Buying and Selling Multimedia Services - Gerry Souter 2017-09-29

This book is a comprehensive guide to buying and developing multimedia in the most cost-effective manner. Focusing on the human factors in producing multimedia, rather than just the software, Buying and Selling Multimedia Services is aimed at both buyers and sellers of multimedia services and draws on real-world anecdotes|war stories|from project diaries and first-hand experience, to provide examples of the key ideas delineated within the book. These are true stories culled from 25 years of working on both sides of the desk as a purchaser of creative services for a Fortune 500 company and as a producer and seller for one of the largest multimedia production shops in the country. This book helps the multimedia producer and buyer to recognize flaws in past performances and to anticipate situations in future projects in order to save money and eliminate boardroom

confrontations. Accusations, altercations, and recriminations can be avoided and the bottom line enhanced with the production of an effective product targeted to a receptive audience. Souter examines the skills necessary to both the producer and the purchaser of multimedia, allowing each to see the others' problems and viewpoints. Viewing the multimedia project from both sides, as both buyer and seller, Souter highlights the issues which will allow for effective communication between parties, resulting in a better product and a more creative relationship among all involved. In the second part of the book, Souter provides a comprehensive guide to all the digital formats available, to help the buyer and the developer select the most appropriate for a given project.

Analysis and Management of Productivity and Efficiency in Production Systems for Goods and Services

- Fabio Sartori Piran

2020-01-08

In companies that produce goods and services, productivity and efficiency improvements are a constant challenge. This book reviews the differences between productivity and efficiency. It proposes a new method and makes available a computational tool for implementation that contributes to facilitating the use of Data Envelopment Analysis (DEA). The book presents a discussion about productivity and efficiency, illustrating the potentials of use and conceptual differences. It covers the concepts and techniques for analysis of productivity and efficiency, analyzing critical benefits and limitations, explains in detail how to use DEA for

analysis, provides innovative methods for using DEA, offers a free online computer tool with a direction guide, shows real empirical applications, and covers other techniques that can be used to complement the analysis performed. The book is for professionals, managers, consultants, students working and taking courses in productive systems of goods and services. Ancillary materials include a free online computer tool to operationalize the concepts and methods proposed in the book, a guide on how to use the method and the software developed for the DEA application. Solutions manual, instructor's manual, PowerPoint slides, and figure slides also will be available upon qualified adoption.

Mobile Services in the Networked Economy
Jarkko Vesa 2005-01-01

"This book provides new insight into the structure and dynamics of the mobile services industry by combining novel ideas from complexity theory, from the research of vertical

integration strategies and from the theories of networked organizations. These ideas and theories are then applied to the context of three different types of mobile services markets"--

Human-Computer Interaction. Applications and Services- Masaaki Kurosu 2014-06-09

The 3-volume set LNCS 8510, 8511 and 8512 constitutes the refereed proceedings of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction,

addressing major advances in knowledge and effective use of computers in a variety of application areas.
