**John Gay and the London Theatre** - Calhoun Winton 2021-10-21

The Beggar's Opera, often referred to today as the first musical comedy, was the most popular dramatic piece of the eighteenth century—and is the work that John Gay (1685-1732) is best remembered for having written. That association of popular music and satiric lyrics has proved to be continually attractive, and variations on the Opera have flourished in this century: by Kurt Weill and Bertolt Brecht, by Duke Ellington, and most recently by Vaclav Havel. The original opera itself is played all over the world in amateur and professional productions. But John Gay's place in all this has not been well defined. His Opera is often regarded as some sort of chance event. In *John Gay and the London Theatre*, the first book-length study of John Gay as dramatic author, Calhoun Winton recognized the Opera as part of an entirely self-conscious career in the theatre, a career that Gay pursued from his earliest days as a writer in London and continued to follow to his death. Winton emphasizes Gay's knowledge of and affection for music, acquired, he argues, by way of his association with Handel. Although concentrating on Gay and his theatrical career, Winton also limns a vivid portrait of London itself and of the London stage of Gay's time, a period of considerable turbulence both within and outside the theatre. Gay's plays reflect in varying ways and degrees that social, political, and cultural turmoil. Winton's study sheds new light not only on Gay and the theatre, but also on the politics and culture of his era.

**The Use and Effectiveness of Macroprudential Policies** - Mi. Eugenio Cerutti 2015-03-17

Using a recent IMF survey and expanding on previous studies, we document the use of macroprudential policies for 119 countries over the 2000-13 period, covering many instruments. Emerging economies use macroprudential policies most frequently, especially foreign exchange related ones, while advanced countries use borrower-based policies more. Usage is generally associated with lower growth in credit, notably in household credit. Effects are less in financially more developed and open economies, however, and usage comes with greater cross-border borrowing, suggesting some avoidance. And while macroprudential

policies can help manage financial cycles, they work less well in busts.

This book is a must for undergraduates as well as an invaluable tool for professionals in sport management and administration in the private public and voluntary sectors.

**The English Teacher's Companion** - Jim Burke 2008

Teachers and teacher educators asked for: the latest research on literacy more information about national standards ways to consider gender in instruction advice for teaching Advanced Placement classes ideas for teaching media literacy and incorporating technology effectively into instruction even more resources for mentoring new teachers analysis of how trends in society, culture, and politics impact teachers and their classrooms. And Jim delivers. He has revamped his introductory chapters on literacy learning to include up-to-the-minute thinking from the field, and he has incorporated lists of key standards and helpful suggestions for reaching them. His practical strategies turn recent findings on literacy and gender into well-designed, research-based instruction, and his ideas help you meet the very different needs of AP students by understanding their goals and providing them with appropriate challenges.

**Globalization of Education** - Joel Spring 2008-11-19

Continuing Joel Spring's reportage and analysis of the intersection of global forces and education, this text offers a comprehensive overview and synthesis of current research, theories, and models related to the topic. Spring introduces readers to the processes, institutions, and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts. Designed for courses on globalization and education, international and comparative education, educational foundations, multicultural education, and educational policy, the text is written in a clear narrative style to engage readers in thoughtful consideration of topics discussed. Each chapter includes "Key Points" that summarize the content and suggest issues and questions for critical analysis, discussion, and debate.

CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

**Adjoint Equations and Analysis of Complex Systems** - Guri I. Marchuk  
2013-06-29

New statements of problems arose recently demanding thorough analysis. Notice, first of all, the statements of problems using adjoint equations which gradually became part of our life. Adjoint equations are capable to bring fresh ideas to various problems of new technology based on linear and nonlinear processes. They became part of golden fund of science through quantum mechanics, theory of nuclear reactors, optimal control, and finally helped in solving many problems on the basis of perturbation method and sensitivity theory. To emphasize the important role of adjoint problems in science one should mention four-dimensional analysis problem and solution of inverse problems. This range of problems includes first of all problems of global climate changes on our planet, state of environment and protection of environment against pollution, preservation of the biosphere in conditions of vigorous growth of population, intensive development of industry, and many others. All this required complex study of large systems: interaction between the atmosphere and oceans and continents in the theory of climate, changes in the biosphere affected by pollution of natural and anthropogenic origin. Problems of local and global perturbations and models sensitivity to input data join into common complex system.

**Corrupt Histories** - Emmanuel Kreike  
2004

Corruption is a preoccupation of governments and societies across place and time, from the 18th-19th Century British, Chinese, and Iberian empires to 20th Century Nazi Germany, Russia, the United States, and India. This study offers three different perspectives on corruption. The first chapters highlight corrupt practices, taking as a point of departure a technocratic definition of corruption. The second part of the book views corruption through the lens of discourses of corruption, revealing that accusations of corruption have been employed as tools, often in the context of contestations of power. The essays in the third part of the book treat corruption as a process, taking into account its causes and effects and their impact on society, economics, and politics. Contributors: Jeremy Adelman, Virginie Coulloudon, William Doyle, Diego Gambetta, Norman J. W. Goda, Robert Gregg, Michael Johnston, William Chester Jordan, Emmanuel Kreike, Vinod Pavarala, Dilip Simeon, Pierre-Etienne Will, David Witwer, Philip Woodfine William Chester Jordan is Professor of History at Princeton University; Emmanuel Kreike is Assistant Professor of African History and Director of the African Studies Program at Princeton University

2011-10-25

A crew of thieves hopes to hijack a mobile home full of money in this

crime caper from "the funniest man in the world" (The Washington Post). John Dortmunder has been working an encyclopedia-selling scam while waiting for his next big heist. Unfortunately, his latest mark seems to be wise to the con, and he has to cut his sales pitch short and make a quick escape. But opportunity awaits: Main Street bank has temporarily relocated to a mobile home. All Dortmunder has to do is get past seven security guards, put the bank-on-wheels in gear, and drive away. It's a simple plan, until it all goes wrong . . . Perfect for fans of Carl Hiaasen or Lawrence Sanders's Bernie Rhodenbarr series, the Dortmunder novels by New York Times bestselling and multiple Edgar Award-winning author Donald E. Westlake are a rollicking treat that combine fast-moving suspense with laugh-out-loud wit. Bank Shot is a "hilarious" standout in the series (The New York Times).

They are arranged in three sections, the first focusing on the identification of subcompetences.

**World Migration Report 2018** - United Nations Publications  
2018-01-15

This report is the ninth in the world migration report series which is designed as a substantive contribution to increasing the understanding of current and strategic migration issues throughout the world. It presents key data and information on migration as well as thematic chapters on highly topical migration issues. It is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues. The two parts are intended to provide both overview information that helps to explain migration patterns and processes globally and regionally, as well as insights and recommendations on major issues that policymakers are - or soon - will be grappling with.

**Modern Genre Theory** - David Duff  
2014-09-11

Since Aristotle, genre has been one of the fundamental concepts of literary theory, and much of the world's literature and criticism has been shaped by ideas about the nature, function and value of literary genres. Modern developments in critical theory, however, prompted in part by the iconoclastic practices of modern writers and the emergence of new media such as film and television, have put in question traditional categories, and challenged the assumptions on which earlier genre theory was based. This has led not just to a reinterpretation of individual genres and the development of new classifications, but also to a radically new understanding of such key topics as the mixing and evolution of genres, generic hierarchies and genre-systems, the politics and sociology of genres, and the relations between genre and gender. This anthology, the first of its kind in English, charts these fascinating developments. Through judicious selections from major twentieth-century genre theorists including Yury Tynyanov, Vladimir Propp, Mikhail Bakhtin, Hans Robert Jauss, Rosalie Colie, Fredric Jameson, Tzvetan Todorov, Gérard Genette and Jacques Derrida, it demonstrates the central role that notions of genre have played in Russian Formalism, structuralism and post-structuralism, reception theory, and various modes of historical criticism. Each essay is accompanied by a detailed headnote, and the volume opens with a lucid introduction emphasising the international and interdisciplinary character of modern debates about genre. Also included are an annotated bibliography and a glossary of key terms, making this an indispensable resource for students and anyone interested in genre studies or literary theory.

**The Making of Humanity** - Robert Briffault  
1919

**The History of Bukhara** - Abū Bakr Muḥammad ibn Jaʿfar Narshakhī  
2007-01-01

Abu Bakr Muhammad ibn al-Narshakhi of Bukhara wrote the history of his city and presented it to the Samanid ruler Nuh ibn Nasr in 943 C.E. (A.H. 332). This is the only book he is known to have written. Narshakhi's History of Bukhara is unusual among histories of Middle Eastern cities because it provides a broad and perceptive overview of urban life of the time, as opposed to the standard biographies of religious leaders. Richard Frye's translation from the Persian presents an engaging, readable

narrative that recreates the lively intellectual and commercial life of this vibrant ancient city. In the tenth century, Bukhara was a cultural center that rivaled Baghdad, and was known as 'the dome of learning in the East.' It was a dynamic metropolis, capital of the semi-independent dynasty that ruled most of present-day Iran and Central Asia. It was in Bukhara that the so-called Persian Renaissance began, with its far-reaching literary implications. Narshakhi portrays not only rulers, but also everyday life in cities and villages. This primary source affords insights into life in Eastern Iran and Central Asia during a period of change in the Islamic world. About Richard Frye: Richard N. Frye, Harvard University, is the author of *The Heritage of Central Asia*, *Ibn Fadlan's Journey to Russia*, and numerous other books.

Teaching isn't merely transmitting knowledge to students; it's also about teaching students to approach learning in engaging and unexpected ways. In *Sparking Student Creativity: Practical Ways to Promote Innovative Thinking and Problem Solving*, author and researcher Patti Drapeau explores and explains research related to creativity and its relevance in today's standards-based, critical thinking-focused classroom. The book vividly and comprehensively shows \* How creative lessons can meet and extend the expectations of curriculum standards such as the Common Core State Standards, \* How to incorporate creativity and assessment into daily classroom practices, \* How to develop a "Creativity Road Map" to guide instruction, and \* How to design lessons that prompt and support creative thinking. In addition, the book includes 40 "grab and go" ideas that infuse lesson plans with a spirit of exploration. No matter what grade levels or content areas you teach, *Sparking Student Creativity* will help you to produce creative lesson components that directly address critical content, target specific standards, and require thoughtful products from students as they grow into independent learners and become successful students and adults.

**The Language of the Birds** - Alisher Nava'i 2006-03-06

*The Language of the Birds* is a masterpiece of Eastern Turkish literature (now Uzbek), and was written by one of Central Asia's most prominent poets, Alisher Nava'i, shortly before his death in 1501. The story begins with the birds of the world realizing they are far from their king and so they begin their arduous journey with the assistance of the wise bird Hoopoe as their guide. Hoopoe listens to their complaints and excuses along the way and encourages them to seek true life even though the journey is sometimes painful. This epic poem in prose form contains many anecdotes and stories from the oral history of the Silk Road and Islam. Through this story, people are exhorted to rise above any excuse they might have in their spiritual pilgrimage. Alisher Nava'i (1441-1501) is renowned in Central Asia for his numerous writings and lasting influence in Uzbekistan as well as the contemporary Central Asian republics. In modern Uzbekistan, Nava'i is revered above all other poets and his presence is still found - streets, museums, and even a province and city are named after him. His proverbs are found throughout Central Asia and he is considered the father of the Uzbek language. His words

for peace and against oppression are as timely today as they were 5 centuries ago. Nava'i lived in Herat, Afghanistan. His writings, endowments, and his life example have had lasting influence in Central Asia. In *The Language of the Birds*, we are introduced to what Nava'i thought is important in life. It is a world of love that goes beyond the rational and is ready to endure anything for the beloved. This book is for anyone who values great historical literature, as well as those needing inspiration in his or her own pilgrimage in life.

*The Seven Years' War* Daniel Marston 2013-06-17

The closest thing to total war before the First World War, the Seven Years' War was fought in North America, Europe, the Caribbean and India with major consequences for all parties involved. This fascinating book is the first to truly review the grand strategies of the combatants and examine the differing styles of warfare used in the many campaigns. These methods ranged from the large-scale battles and sieges of the European front to the ambush and skirmish tactics used in the forests of North America. Daniel Marston's engaging narrative is supported by personal diaries, memoirs, and official reports.

**Innovations in Biology** - Martin Walters 1999

**World Population Prospects 2019: Highlights** - United Nations Publications 2019-07-23

The United Nations population estimates and projections form a comprehensive set of demographic data to assess population trends at the global, regional and national levels. They are used in the calculation of many of the key development indicators commonly used by the United Nations system, including for more than one third of the indicators used to monitor progress towards the achievement of the Sustainable Development Goals. The 2019 revision of the *World Population Prospects* is the twenty-sixth edition of the official United Nations population estimates and projections, which have been prepared since 1951 by the Population Division of the Department of Economic and Social Affairs. The 2019 revision presents population estimates from 1950 until the present for 235 countries or areas, which have been developed through country-specific analyses of historical demographic trends. It builds on previous revisions by incorporating additional results from the 2010 and 2020 rounds of national population censuses as well as information from vital registration and recent nationally representative household sample surveys. The 2019 revision also presents population projections to the year 2100 that reflect a range of plausible outcomes at the global, regional and country levels. These Highlights summarise key population trends described by the estimates and projections presented in *World Population Prospects 2019*.

**Introduction to the Study of Religion** - Hillary P. Rodrigues 2008-08-20

Why do people study religion? How have they studied it in the past? How do we study religion today? Is the academic study of religion the same as religious education? These and many other questions are addressed in this engaging introduction to the discipline of religious studies, written by two experienced university teachers. The authors have crafted this book to familiarize novice students with key concepts and terminology in the study of religion. More advanced students will find a varied array of theoretical perspectives and methodological approaches to the field. Topics include: definitions of religion perspectives in the study and teaching of religion how religion began to be studied: traditional perspectives - philosophical and theological how people experience religion: perspectives in the study of religious consciousness and perception - phenomenological and psychological studying religion within communities: Social and cultural perspectives - anthropological, sociological, political and economic judging religion: critical perspectives - feminist approaches, the interaction of popular literature and religion contextual perspectives - historical and comparative. The book encourages students to think critically about the theories and methods presented. Students will find arguments for the strengths and limitations

of these approaches, understand connections among religious studies and other intellectual movements, and develop their own ideas of how

they might want to go about the study of religion. Summary boxes, a timeline, a glossary and other pedagogic aids help students grasp key concepts, along with a companion website at [www.sastor.com](http://www.sastor.com).
