Dogs partner with humans in a wide array of work-related disciplines. As detectors, guides, guardians, stock herders, assistants and professional canine athletes, there is demand for more scientific knowledge to enhance the performance and success of human and working dog partnerships. This topic encompasses a holistic approach to the science of working dog performance. The ability of a dog to complete tasks depends on their physical and behavioral traits; their ability to exert themselves at various demanding tasks requires both physical and behavioral stamina, agility, and resilience. The influence and interactions of genetics, health, environment and training are areas that can provide new insight to improve performance in

current dogs and future generations. The human impact on the success of the working dog team encompasses the human's physical, psychological and analytic perspectives, and the intersection of human and canine interspecies communication.

**Confessions of a Guide Dog** - Mark Carlson 2011-11-15

Have you ever wondered what a guide dog does? How do they know to lead a blind owner? Can they understand traffic lights? Most importantly, how does the owner know where to pick up the poop? This memoir answers these questions—and more. It tells what guide dogs are supposed to do. They're smart, loyal and well-trained—but not all dogs are created alike. Musket is proof of that. He's definitely got a thing for treats and belly rubs. For the first time, the dog has his say. (Of course he needed a little help with the typing, since he doesn't have opposable thumbs. That's where author Mark Carlson came in. Still, Musket is the brains of the outfit.) Mark and Musket tell their story with humor, emotion, and Musket's occasional contradictions. And at the end of the day, Musket somehow manages to be a great guide dog too. *Confessions of a Guide Dog* was written so a wonderful, devoted dog could reach out to those who haven't been lucky enough to meet him. He'll make you smile, laugh, cry, and want to give him treats. This is their story. (And they're sticking to it.)

*Guide Dogs of America* Patrick S. Halley 2012-08-17

*Guide Dogs of America, A History*, recounts the founding, growth and operation of one of America's premier providers of guide dogs for the visually impaired. It also details the history of the guide dog movement in America, beginning with the story of "Lux," the first guide dog in America, given to blind United States Senator Thomas Schall in 1927. *Guide Dogs of America* was founded by Joseph W. Jones, Sr., a machinist by trade who lost his vision and, when he was turned down, at age 57, as "too old" for a guide dog, started his own guide dog school. Jones soon teamed with Captain L. A. Kreimer, a veteran of the German Army in World War I who had trained the world's first guide dog at an

army field hospital in 1916, and who subsequently ran the German's extensive network of guide dog schools for soldiers blinded by the war. Together, Jones and Kreimer, with significant support from the International Association of Machinists and Aerospace Workers, the union to which Jones belonged, began training guide dogs in Los Angeles. Hollywood stars soon took note of the charitable work being done by the school - where dogs and training are provided to students free of charge, and without assistance from any level of government - and lent their fame and fortune to the operation. John Wayne, Lucille Ball, Andy Griffith, Jonathan Winters, Clark Gable, Roy Rogers, Jackie Cooper and Betty White were among the first to become involved, setting a trend that continues to this day through the involvement of a new generation of stars, including Amanda Righetti, a star of CBS Television's "The Mentalist." This book also describes the guide dog process: from breeding, puppy raising, training, selection of students, matching students with the proper dog, to post graduate services, and features a first person narrative by Guide Dogs of America graduate Lorri Bernson, who tells in moving detail of the loss of her vision, the battle to achieve independence, her hopes and dreams as a student at the school, and the fulfilling life she has been able to lead with the assistance of her guide dog. Equally important, Guide Dogs of America tells the story of the men and women who have made all of this possible, from the dedicated members of the Machinists Union who have held thousands of charitable events and donated millions of dollars, to corporations who have donated generously, and the galaxy of Hollywood stars who have given freely of their time and talents. Anyone interested in the story of how one man, faced with seemingly insurmountable challenges can not only overcome them, but can provide hope, independence and a better life to literally thousands of people around the world will enjoy this book.

Trusting Calvin - Sharon Peters 2012-12-04

Max Edelman was just 17 when the Nazis took him from his Jewish ghetto in Poland to the first of five work camps, where his only hope of survival was to keep quiet and raise an

emotional shield. After witnessing a German Shepherd kill a fellow prisoner, he developed a lifelong fear of dogs. Later beaten into blindness by two bored guards, Max survived, buried the past, and moved on to a new life in America, becoming an X-ray technician. But when he retired, he needed help. He needed a guide dog. After a month of training, he received Calvin, a handsome, devoted chocolate Labrador retriever. Calvin guided Max safely through life, but he sensed the distance and reserve of Max's emotional shield. Calvin grew listless and lost weight. Trainers intervened—but to no avail. A few days before Calvin's inevitable reassignment, Max went for an afternoon walk. A car cut into the crosswalk, and Calvin leapt forward, saving Max's life. Max's emotional shield dissolved. Calvin sensed the change and immediately improved, guiding Max to greater openness, trust, and engagement with the world. Here is the remarkable, touching story of a man who survived history and the dog that unlocked his heart.

**Understanding Dogs** - Clinton Sanders

2010-06-21

Can people have authentic social relationships with speechless animals? What does your dog mean to you, your understanding of yourself, and your perceived and actual relationships with others and the world? What do you mean to your dog? In *Understanding Dogs*, sociologist and faithful dog companion Clinton R. Sanders explores the day-to-day experiences of living and working with domestic dogs. Based on a decade of research in veterinary offices and hospitals, dog guide training schools, and obedience classes -- and colored with his personal experiences and observations at and outside home with his own canine companions -- Sanders's book examines how everyday dog owners come to know their animal companions as thinking, emotional, and responsive individuals. Linking animal companionship with social as well as personal identity, *Understanding Dogs* uses detailed ethnographic data in viewing human and animal efforts to understand, manipulate, care for, and interact with each other. From nineteenth-century disapproval of what was seen as irresponsibly indulgent pet ownership among the poor to Bill Clinton's caring and fun-loving image and populist connection to the "common person" as achieved through his Labrador companion Buddy, Sanders looks at how dogs serve not only as social facilitators but also as adornments to social identity. He also reveals how, while we

often strive to teach and shape our dogs' behavior, dogs often teach us to appreciate with more awareness a nourishing meal, physical warmth, a walk in the woods, and the simple joys of the immediate moment. Sanders devotes chapters to the specialized work of guide dog trainers; the problems and joys experienced by guide dog owners; the day-to-day work of veterinarians dealing with the healing, death, and euthanizing of their animal patients; and the everyday interactions, assumptions, and approaches of people who choose, for various reasons and in various ways, to spend their lives in the company of dogs. *Understanding Dogs* will interest those who live and work with animals as well as those studying the sociology of human-animal interactions.
