A Fire in Their Hearts - Tony Michels 2009-04-15

In a compelling history of the Jewish community in New York during four decades of mass immigration, Tony Michels examines the defining role of the Yiddish socialist movement in the American Jewish experience. The movement, founded in the 1880s, was dominated by Russian-speaking intellectuals, including Abraham Cahan, Mikhail Zametkin, and Chaim Zhitlovsky. Socialist leaders quickly found Yiddish essential to convey their message to the Jewish immigrant community, and they developed a remarkable public culture through lectures and social events, workers' education societies, Yiddish schools, and a press that found its strongest voice in the mass-circulation newspaper *Forverts*. Arguing against the view that socialism and Yiddish culture arrived as Old World holdovers, Michels demonstrates that they arose in New York in response to local conditions and thrived not despite Americanization, but because of it. And the influence of the movement swirled far beyond the Lower East Side, to a transnational culture in which individuals, ideas, and institutions crossed the Atlantic. New York Jews, in the beginning, exported Yiddish socialism to Russia, not the other way around. The Yiddish socialist movement shaped Jewish communities across the United States well into the twentieth century and left an important political legacy that extends to the rise of neoconservatism. A story of hopeful successes and bitter disappointments, *A Fire in Their Hearts* brings to vivid life this formative period for American Jews and the American left.

All Together Different - Daniel Katz 2011-11-01

In the early 1930's, the International Ladies' Garment Workers' Union (ILGWU) organized large numbers of Black and Hispanic workers through a broadly conceived program of education, culture, and community involvement. The ILGWU admitted these new members, the

overwhelming majority of whom were women, into racially integrated local unions and created structures to celebrate ethnic differences. All Together Different revolves around this phenomenon of interracial union building and worker education during the Great Depression.

Investigating why immigrant Jewish unionists in the International Ladies' Garment Workers' Union (ILGWU) appealed to an international force of coworkers, Katz traces their ideology of a working-class based cultural pluralism, which Daniel Katz newly terms "mutual culturalism," back to the revolutionary experiences of Russian Jewish women. These militant women and their male allies constructed an ethnic identity derived from Yiddish socialist tenets based on the principle of autonomous national cultures in the late nineteenth century Russian Empire. Built on original scholarship and bolstered by exhaustive research, All Together Different offers a fresh perspective on the nature of ethnic identity and working-class consciousness and contributes to current debates about the origins of multiculturalism.

2018 ISEP - International Code Council 2018

The ISEP meets the industry's need for a resource that contains the complete solar energy-related provisions from the 2018 International Codes and NFPA 70: 2017 NEC National Electrical Code, and selected standards in one document. The ISEP is organized such that it provides the best and most comprehensive tool for the design, installation and administration of both solar thermal (or solar heating and cooling) and photovoltaic systems. Similar to the organization of the International Energy Conservation Code (IECC), the Solar Commercial and Residential provisions have been presented in separate parts, to make it user friendly and easy to apply. Three important solar referenced standards have been included in their entirety: Solar Rating & Certification Corporation (SRCC) Standard 100 (Minimum Standards for Solar Thermal Collectors); SRCC Standard 300 (Minimum Standards for Solar Water Heating Systems); and SRCC Standard 600 (Minimum Standards for Solar Thermal Concentrating Collectors). Additional resources, such as sample solar permitting forms and links to the U.S. Department of Energy solar site access, have also been included, making this 2018 ISEP the single, most comprehensive document for solar energy code provisions and standards in the nation.
