Sitting at the intersection of three distinct fields - environmental justice, international environmental law and international maritime law - this book offers an innovative take on the issues surrounding the shipbreaking process. Drawing on the case study of Bangladesh due to its prominence in the shipbreaking industry, the author implements an environmental justice framework to examine the issues of sustainability surrounding shipbreaking, and analyses the relationship between social development, economic development and environmental protection. Maritime perspectives of environmental justice will also be highlighted through a discussion of the International Maritime Organization's role in the implementation of the Hong Kong Convention in developing countries. This book will be of great interest to scholars of environmental

justice, international maritime law and international environmental law.

Religious Offences in Common Law Asia - Li-ann Thio 2021-02-25

This book provides in-depth comparative analysis of how religious penal clauses have been developed and employed within Asian common law states, and the impact of such developments on constitutional rights. By examining the theoretical and conceptual underpinnings of religious offences as well as interrogating the nature and impact of religious penal clauses within the region, it contributes to the broader dialogue in relation to religious penal clauses globally, whether in countries which practise forms of secular or religious constitutionalism. Asian practice is significant in this respect, given the centrality of

religion to social life and indeed, in some jurisdictions, to constitutional or national identity. Providing rigorous studies of common law jurisdictions that have adopted similar provisions in their penal code, the contributors provide an original examination and analysis of the use and development of these religious clauses in their respective jurisdictions. They draw upon their insights into the background sociopolitical and constitutional contexts to consider how the inter-relationship of religion and state may determine the rationale and scope of religious offences. These country-by-country chapters inform the conceptual examination of religious views and sentiments as a basis for criminality and the forms of 'harm' that attract legal safeguards. Several chapters examine these questions from a historical and comparative perspective, considering the underlying bases and scope, as well as evolving objectives of these provisions. Through these

examinations, the book critically interrogates the legacy of colonialism on the criminal law and constitutional

practice of various Asian states.
