Scars, Marks & Tattoos - Jacqueline Caruso 2021-03-31

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Calibrating the Cosmos - Frank Levin 2008-11-01

This book explains in clear, non-mathematical language the measurements and the interpretation of the resulting data that have led to the current understanding of the origin, evolution and properties of our expanding Big Bang universe. Theoretical concepts are emphasized, but no other book for the layman explains how model universes are generated, and how they function as the templates against which ours is compared and analyzed. Background material is provided in the first four chapters; the current picture and how it was attained are discussed in the next four chapters; and some unsolved problems and conjectured solutions are explored in the final chapter.

(GMAC), and \$1.5 billion to Chrysler Financial, the two manufacturers' respective credit affiliates. Contents of this report: Intro.; Auto Industry Loan Develop. in 12/08; Impact on the National Economy; The Domestic Motor Vehicle Market; Financial Issues in the Auto Industry; Financial Solutions: Bridge Loans and Restructuring; Pension and Health Care Issues; Stipulations and Conditions on TARP Loans to the Auto Industry.

Pirate Cinema - Cory Doctorow 2012-10-02

From the New York Times bestselling author of Little Brother, Cory Doctorow, comes Pirate Cinema, a new tale of a brilliant hacker runaway who finds himself standing up to tyranny. Trent McCauley is sixteen, brilliant, and obsessed with one thing: making movies on his computer by reassembling footage from popular films he downloads from the net. In the dystopian near-future Britain where Trent is growing up, this is more illegal than ever; the punishment for being caught three times is that your entire household's access to the internet is cut off for a year, with no appeal. Trent's too clever for that too happen. Except it does, and it nearly destroys his family. Shamed and shattered, Trent runs away to London, where he slowly learns the ways of staying alive on the streets. This brings him in touch with a demimonde of artists and activists who are trying to fight a new bill that will criminalize even more harmless internet creativity, making felons of millions of British citizens at a stroke. Things look bad. Parliament is in power of a few wealthy media conglomerates. But the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds.... At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Introduction to Statistical Modeling J. Dobson 2013-11-11

This book is about generalized linear models as described by Nelder and Wedderburn (1972). This approach provides a unified theoretical and computational framework for the most commonly used statistical methods: regression, analysis of variance and covariance, logistic regression, log-linear models for contingency tables and several more specialized techniques. More advanced expositions of the subject are given by McCullagh and Nelder (1983) and Andersen (1980). The emphasis is on the use of statistical models to investigate substantive questions rather than to produce mathematical descriptions of the data. Therefore parameter estimation and hypothesis testing are stressed. I have assumed that the reader is familiar with the most commonly used statistical concepts and methods and has some basic knowledge of calculus and matrix algebra. Short numerical examples are used to illustrate the main points. In writing this book I have been helped greatly by the comments and criticism of my students and colleagues, especially Anne Young. However, the choice of material, and the obscurities and errors are my responsibility and I apologize to the reader for any irritation caused by them. For typing the manuscript under difficult conditions I am grateful to Anne McKim, Jan Garnsey, Cath Claydon and Julie Latimer.

Kiffe Kiffe Tomorrow - Faïza Guène 2006-07-03

A "touching, furious, sharp, and very funny" novel of an immigrant teenage girl finding her own identity in France (Booklist). The Paradise projects are only a few metro stops from Paris, but it feels like a different world. Doria's father, aka the Beard, has headed back to their hometown in Morocco, leaving her and her mom to cope with their mektoub, their destiny, alone. They have a little help—from a social worker sent by the city, a psychiatrist sent by the school, and a thug friend who recites Rimbaud. It seems like fate has dealt them an impossible hand, but Doria might still make a new life—"with bravado, humor, and a healthy dose of rage" (St. Petersburg Times). "[A] sassy, spunky tale . . . Doria has what it takes to storm any barricade." —The Hartford Courant "[Doria is] as likable as Holden Caulfield or Prep's Lee Fiora. Readers will cheer. Highly recommended." —Library Journal, starred review "A promising addition to the world's literary voices." —The Miami Herald "Moving and irreverent, sad and funny, full of rage and intelligence. Her voice is fresh, and her book a delight." —Laila Lalami, bestselling author of The Moor's Account

Terrorists' Target Select Co Drake 1998-08-26

The author examines the factors which influence terrorists' target selection. In particular he looks at the influence of the ideologies, strategies and tactics of terrorist groups, and describes how these are restricted by the terrorists' resources, by protective and anti-terrorist measures, by the society within which the terrorists operate, and by the nature of the terrorists and their supporters. He concludes that terrorists' target selection is often both explicable and logical.

Computer-aided Tolerancing Fumihiko Kimura 2012-12-06

Theory and practice of tolerances are very important for designing and manufacturing engineering artifacts on a rational basis. Tolerance specifies a degree of "discrepancy" between an idealized object and its physical realization. Such discrepancy inevitably comes into our product realization processes because of practical cost consideration or our inability to fully control manufacturing processes. Major product and production characteristics which are affected by tolerances are product quality and cost. For achieving high precision machines tight tolerance specification is necessary, but this will normally increase product cost. In order to optimally compromise the conflicting requirements of quality and cost, it is essential to take into account of the total product life cycle throughout product planning, design, manufacturing, maintenance and recycling. For example, in order to construct durable products under severe working conditions, low sensitivity of product functionality with respect to tolerances is required. In future, re-use of components or parts will become important, and tolerance synthesis with respect to this aspect will be an interesting future research topics.

Nutrient Requirements of Beef Cattle Subcommittee on Beef Cattle Nutrition 2000-05-16

As members of the public becomes more conscious of the food they consume and its content, higher standards are expected in the preparation of such food. The updated seventh edition of Nutrient Requirements of Beef Cattle explores the impact of cattle's biological, production, and environmental diversities, as well as variations on nutrient utilization and requirements. More enhanced than previous editions, this edition expands on the descriptions of cattle and their nutritional requirements taking management and environmental conditions into consideration. The book clearly communicates the current state of beef cattle nutrient requirements and animal variation by visually presenting related data via computer-generated models.

Nutrient Requirements of Beef Cattle expounds on the effects of beef cattle body condition on the state of compensatory growth, takes an in-depth look at the variations in cattle type, and documents the important effects of the environment and stress on food intake. This volume also uses new data on the development of a fetus during pregnancy to prescribe nutrient requirements of gestating cattle more precisely. By focusing on factors such as product quality and environmental awareness, Nutrient Requirements of Beef Cattle presents standards and advisements for acceptable nutrients in a complete and conventional manner that promotes a more practical understanding and application. *NISSAN QASHQAI (FEB '14-'19)*. - PETER. The Dialectics of Globalization - Jerry Harris 2008-12-11

Combining bold theoretical analysis and careful empirical investigation Harris provides a critical framework to understand the political and economic underpinnings of globalization. In an unique historical approach the book examines how the revolution in information technologies and the break-up of the Soviet Union intertwined to present new global opportunities to reorganize capitalism as a unified world system headed by an emerging transnational capitalist class. The book challenges the common view that nation states still define international relations, with the United States as hegemonic leader of the world system. Instead Harris offers a more complex analysis of world affairs that sees the current period as one of transition between nationally based industrial capitalism and a global system based on revolutionary methods of production and new class relationships. He argues this conflict appears in every country as national economies realigned to fit new patterns of world accumulation creating a host of political tensions within and between nations. This analysis is detailed in a distinctive interpretation of the US military/industrial complex, as well as the contemporary class struggles in Germany and the emerging powers of China, India and Brazil. The book concludes by investigating alternative trends which are currently challenging the inequalities of global capitalism, unfolding a fresh approach to the relationship between the state, market and civil society.

CAPS LOCK: How Capitalism Took Hold of Graphic Design, and How to Escape from It - Ruben Pater 2021-09-21

Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design.

Major Challenges Facing Higher Education in the Arab World: Quality Assurance and Relevance - Adnan Badran 2019-03-25

This book focuses on two crucial issues that need to be addressed as a matter of urgency by universities in the Arab region, namely (a) conducting independent assessments of the quality of their teaching, research, administration, governance, and planning; and (b) determining the relevance of their teaching, research, and societal impacts. Although well-established around the world in manufacturing industries and private-sector service industries, including the research and

commercialisation arms of the major universities and research institutes, it is only in recent years that quality-assurance (QA) assessments have started to be applied to most aspects education. Several Arab universities are adopting various forms of QA but some variants are little more than bureaucratic "box-ticking" exercises with minimal commitment by staff to the ultimate aim of continuing self-improvement. This book will be of interest to senior management at faculty and departmental level and above in all Arab universities specifically, and more generally in Islamic institutions of higher education. Senior management in other universities, especially in the developing world will benefit from its analyses and recommendations.

Contested Waterscapes in the Mekong Region - Francois Molle
2012-05-04

The catchment area of the Mekong River and its tributaries extends from China, through Burma/Myanmar, Thailand, Laos, Cambodia and to Vietnam. The water resources of the Mekong region - from the Irrawaddy and Nu-Salween in the west, across the Chao Phraya to the Lancang-Mekong and Red River in the east- are increasingly contested.

Governments, companies, and banks are driving new investments in roads, dams, diversions, irrigation schemes, navigation facilities, power plants and other emblems of conventional 'development'. Their plans and interventions should provide some benefits, but also pose multiple burdens and risks to millions of people dependent on wetlands, floodplains and aquatic resources, in particular, the wild capture fisheries of rivers and lakes. This book examines how large-scale projects are being proposed, justified, and built. How are such projects contested and how do specific governance regimes influence decision making? The book also highlights the emergence of new actors, rights and trade-off debates, and the social and environmental consequences of 'water resources development'. This book shows how diverse, and often antagonistic, ideologies and interests are contesting for legitimacy. It argues that the distribution of decision-making, political, and discursive power influences how the waterscapes of the region will ultimately look and how benefits, costs and risks will be distributed. These issues are crucial for the transformation of waterscapes and the prospects for democratizing water governance in the Mekong region. The book is part of the action-research of the M-POWER (Mekong Program on Water, Environment and Resilience) knowledge network. Published with IFAD, CGIAR Challenge Program on Water & Food, M-POWER, Project ECHEL-EAU and HEINRICH BOLL STIFTUNG
