*Between Rome and Carthage* - Michael P. Fronda 2010-06-10

Hannibal invaded Italy with the hope of raising widespread rebellions among Rome's subordinate allies. Yet even after crushing the Roman army at Cannae, he was only partially successful. Why did some communities decide to side with Carthage and others to side with Rome? This is the fundamental question posed in this book, and consideration is given to the particular political, diplomatic, military and economic factors that influenced individual communities' decisions. Understanding their motivations reveals much, not just about the war itself, but also about Rome's relations with Italy during the prior two centuries of aggressive expansion. The book sheds new light on Roman imperialism in Italy, the nature of Roman hegemony, and the transformation of Roman Italy in the period leading up to the Social War. It is informed throughout by contemporary political science theory and archaeological evidence, and will be required reading for all historians of the Roman Republic.

**Arkansas Post National Memorial - Cultural Landscape Report** - National Park Service 2013-01-19

The purpose of this Cultural Landscape Report is to guide treatment and use of the above-ground resources associated with the Arkansas Post National Memorial (APNM). To do this, an investigation and evaluation of the historic landscape has been conducted, using National Park Service and National Register of Historic Places guidelines. The documentation of historic significance and evaluation of integrity of the cultural landscape serves as a framework upon which treatment recommendations are based. The report provides park managers with a comprehensive understanding of the physical evolution of the historic landscape, and guidance for future management of the site. The report is organized in the following manner: Part I: Chapter 1: Introduction; Documents the scope of the report, location and description of the property, identifies project consultants, and describes the methodology used. Chapter 2: Management Issues; Provides a list of management issues to be addressed throughout the project. Chapter 3: Site History; Presents a historic narrative of the physical evolution of the site. Historic period plans support the historic

narrative that addresses the major time periods identified for the site. These periods have been defined as pre-contact, the Colonial/Revolutionary War, settlement and early statehood, the Civil War, late nineteenth; and early twentieth century development, twentieth century and state park development, and NPS development. Part II: Chapter 4: Existing Conditions; Provides a narrative and graphics addressing the existing landscape features, vegetation, and the archeological resources present at the site. Chapter 5: Analysis; Compares findings from the site history and existing conditions information to analyze the landscape characteristics and features of the APNM landscape. The historic integrity assessment has focused on determining if the characteristics and features that defined the landscape during the historic periods are still present and if they retain the ability to physically represent the site's history. Chapter 6: Treatment Recommendations; Overall preservation treatment recommendations as well as specific implementation guidelines are provided. Includes a treatment plan. Chapter 7: Implementation Guidelines; Includes general recommendations for phasing the treatments recommended in Chapter 6. Also includes future Project Management Statements and "Class C" cost estimates for implementation.

**An Indigenous Peoples' History of the United States** - Roxanne Dunbar-Ortiz  
2015-08-11

New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally

recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, An Indigenous Peoples' History of the United States is an essential resource providing historical threads that are crucial for understanding the present. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. An Indigenous Peoples' History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

[The Rise of Christianity](#) Rodney Stark  
2020-06-16

The idea that Christianity started as a clandestine movement among the poor is a widely accepted notion. Yet it is one of many

myths that must be discarded if we are to understand just how a tiny messianic movement on the edge of the Roman Empire became the dominant faith of Western civilization. In a fast-paced, highly readable book that addresses beliefs as well as historical facts, Rodney Stark brings a sociologist's perspective to bear on the puzzle behind the success of early Christianity. He comes equipped not only with the logic and methods of social science but also with insights gathered firsthand into why people convert and how new religious groups recruit members. He digs deep into the historical evidence on many issues--such as the social background of converts, the mission to the Jews, the status of women in the church, the role of martyrdom--to provide a vivid and unconventional account of early Christianity. The author plots the most plausible curve of Christian growth from the year 40 to 300. By the time of Constantine, Christianity had become a considerable force, with growth patterns very similar to those of modern-day successful religious movements. An unusual number of Christian converts, for example, came from the educated, cosmopolitan classes. Because it offered a new perspective on familiar concepts and was not linked to ethnicity, Christianity had a large following among persons seeking to assimilate into the dominant culture, mainly Hellenized Jews. The oversupply of women in Christian communities--due partly to the respect and protection they received--led to intermarriages with pagans, hence more conversions, and to a high fertility rate. Stark points out, too, the role played by selflessness and faith. Amidst the epidemics, fires, and other disasters that beleaguered Greco-Roman cities, Christian communities were a stronghold of mutual aid, which resulted in a survival rate far greater than that of the pagans. In the meantime, voluntary martyrdom, especially a generation after the death of Christ, reinforced the commitment of the Christian rank and file. What Stark ultimately offers is a multifaceted portrait of early Christianity, one that appeals to practical reasoning, historical curiosity, and personal reflection.

**Atlanta Compromise** - Booker T. Washington 2014-03

The Atlanta Compromise was an address by African-American leader Booker T. Washington on September 18, 1895. Given to a predominantly White audience at the Cotton States and International Exposition in Atlanta, Georgia, the speech has been recognized as one of the most important and influential speeches in American history. The compromise was announced at the Atlanta Exposition Speech. The primary architect of the compromise, on behalf of the African-Americans, was Booker T. Washington, president of the Tuskegee Institute. Supporters of Washington and the Atlanta compromise were termed the "Tuskegee Machine." The agreement was never written down. Essential elements of the agreement were that blacks would not ask for the right to vote, they would not retaliate against racist behavior, they would tolerate segregation and discrimination, that they would receive free basic education, education would be limited to vocational or industrial training (for instance as teachers or nurses), liberal arts education would be prohibited (for instance, college education in the classics, humanities, art, or literature). After the turn of the 20th century, other black leaders, most notably W. E. B. Du Bois and William Monroe Trotter - (a group Du Bois would call The Talented Tenth), took issue with the compromise, instead believing that African-Americans should engage in a struggle for civil rights. W. E. B. Du Bois coined the term "Atlanta Compromise" to denote the agreement. The term "accommodationism" is also used to denote the essence of the Atlanta compromise. After Washington's death in 1915, supporters of the Atlanta compromise gradually shifted their

support to civil rights activism, until the modern Civil rights movement commenced in the 1950s. Booker Taliaferro Washington (April 5, 1856 - November 14, 1915) was an African-American educator, author, orator, and advisor to presidents of the United States. Between 1890 and 1915, Washington was the dominant leader in the African-American community. Washington was of the last generation of black American leaders born into slavery and became the leading voice of the former slaves and their descendants, who were newly oppressed by disfranchisement and the Jim Crow discriminatory laws enacted in the post-Reconstruction Southern states in the late 19th and early 20th centuries. In 1895 his Atlanta compromise called for avoiding confrontation over segregation and instead putting more reliance on long-term educational and economic advancement in the black community.

These essays both illuminate the original texts and encourage active engagement with them.

**Registries for Evaluating Patient Outcomes** - Agency for Healthcare Research and Quality/AHRQ 2014-04-01

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization.

Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

American Bar Association. House of Delegates 2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
