Adult Literacy in OECD Countries- T. Scott Murray 1998

In December 1995, the Organisation for Economic Co-Operation and Development (OECD) and Statistics Canada jointly published the results of the first International Adult Literacy Survey (IALS). For this survey, representative samples of adults aged 16 to 65 were interviewed and tested in their homes in Canada, France, Germany, the Netherlands, Poland, Sweden, Switzerland, and the United States. This report describes how the

survey was conducted in each country and presents all available evidence on the extent of bias in each country's data. Potential sources of bias, including sampling error, non-sampling error, and the cultural appropriateness and construct validity of the assessment instruments, are discussed. The chapters are; (1) "Introduction" (Irwin S. Kirsch and T. Scott Murray); (2) "Sample Design" (Nancy Darcovich); (3) "Survey Response and Weighting" (Nancy Darcovich); (4) "Non-Response Bias" (Nancy Darcovich, Marilyn Binkley, Jon Cohen, Mats Myrberg, and Stefan Persson); (5) "Data Collection and Processing" (Nancy Darcovich and T. Scott Murray); (6) "Incentives and the Motivation To Perform Well" (Stan Jones); (7) "The Measurement of Adult Literacy" (Irwin S. Kirsch, Ann Jungeblut, and Peter B. Mosenthal); (8) "Validity Generalization of the Assessment across Countries" (Don Rock); (9) "An Analysis of Items with Different

Parameters across Countries" (Marilyn R. Binkley and Jean R. Pignal); (10) "Scaling and Scale Linking" (Kentaro Yamamoto); (11) "Proficiency Estimation" (Kentaro Yamamoto and Irwin S. Kirsch); (12) "Plausibility of Proficiency Estimates" (Richard Shillington); and (13) "Nested-Factor Models for the Swedish IALS Data" (Bo Palaszewski). Fourteen appendixes contain supplemental information, some survey questionnaires, and additional documentation for various chapters. (Contains 94 tables, 12 figures, and 74 references.) (SLD)

Literacy Beyond Text

Comprehension - M. Anne

Britt 2017-07-06

Literacy Beyond Text

Comprehension aims to systematically investigate how readers interpret reading tasks within a situation, and how that interpretation influences reading behavior and comprehension. Presenting a new model of REading as problem SOLVing (RESOLV), the authors describe reading comprehension in terms of how a reader adopts goals within a

particular situation that then guide what is read, when, and how. By applying the RESOLV model to a range of reading situations, this book provides evidence to suggest that there is no unitary understanding of a task, because individuals bring their own goals and characteristics to the situation; as such, it demonstrates the importance of understanding how a reader (e.g., student, test-taker, employee completing a work task) represents the context and the specific assignment. Written by internationally recognized learning sciences scholars, Literacy Beyond Text Comprehension advances the state of the art in reading research, but also seeks to inform a broader range of audiences, including those interested in the teaching and the assessment of reading.

International Large-Scale Assessments in Education -

Bryan Maddox 2018-11-29
This book explores the often controversial international large-scale assessments (ILSAs) in education and offers research-based accounts of international testing as a social

practice. Assessment exercises, such as the Organisation for Economic Co-operation and Development's Programme for International Student Assessment (PISA), produce comparable international statistics and rankings on educational performance, and are influential practices that shape educational policy on a global scale. The chapters in this volume, written by expert researchers in the field, take the reader behind the scenes to document a broad range of ILSA practices - from the recruitment of countries into ILSAs, to the production and performance of large-scale testing, and the management, media reception and use of test data. Based on data that is only available to expert researchers with inside access, the international case study material includes examples from Australia, Ecuador, Germany, Japan, Mexico, Norway, Russia, Scotland, Slovenia, Sweden, the UK and the USA. The volume provides important insights for teachers, researchers and policy-makers

who use and study assessment data and who wish to evaluate its significance for educational policy and practice.
