Vogue x Music - Editors of American Vogue 2018-10-30
Vogue has always been on the cutting edge of popular culture, and Vogue x Music shows us why. Whether they're contemporary stars or classic idols, whether they made digital albums or vinyl records, the world's most popular musicians have always graced the pages of Vogue. In this book you'll find unforgettable portraits of Madonna beside David Bowie, Kendrick Lamar, and Patti Smith; St. Vincent alongside Debbie Harry, and much more. Spanning the magazine's 126 years, this breathtaking book is filled with the work of acclaimed photographers like Richard Avedon and Annie Leibovitz as well as daring, music-inspired fashion portfolios from Irving Penn and Steven Klein. Excerpts from essential interviews with rock stars, blues singers, rappers, and others are included on nearly every page, capturing exactly what makes each musician so indelible. Vogue x Music is a testament to star power, and proves that some looks are as timeless as your favorite albums.
XML - 2001
This book is a comprehensive guide to programming in XML. It teaches students how to use XML to create customized tags and includes several chapters that address standard custom markup languages for science and technology, multimedia, commerce, and other fields. The authors include a concise introduction to Java, providing students with the essentials of this programming language to enable them to work effectively with XML. The book also includes cutting edge topics such as XQL, SMIL and VoiceXML as well as a real-world e-Commerce case study. A complete chapter on Web-accessibility that addresses VoiceXML is also included.

Introduction to AutoCAD Plant 3D 2021 - Tutorial Books 2020-10-15
Introduction to AutoCAD Plant 3D 2021 is a learn-by-doing manual focused on the basics of AutoCAD Plant 3D. The book helps you to learn the process of creating projects in AutoCAD Plant 3D rather than learning specific tools and commands. It consists of sixteen tutorials, which help you to complete a project successfully. The topics explained in the plant design process are: - Creating Projects - Creating and Editing P&IDs - Managing Data - Generating Reports - Creating 3D Structures - Adding Equipment - Creating Piping - Validate Drawings - Creating Isometric Drawings - Creating Orthographic Drawing - Project Management, and - Printing and Publishing Drawings
Defying Doomsday - Tsana Dolichva 2016
Teens form an all-girl band in the face of an impending comet. A woman faces giant spiders to collect silk and protect her family. New friends take their radio show on the road in search of plague survivors. A man seeks love in a fading world. How would you survive the apocalypse? Defying Doomsday is an anthology of apocalypse fiction featuring disabled and chronically ill protagonists, proving it's not

always the "fittest" who survive – it's the most tenacious, stubborn, enduring and innovative characters who have the best chance of adapting when everything is lost. In stories of fear, hope and survival, this anthology gives new perspectives on the end of the world, from authors Corinne Duyvis, Janet Edwards, Seanan McGuire, Tansy Rayner Roberts, Stephanie Gunn, Elinor Caiman Sands, Rivqa Rafael, Bogi Takács, John Chu, Maree Kimberley, Octavia Cade, Lauren E Mitchell, Thoraiya Dyer, Samantha Rich, and K L Evangelista.

Google SketchUp Pro 8 step by step - João Gaspar 2017-09-01
Created to provide an experience closer to drawing and modeling with real objects, SketchUp has won over a host of loyal users year after year. SketchUp stands out for its speed and ease when creating volumetric objects and studies, being used to produce from simple to highly complex designs. The ability to exchange information between various programs in the CAD industry and other innovations such as integration with Google Earth, Google Street View and the availability of inumerous free libraries, through the Google 3D Warehouse make SketchUp stand out. This book aims to provide a high quality learning experience. All the described procedures are illustrated; at the end of each chapter there is a summary of the main topics addressed and exercises.

AutoCAD 2020 A Project-Based Tutorial - Tutorial Books 2019-06-06
Learn to design Home Plans in AutoCAD In this book, you will discover the process evolved in modeling a Home in AutoCAD from scratch to a completed two storied home. You will start by creating two-dimensional floor plans and elevations. Later, you will move on to 3D modeling and create exterior and interior walls, doors, balcony, windows, stairs, and railing. You will learn to create a roof on top of the home. You will add materials to the 3D model, create lights and cameras, and then render it. Also, you will learn to prepare the model for 3D printing.

The Summons - John Grisham 2012-02-28
#1 NEW YORK TIMES BESTSELLER • A pillar of the community who towered over local law and politics for forty years, Judge Atlee is now a shadow of his former self—a sick, lonely old man who has withdrawn to his sprawling ancestral home in Clanton, Mississippi. Knowing that the end is near, Judge Atlee has issued a summons for his two sons to return to Clanton to discuss his estate. Ray Atlee is the elder, a Virginia law professor, newly single, still enduring the aftershocks of a surprise divorce. Forrest is Ray's younger brother, the family's black sheep. The summons is typed by the Judge himself, on his handsome old stationery, and gives the date and time for Ray and Forrest to appear in his study. Ray reluctantly heads south to his hometown, to the place he now prefers to avoid. But the family meeting does not take place. The Judge dies too soon, and in doing so leaves behind a shocking secret known only to Ray . . . and perhaps to someone else.

Cybersecurity and Privacy - Bridging the Gap Samant Khajuria 2017-03-22
The huge potential in future connected services has as a precondition that privacy and security needs are dealt with in order for new services to be accepted. This issue is increasingly on the agenda both at company and at individual level. Cybersecurity and Privacy - bridging the gap addresses two very complex fields of the digital world, i.e., Cybersecurity and Privacy. These multifaceted, multidisciplinary and complex issues are usually understood and valued differently by different individuals, data holders and legal bodies. But a change in one field immediately affects the others. Policies, frameworks, strategies, laws, tools, techniques, and technologies - all of these are tightly interwoven when it comes to security and privacy. This book is another attempt to bridge the gap between the industry and academia. The book addresses the views from academia and industry on the subject. Technical topics discussed in the book include: CybersecurityEncryptionPrivacy policyTrustSecurity and Internet of ThingsBotnetsData risksCloudbased ServicesVisualization

Electronics Engineering - Knowledge Flow 2014-08-25
Electronics is the broad field of science which covers the study of flow and control of electricity in the form of electrons and the study of their performance and effects of gases, vacuums conductors and semiconductors, and with electronic components using such electrons. Electronics Engineering is a sub branch of electrical engineering. This field deals with studies the use of electronic components in a broad way and is related to the application of basic electronics devices like integrated circuits, transistors etc. The Electronics Engineering book covers the study of electronic components, circuits, transmitter, receiver, integrated circuits (IC). It also provides basic laws of electronics, magnetism, series and parallel circuits and basics electronics like logic gates.

The Politics of Low-Carbon Innovation - Per Ove Eikeland 2019-06-28
"Although technological innovation is undoubtedly crucial for addressing climate change, low-carbon innovation policies and politics have hardly been studied. This book clearly reveals the promises and pitfalls of European efforts in this field – recommended reading!"—Sebastian Oberthür, Institute for European Studies, Belguim "This compact volume effectively addresses a surprisingly unknown territory in an otherwise well-explored landscape. In doing so, it will provide a useful resource to all who follow the uneven progress of climate and energy policy in the EU context, as well as those who are interested in policies to stimulate technology development more broadly." —Tim Rayner, Tyndall Centre for Climate Change Research, University of East Anglia, UK The EU Strategic Energy Technology Plan (SET-Plan) was aimed at accelerating low-carbon innovation by raising, coordinating and concentrating resources to certain low-carbon

technologies. At the ten-year anniversary of the SET-Plan, this book examines why it was adopted and what it has achieved. Using an analytical framework developed to capture the 'politics of innovation', the authors trace the history of the Plan from initiation to implementation, and then explain its development as seen from the perspectives of the EU institutions, member-states, industry, the research community and international technology markets. The concluding chapter discusses lessons and prospects for European low-carbon innovation towards 2030 and beyond. This new work fills a void in the literature on EU climate and energy policies, and will appeal to scholars, students and practitioners in these fields.

Information Retrieval Models - Thomas Roelleke 2013-07-01

Information Retrieval (IR) models are a core component of IR research and IR systems. The past decade brought a consolidation of the family of IR models, which by 2000 consisted of relatively isolated views on TF-IDF (Term-Frequency times Inverse-Document-Frequency) as the weighting scheme in the vector-space model (VSM), the probabilistic relevance framework (PRF), the binary independence retrieval (BIR) model, BM25 (Best-Match Version 25, the main instantiation of the PRF/BIR), and language modelling (LM). Also, the early 2000s saw the arrival of divergence from randomness (DFR). Regarding intuition and simplicity, though LM is clear from a probabilistic point of view, several people stated: "It is easy to understand TF-IDF and BM25. For LM, however, we understand the math, but we do not fully understand why it works." This book takes a horizontal approach gathering the foundations of TF-IDF, PRF, BIR, Poisson, BM25, LM, probabilistic inference networks (PIN's), and divergence-based models. The aim is to create a consolidated and balanced view on the main models. A particular focus of this book is on the "relationships between models." This includes an overview over the main frameworks (PRF, logical IR, VSM, generalized VSM) and a pairing of TF-IDF with other models. It becomes evident that TF-IDF and LM measure the same, namely the dependence (overlap) between document and query. The Poisson probability helps to establish probabilistic, non-heuristic roots for TF-IDF, and the Poisson parameter, average term frequency, is a binding link between several retrieval models and model parameters. Textbook of Medical Physiology_3rd Edition-E-book - Indu Khurana 2019-11-10

The third edition of this book incorporates thoroughly revised and updated text, organized into twelve sections and arranged in three parts. Part I: General Physiology includes one section having five chapters. Part II: Systemic Physiology has been arranged into ten sections,

one on each body system. Part III: Specialized integrated physiology includes one section comprising of seven chapters. . Complete and up-to-date text incorporating recent advances. Illustrated by more than 1100 clear line diagrams. Complemented with numerous tables and flowcharts for quick comprehension. Applied aspects, highlighted in the boxes, have been expanded and updated with recent molecular concepts on pathophysiology, advances in investigations and therapeutic principles. Additional important information has been highlighted as important notes. The above features of this book make it an indispensable text for postgraduates in Physiology. Candidate preparing for PG entrance examination would also find it as an authentic reference source. Complimentary access to full e-book.

Cybernetics and Algorithms in Intelligent Systems - Radek Silhavy 2018-05-17 This book presents new approaches and methods applied to real-world problems, and in particular, exploratory research relating to novel approaches in the field of cybernetics and automation control theory. Particularly focusing on modern trends in selected fields of interest, it presents new algorithms and methods in intelligent systems in cybernetics. This book constitutes the third volume of the refereed proceedings of the Cybernetics and Algorithms in Intelligent Systems Section of the 7th Computer Science On-line Conference 2018 (CSOC 2018), held online in April 2018.

Digital Enterprise Technology - Pedro Filipe Cunha 2007-09-18 The first Digital Enterprise Technology (DET) International Conference was held in Durham, UK in 2002 and the second DET Conference in Seattle, USA in 2004. Sponsored by CIRP (College International pour la Recherche en Productique), the third DET Conference took place in Setúbal, Portugal in 2006. Digital Enterprise Technology: Perspectives and Future Challenges is an edited volume based on this conference. Topics include: distributed and collaborative design, process modeling and process planning, advanced factory equipment and layout design and modeling, physical-to-

digital environment integrators, enterprise integration technologies, and entrepreneurship in DET.

The Last Suppers - Mandy Mikulencak 2018-11-27 Set in 1950s Louisiana, Mandy Mikulencak's beautifully written and emotionally moving novel evokes both The Help and Dead Man Walking with the story of an unforgettable woman whose quest to provide meals for death row prisoners leads her into the secrets of her own past. Many children have grown up in the shadow of Louisiana's Greenmount State Penitentiary. Most of them—sons and daughters of corrections officers and staff—left as soon as they could. Yet Ginny Polk chose to come back to work as a prison cook. She knows the harsh reality of life within those walls—the cries of men being beaten, the lines of shuffling inmates chained together. Yet she has never seen them as monsters, not even those sentenced to execution. That's why Ginny has taken on a special responsibility: preparing their last meals. Pot roast or red beans and rice, coconut cake or pork neck stew . . . whatever the men ask for Ginny prepares, even meeting with their heartbroken relatives to get each recipe just right. The prison board frowns upon the ritual, as does Roscoe Simms, Greenmount's Warden. Her daddy's best friend before he was murdered, Roscoe has always watched out for Ginny, and their friendship has evolved into something deep and unexpected. But when Ginny stumbles upon information about the man executed for killing her father, it leads to a series of dark and painful revelations. Truth, justice, mercy—none of these are as simple as Ginny once believed. And the most shocking crimes may not be the ones committed out of anger or greed, but the sacrifices we make for love. "A haunting study of race relations, compassion, and mystery. A must read." —Library Journal (Starred Review)

The text has been systematically divided into twelve sections. Each section begins with a brief overview highlighting the topics covered and has

been further divided into many chapters. The book will be useful in laying a strong foundation for undergraduate students of allied health sciences.

Differential Forms and Applications - Manfredo P. Do Carmo 2012-12-06 An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

It Ends in Fire - Andrew Shvarts 2021-07-06 A James Patterson Presents novel Only those from the most powerful magical families can attend Blackwater Academy, but new student Alka has them fooled. Now it's time to take down the oppressive wizard ruling class from the inside. Alka Chelrazi is on a mission: 1. Infiltrate Blackwater Academy 2. Win the Great Game 3. Burn Wizard society to the ground As a child, Alka witnessed her parents' brutal murder at the hands of Wizards before she was taken in by an underground rebel group. Now, Alka is deep under cover at the most prestigious school of magic in the Republic: Blackwater Academy, a place where status is everything, where decadent galas end in blood-splattered duels,

where every student has their own agenda. To survive, Alka will have to lie, cheat, and kill to use every trick in her spy's toolkit. And for the first time in her life, the fiercely independent Alka will have to make friends, to recruit the misfits and the outcasts into her motley rebellion. But even as she draws closer to victory—to vengeance —she sinks deeper into danger as suspicious professors and murderous rivals seek the traitor in their midst, as dark revelations unravel her resolve. Can Alka destroy the twisted game... without becoming a part of it?

A Painted House - John Grisham 2011 The hill people and the Mexicans arrived on the same day. It was a Wednesday, early in September 1952. The Cardinals were five games behind the Dodgers with two weeks to go, and the season looked hopeless. The cotton, however, was waist high to my father, almost over my head, and he and my grandfather could be heard before supper whispering words that were seldom heard. It could be a "good crop." In rural Arkansas, seven-year-old farm boy Luke Chandler lives in the cotton fields with his parents and grandparents in a little house that's never been painted. The Chandlers farm eighty acres that they rent, not own, and when the cotton is ready they hire a truckload of Mexicans and a family from the Ozarks to help harvest it. For six weeks they pick cotton, battling the heat, the rain, the fatigue, and sometimes each other. As the weeks pass Luke sees and hears things no seven-year-old could possibly be prepared for, and finds himself keeping secrets that not only threaten the crop but will change the lives of the Chandlers forever.
